ABSTRACT

This 1997 edition of the "Digest of Education Statistics" is the 32nd in a series of publications initiated in 1962. Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from kindergarten through graduate school. The digest includes data from many government and private sources, and draws especially on the results of surveys and activities carried out by the National Center for Education Statistics (NCES). The publication contains information on a variety of topics, including the number of schools and colleges, teachers, enrollments, graduates, educational attainment, finances, federal funds for education, employment and income of graduates, libraries, and international education. Supplemental information is provided on population trends, attitudes on education comparisons, education characteristics of the labor force, government finances, and economic trends. The digest is divided into seven chapters: "All Levels of Education," "Elementary and Secondary Education," "Postsecondary Education," "Federal Programs for Education and Related Activities, " "Outcomes of Education," "International Comparisons of Education," and "Learning Resources and Technology." The introduction includes a brief overview of current trends in American education. The data show that in the fall of 1997, about 75 million people were involved, directly or indirectly, in providing or receiving formal education. Assessment data indicate that there have been improvements in mathematics and science performance between 1986 and 1996. A higher proportion of high school graduates are going on to college. Yet, wide variations in student proficiency from state to state and mediocre mathematics scores of American students in international assessments pose challenges. The appendix contains a guide to tabular presentation, a guide to sources, definitions, 12 tables, and an index. Thirty-three figures and 422 tables comprise the bulk of the document. (AA)

The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to:

FOREWORD

This 1997 edition of the Digest of Education Statistics is the 33rd in a series of publications initiated in 1962. (The Digest has been issued annually except for combined editions for the years 1977-78, 1983-84, and 1985-86.) Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from kindergarten through graduate school. The Digest includes a selection of data from many sources, both government and private, and draws especially on the results of surveys and activities carried out by the National Center for Education Statistics (NCES). The publication contains information on a variety of subjects in the field of education statistics, including the number of schools and colleges, teachers, enrollments, and graduates, in addition to educational attainment, finances, federal funds for education, employment and income of graduates, libraries, and international education. Supplemental information on population trends, attitudes on education, education characteristics of the labor force, government finances, and economic trends provides background for evaluating education data. Although the Digest contains important information on federal education funding, more detailed information on federal activities is available from federal education program offices. For example. the Office of Bilingual Education and Minority Languages Affairs supports the National Clearinghouse on Bilingual Education, which compiles information on students and teachers involved in bilingual education.

The *Digest* is divided into seven chapters: "All Levels of Education," "Elementary and Secondary Education," "Postsecondary Education," "Federal Programs for Education and Related Activities," "Out-

comes of Education," "International Comparisons of Education," and "Learning Resources and Technology." To qualify for inclusion, material must be nationwide in scope and of current interest and value. The introduction includes a brief overview of current trends in American education, which supplements the tabular materials in chapters 1 through 7. Information on the structure of the statistical tables is contained in the "Guide to Tabular Presentation." The "Guide to Sources" provides a brief synopsis of the surveys used to generate the tabulations for the Digest. Also. a "Definitions" section is included to help readers understand terms. To make analyses more convenient for researchers, many new Digest tables include standard errors. In addition to updating many of the statistics that have appeared in previous years, this edition contains a significant amount of new material. including:

- Findings from the Third International Math and Science Study, the largest comparison of international achievement ever undertaken, tables 395 to 402;
- Percent of students in grades 4, 8, and 12 at various math and science proficiency levels in 1996, tables 119 and 124;
- Percent of public schools and school classrooms with Internet access, table 415.

ACKNOWLEDGMENTS

Many people have contributed in one way or another to the development of the *Digest*. Thomas D. Snyder was responsible for the overall development and preparation of this *Digest* which was prepared under the general direction of Mary Frase.

Charlene M. Hoffman provided technical assistance in all phases of its preparation and was responsible for Chapter 4, "Federal Programs for Education and Related Activities," and for tables on degrees conferred. Claire Geddes developed the text for chapter introductions and was responsible for materials dealing with higher education enrollment, finance. and faculty characteristics. William Sonnenberg provided statistical computing consultation on all phases of the report. Celestine Davis provided statistical assistance on materials dealing with educational attainment and student assessment. Debra Gerald and William Hussar prepared projections of school enrollment and finance statistics.

A number of individuals outside the Center also expended large amounts of time and effort on the *Digest*. Sherrie Aitken, Irma Alemar, Judy Blake, Ismail Iro, Michael Neimat, William Scarbrough, Linda Shafer, and Patricia Thomson of CSR, Inc., provided research and statistical assistance. In the Office of

Information Services, Robert LeGrand provided editorial assistance and Phil Carr designed the cover. Jerry Fairbanks of the U.S. Government Printing Office managed the typesetting.

This year's edition of the Digest has received extensive reviews by individuals within and outside the Department of Education. We wish to thank them for their time and expert advice. In the Office of Educational Research and Improvement (OERI), W. Vance Grant and Duc-Le To reviewed the entire manuscript. Rosemary Clark (U.S. Bureau of the Census) also reviewed the entire document. Ellen Bradburn of the Education Statistics Services Institute reviewed substantial portions of the document. OERI staff who reviewed portions of the manuscript were: Sam Barbett, Jonaki Bose, Patricia Q. Brown, Shelley Burns, Adrienne Chute, Mike Cohen, Marv Frase, Debra Gerald, Steven Gorman, Kerry Gruber, Frank Johnson, Andrew Malizio, Marilyn McMillen, Frank Morgan, Shi-Chang Wu, and Linda Zimbler. Agency reviews were conducted by the Office of Bilingual Education and Minority Languages Affairs, the Office of Vocational Adult Education, Planning and Evaluation Service, and Budget Service.

Figures

1.	The structure of education in the United States	7
2.	Enrollment and total expenditures in current and constant dollars, by level of education: 1960–61 to 1996–97	8
3.	Years of school completed by persons 25 years old and over: 1940 to 1996	9
4.	Years of school completed by persons 25 to 29 years of age: 1940 to 1996	9
5.	Highest level of education attained by persons 25 years and older: March 1996	10
6.	Items most frequently cited by the public as a major problem facing the local public schools: 1980 to 1996	10
7.	Preprimary enrollment of 3- to 5-year-olds, by attendance status: October 1970 to October 1996	46
8.	Enrollment, number of teachers, pupil/teacher ratios, and expenditures in public schools: 1960-61 to 1996-97	47
9.	Percentage change in public elementary and secondary enrollment, by state: Fall 1991 to fall 1996	48
10.	Average annual salary for public elementary and secondary school teachers: 1969–70 to 1996–97	48
11.	Sources of revenue for public elementary and secondary schools: 1970–71 to 1994–95	49
12.	Current expenditure per pupil in average daily attendance in public elementary and secondary schools: 1970–71 to 1996–97	49
13.	Enrollment, degrees conferred, and expenditures in institutions of higher education: 1960–61 to 1996–97	176
14.	Percentage change in total enrollment of institutions of higher education, by state: Fall 1990 to fall 1995	177
15.	Enrollment in institutions of higher education, by age: Fall 1970 to fall 2007	177
16.	Full-time-equivalent students per staff member in public and private institutions of higher education: 1976 and 1993	178
17.	Trends in bachelor's degrees conferred in selected fields of study: 1984–85, 1989–90, and 1994–95	178
18.	Sources of current-fund revenue for public institutions of higher education: 1994-95.	179
19.	Sources of current-fund revenue for private institutions of higher education: 1994–95	179
20.	Federal on-budget funds for education, by agency: Fiscal year 1997	385
21.	Federal on-budget funds for education, by level or other educational purpose: 1965 to 1997	386
22.	Department of Education outlays, by type of recipient: Fiscal year 1997	386
23.	Labor force participation of persons 16 years old and over, by age and highest level of education: 1996	416

24.	Unemployment rates of persons 25 years old and over, by highest degree attained: 1996
25.	Labor force status of 1995–96 high school dropouts and graduates not enrolled in college: October 1996
26.	Median annual income of persons with income 25 years old and over, by highest degree attained and sex: 1995
27.	Salaries of recent bachelor's degree recipients 1 year after graduation, by field: 1987, 1991, and 1994
28.	Percentage change in enrollment, by area of the world and level of education: 1980 to 1994
29.	Public expenditures for education as a percentage of gross national product: Selected countries, 1993
30.	Bachelor's degree recipients as a percent of population for selected countries, by sex: 1994
31.	Nations' average mathematics performance compared to the United States: 1995
32.	Nations' average science performance compared to the United States: 1995
33.	Percent of all public schools having or expecting Internet access between fall 1994 and 2000

40.	Enrollment in public elementary and secondary schools, by level and state: Fall 1981 to fall 1996	5
41.	Enrollment in public elementary and secondary schools, by grade and state: Fall 1995	5
42.	Enrollment in public elementary and secondary schools, by grade and state: Fall 1994	5
43.	Enrollment in public elementary and secondary schools, by grade: Fall 1981 to fall 1995	5
44.	Average daily attendance in public elementary and secondary schools, by state: 1969-70 to 1994-95	5
45.	Enrollment in public elementary and secondary schools, by race or ethnicity and state: Fall 1986 and fall 1995	6
46.	Enrollment of 3-, 4-, and 5-year-old children in preprimary programs, by level and control of program and by attendance status: October 1965 to October 1996	6
47.	Children of prekindergarten through second grade age, by enrollment status, maternal characteristics, and household income: 1991, 1993, and 1995	6
48.	Percent of public school kindergarten teachers indicating the importance of various factors for kindergarten readiness: Spring 1993	62
4 9.	Child care arrangements of preschool children, by age and household characteristics: 1991 and 1995	6:

50.	Participation of public kindergarten children in selected activities 5 days a week, by length and size of class and teacher preparation: Spring 1993
51.	Public school pupils transported at public expense and current expenditures for transportation: 1929–30 to 1994–95
52.	Children 0 to 21 years old served in federally supported programs for the disabled, by type of disability: 1976–77 to 1995–96
53.	Percentage distribution of disabled persons 3 to 21 years old receiving education services for the disabled, by age group and educational environment: 1994–95
54.	State legislation on gifted and talented programs and number and percent of students receiving services in public elementary and secondary schools, by state: 1993–94 and 1995–96
55.	Number of children served under Individuals with Disabilities Education Act and Chapter 1 of the Education Consolidation and Improvement Act, State Operated Programs, by age group and state: 1990–91 to 1995–96
56.	Enrollment in grades 9 to 12 in public and private schools compared with population 14 to 17 years of age: 1889–90 to fall 1996
57.	Enrollment in foreign language courses compared with enrollment in grades 9 to 12 in public secondary schools: Fall 1948 to fall 1994
58.	Student participation in school programs and services, by control, level of school, and type of community: 1993–94
Priva	te Elementary and Secondary Schools
59.	Private elementary and secondary enrollment and schools, by selected characteristics: 1993–94
60.	Private elementary and secondary staff and student-staff ratios, by level and orientation of school: 1993–94
61.	Private elementary and secondary enrollment and schools, by amount of tuition, level, and orientation of school: 1993–94
62.	Summary statistics on Catholic elementary and secondary schools, by level: 1919–20 to 1996–97
63.	Private elementary and secondary schools, enrollment, teachers, and high school graduates, by state: Fall 1993
Teac	hers and Other Instructional Staff
64.	Public and private elementary and secondary teachers and pupil-teacher ratios, by level: Fall 1955 to fall 1997
65.	Public elementary and secondary teachers, by level and state: Fall 1991 to fall 1996
66.	Teachers, enrollment, and pupil-teacher ratios in public elementary and secondary schools, by state: Fall 1990 to fall 1995
67.	Teachers in public and private elementary and secondary schools, by selected characteristics: 1993–94
68.	Highest degree earned and number of years teaching experience for teachers in public elementary and secondary schools, by state: 1993–94

69.	Selected characteristics of public school teachers: Spring 1961 to spring 1996
70.	Public secondary school teachers, by subject taught: Spring 1966 to spring 1996 8
71.	Percent of vocational and nonvocational public school teachers of grades 9 to 12, by selected demographic and educational characteristics: 1993–94
72.	Mobility of public and private elementary and secondary teachers, by selected school and teacher characteristics: 1987–88 to 1993–94
73.	Average salaries for full-time teachers in public and private elementary and secondary schools, by selected characteristics: 1993–94
74.	Public school students' ratings of the quality of teachers and parental and community support for their schools, by school location and students' race/ethnicity (in percent): 1996
75.	Percent of students who give the teachers in their school grades "A" or "B" for their teaching skills, by school location and students' race/ethnicity: 1996
76.	Percent of public school students' interest in a career in education, by student characteristics: 1996
77.	Estimated average annual salary of teachers in public elementary and secondary schools: 1959–60 to 1996–97
78.	Estimated average annual salary of teachers in public elementary and secondary schools, by state: 1969–70 to 1996–97
79.	Minimum and average teacher salaries, by state: 1990–91, 1993–94, and 1995–96 8
80.	Average annual salary of instructional staff in public elementary and secondary schools, by state: 1939–40 to 1996–97
81.	Estimated average annual salary of instructional staff in public elementary and secondary schools and average annual earnings of full-time employees in all industries: 1929–30 to 1996–97
82.	Staff employed in public elementary and secondary school systems, by functional area: 1949–50 to fall 1995
83.	Staff employed in public school systems, by type of assignment and state: Fall 1995
84.	Staff employed in public school systems, by type of assignment and state: Fall 1994
85.	Staff and teachers in public elementary and secondary schools, by state: Fall 1989 to fall 1995
86.	Staff, enrollment, and pupil-staff ratios in public elementary and secondary schools, by state: Fall 1989 to fall 1995
87.	Principals in public and private elementary and secondary schools, by selected characteristics: 1993–94
Scho	ols and School Districts
88.	Public elementary and secondary students, schools, pupil-teacher ratios, and finances, by type of locale: 1995
89.	Public school districts and public and private elementary and secondary schools: 1929–30 to 1995–96

90.	Public school districts and enrollment, by size of district: 1988-89 to 1995-96	96
91.	Number and percentage of public elementary and secondary education agencies, by state and type of agency: 1995–96	97
92.	Selected statistics for public school districts enrolling more than 20,000 pupils, by state: 1995–96	98
93.	Enrollment of the 130 largest public school districts: Fall 1995	103
94.	Public elementary and secondary schools, by type of school: 1967-68 to 1995-96	104
95.	Public elementary and secondary schools, by type and size of school: 1995-96	104
96.	Public elementary and secondary schools, by type and state: 1990-91 to 1995-96	105
97.	Public elementary schools, by grade span and average school size, by state: 1993–94	106
98.	Public secondary schools, by grade span and average school size, by state: 1995–96	107
High	School Seniors, Completions, and Dropouts	
99.	High school graduates compared with population 17 years of age, by sex and control of school: 1869–70 to 1996–97	108
100.	Public high school graduates, by state: 1969-70 to 1996-97	109
101.	High school graduates and dropouts in public elementary and secondary schools, by race or ethnicity and state: 1994–95	110
102.	General Educational Development (GED) credentials issued, and number and age of test takers: United States and outlying areas, 1971 to 1995	111
103.	Percent of high school dropouts among persons 16 to 24 years old, by sex and race/ethnicity: April 1960 to October 1996	111
104.	Percent of high school dropouts among persons 16 to 34 years old, by age, sex, and race/ethnicity: October 1970 to October 1996	112
105.	Students with disabilities exiting the educational system, by age, type of disability, and basis of exit: United States and outlying areas, 1991–92 and 1993–94	113
106.	Postsecondary education and employment status, wages earned, and living arrangements of special education students out of secondary school up to 3 years, by type of disability: 1990	113
Educ	ational Achievement	
107.	Average student proficiency in reading, by age and selected characteristics of students: 1971 to 1996	114
108.	Student proficiency in reading, by percentile and age: 1971 to 1996	115
109.	Student proficiency in reading, by age, amount of time spent on homework, and reading habits: 1984, 1994, and 1996	116
110.	Percent of students at or above selected reading proficiency levels, by sex, race/ethnicity, and age: 1971 to 1996	117
111.	Average proficiency in reading for 4th graders in public schools, by selected characteristics, region, and state: 1994	118

112.	Percentage distribution of 4th graders in public schools, by time spent on homework and television viewing each day: 1992 and 1996
113.	Average writing performance of 4th, 8th, and 11th graders, by selected characteristics of students: 1984 to 1996
114.	Student values and attitudes toward writing, by grade level: 1984, 1990, 1992, and 1994
115.	Percent of students at or above selected history proficiency levels, by selected characteristics and grade level: 1994
116.	Average student proficiency in geography and U.S. history, by student characteristics: 1994
117.	Percent of students at or above selected geography proficiency levels, by selected characteristics and grade level: 1994
118.	Average mathematics proficiency, by age and by selected characteristics of students: 1973 to 1996
119.	Percent of students at or above selected mathematics proficiency levels, by sex, race/ethnicity, control of school, and age: 1978 to 1996
120.	Average proficiency in mathematics content areas for 8th graders in public schools, by region and state: 1996
121.	Average proficiency in mathematics content areas for 4th graders in public schools, by region and state: 1996
122.	Selected characteristics of 8th grade students in public schools, by region and state:
123.	Mathematics proficiency of 17-year-olds, by highest mathematics course taken, sex, and race/ethnicity: 1978, 1990, 1992, 1994, and 1996
124.	Percent of students at or above selected science proficiency levels, by sex, race/ethnicity, control of school, and age: 1977 to 1996
125.	Average proficiency in science for 8th graders in public schools, by selected characteristics and state: 1996
126.	Average science proficiency, by age and by selected characteristics of students: 1970 to 1996
127.	Twelfth graders' achievement on history, mathematics, reading, and science tests:
128.	Scholastic Assessment Test score averages, by race/ethnicity: 1975–76 to 1994–95
129.	Scholastic Assessment Test score averages for college-bound high school seniors, by sex: 1966–67 to 1996–97
130.	Distribution of Scholastic Assessment Test scores, by sex of student: 1975–76 to 1994–95
131.	Scholastic Assessment Test score averages, by intended area of study: 1977–78 to 1994–95
132.	Scholastic Assessment Test score averages, by class rank: 1976-77 to 1994-95

133.	Scholastic Assessment Test score averages, by state: 1974-75 to 1994-95	136
134.	American College Testing (ACT) score averages, by sex: 1967 to 1996	137
135.	Percent of high school seniors reporting they were in general, college preparatory, and vocational programs, by student characteristics: 1982 and 1992	137
136.	Average number of Carnegie units earned by public high school graduates in various subject fields, by student characteristics: 1982 to 1994	138
137.	Average number of Carnegie units earned by public school graduates in vocational education courses, by student characteristics: 1982 to 1994	139
138.	Percentage of high school graduates taking selected, mathematics and science courses in high school, by sex and race/ethnicity: 1982 to 1994	140
139.	Percent of high school graduates earning minimum credits in selected combinations of academic courses, by sex and race/ethnicity: 1982 to 1994	140
Stude	ent Activities and Behavior	
140.	Reasons given by twelfth graders for taking current mathematics and science classes, by selected student and school characteristics: 1992	141
141.	Expected occupations of 8th, 10th, and 12th graders at age 30, by selected student and school characteristics: 1988, 1990, and 1992	141
142.	Eighth, tenth, and twelfth graders' attitudes about school climate, by student and school characteristics: 1988, 1990, and 1992	142
143.	Percentage of 3- to 5-year-olds who were read to every day in the last week by a family member: 1993, 1995, and 1996	142
144.	Participation of 10th and 12th graders in extracurricular activities, by selected student characteristics: 1990 and 1992	143
145.	Percent of high school seniors who plan to go to college after graduation, by student characteristics: 1982 and 1992	143
146.	Percent of high school seniors who say they engage in various activities, by student characteristics: 1982 and 1992	144
147.	Percent of high school seniors who participate in selected school-sponsored extracurricular activities, by student characteristics: 1980 and 1992	144
148.	Percent of high school students in grades 9 through 12 who reported experience with drugs and violence on school property, by race/ethnicity, grade, and sex: 1993 and 1995	145
149.	Percent of 12- to 17-year-olds reporting drug use during the past 30 days and the past year: 1979 to 1995	145
150.	Percent of high school seniors reporting drug use, by type of drug and frequency of use: 1975 to 1996	146
151.	Percent of students (grades 7 to 12) who feel that certain problems are very serious:	146

State Regulations

152.	Ages for compulsory school attendance, special education services for students, policies for kindergarten programs, and year-round schools, by state: 1997 and 1995
153.	Tenth and twelfth graders' attendance patterns, by selected student and school characteristics: 1990 and 1992
154.	Twelfth graders who agree or strongly agree with statements about their school: 1992
155.	State requirements for high school graduation, in Carnegie units: 1993 and 1996
156.	States using minimum-competency testing, by government level setting standards, grade levels assessed, and expected uses of standards: 1995–96
157.	States requiring testing for initial certification of teachers, by authorization, year enacted, year effective, and test used: 1987 and 1990 and 1996
Reve	enues and Expenditures
158.	Revenues for public elementary and secondary schools, by source of funds: 1919–20 to 1994–95
159.	Revenues for public elementary and secondary schools, by source and state: 1994–95
160.	Revenues for public elementary and secondary schools, by source and state: 1993–94
161.	Funds and staff for state education agencies, by source of funding and state: 1992–93
162.	Summary of expenditures for public elementary and secondary education, by purpose: 1919–20 to 1994–95
163.	Total expenditures for public elementary and secondary education, by function and subfunction: 1989–90 to 1994–95
164.	Expenditures for instruction in public elementary and secondary schools, by subfunction and state: 1993–94 and 1994–95
165.	Current expenditures for public elementary and secondary education, by state: 1969–70 to 1996–97
166.	Total expenditures for public elementary and secondary education, by function and state: 1994–95
167.	Total expenditures for public elementary and secondary education, by function and state: 1993–94
168.	Current expenditure per pupil in average daily attendance in public elementary and secondary schools, by state: 1959-60 to 1994-95
169.	Total and current expenditure per pupil in public elementary and secondary schools: 1919–20 to 1996–97
3–A.	Postsecondary Education: College and University Education
Enro	liment
170.	Enrollment and staff in, and degrees conferred by, institutions of higher education

171.	Historical summary of faculty, students, degrees, and finances in institutions of higher education: 1869–70 to 1994–95	181
172.	Total fall enrollment in institutions of higher education, by attendance status, sex of student, and control of institution: 1947 to 1995	182
173.	Total fall enrollment in institutions of higher education, by control and type of institution: 1965 to 1995	183
174.	Total fall enrollment in institutions of higher education, by attendance status, sex, and age: 1970 to 2007	184
175.	Total fall enrollment in institutions of higher education, by level, sex, age, and attendance status of student: 1995	185
176.	Total fall enrollment in institutions of higher education, by type and control of institution, and age and attendance status of student: 1995	186
177.	Total fall enrollment in institutions of higher education, by level of enrollment, sex, attendance status, and type and control of institution: 1994 and 1995	187
178.	Total fall enrollment in institutions of higher education, by type and control of institution, attendance status, and sex of student: 1970 to 1995	188
179.	Fall enrollment and number of institutions of higher education, by affiliation of institution: 1980 to 1995	189
180.	Total fall enrollment in institutions of higher education, by type and control of institution, and attendance status and level of student: 1992 to 1995	191
181.	Total first-time freshmen enrolled in institutions of higher education, by sex of student, attendance status, and type and control of institution: Fall 1955 to fall 1995	192
182.	Total first-time freshmen enrolled in institutions of higher education, by attendance status, sex, control of institution, and state: Fall 1992 to fall 1995	193
183.	College enrollment rates of high school graduates, by race/ethnicity: 1960 to 1996	194
184.	College enrollment rates of high school graduates, by sex: 1960 to 1996	195
185.	Graduation, college preparation, and college application rates of high school students, by selected school characteristics: 1993–94	195
186.	Enrollment rates of 18- to 24-year-olds in institutions of higher education, by race/ethnicity: 1967 to 1996	196
187.	Total undergraduate fall enrollment in institutions of higher education, by sex of student, attendance status, and control of institution: 1969 to 1995	196
188.	Total graduate fall enrollment in institutions of higher education, by attendance status, sex of student, and control of institution: 1969 to 1995	197
189.	Total first-professional fall enrollment in institutions of higher education, by attendance status, sex of student, and control of institution: 1969 to 1995	197
190.	Total fall enrollment in institutions of higher education, by state: 1970 to 1995	198
191.	Total fall enrollment in public institutions of higher education, by state: 1970 to 1995	199

192.	Total fall enrollment in private institutions of higher education, by state: 1970 to 1995	200
193.	Total fall enrollment in all institutions of higher education, by attendance status, sex, and state: 1994 and 1995	201
194.	Total fall enrollment in public institutions of higher education, by attendance status, sex, and state: 1994 and 1995	202
195.	Total fall enrollment in private institutions of higher education, by attendance status, sex, and state: 1994 and 1995	203
196.	Total fall enrollment in institutions of higher education, by control, type of institution, and state: 1994 and 1995	204
197.	Total fall enrollment in institutions of higher education, by level of enrollment and state: 1993 to 1995	205
198.	Total fall enrollment in institutions of higher education, by control, level of enrollment, and state: 1995	206
199.	Total fall enrollment in institutions of higher education, by control, level of enrollment, and state: 1994	207
200.	Full-time-equivalent fall enrollment in institutions of higher education, by control and type of institution: 1969 to 1995	208
201.	Full-time-equivalent fall enrollment in institutions of higher education, by control, type of institution, and state: 1993 to 1995	209
202.	Full-time-equivalent fall enrollment in institutions of higher education, by control and state: 1980 to 1995	210
203.	Residence and migration of all freshmen students in institutions of higher education, by state: Fall 1994	211
204.	Residence and migration of all freshmen students in institutions of higher education graduating from high school in the past 12 months, by state: Fall 1994	212
205.	Residence and migration of all freshmen students in 4-year colleges graduating from high school in the past 12 months, by state: Fall 1994	213
206.	Total fall enrollment in institutions of higher education, by type and control of institution and race/ethnicity of student: 1976 to 1995	214
207.	Total fall enrollment in institutions of higher education, by level of study, sex, and race/ethnicity of student: 1976 to 1995	215
208.	Total fall enrollment in institutions of higher education, by level, attendance status, sex, and race/ethnicity of student: 1994 and 1995	217
209.	Total number of institutions and fall enrollment in institutions of higher education, by percentage minority enrollment: 1995	218
210.	Total fall enrollment in institutions of higher education, by race/ethnicity of student and by state: 1992 to 1995	219
211.	Number and percent of students enrolled in postsecondary institutions, by disability status and selected student characteristics: 1995–96	220
212.	Enrollment of persons 14 to 34 years of age in institutions of higher education, by race/ethnicity, sex, and year of college: October 1965 to October 1996	221

213.	Enrollment in postsecondary education, by major field of study, age, and level of student: 1992–93
214.	Graduate enrollment in science and engineering programs in institutions of higher education, by field of study: United States and outlying areas, fall 1984 to fall 1995
215.	Institutions of higher education and branches, by type, control, and size of enrollment: Fall 1994 and fall 1995
216.	Enrollment of the 120 largest college and university campuses: Fall 1995
217.	Selected statistics for college and university campuses enrolling more than 14,600 students in 1995
218.	Fall enrollment, degrees conferred, and expenditures in historically black colleges and universities, by institution: 1995
219.	Selected statistics on historically black colleges and universities: 1980, 1990, and 1995
220.	Fall enrollment in historically black colleges and universities, by type and control of institution: 1976 to 1995
Staff	
221.	Employees in institutions of higher education, by primary occupation, employment status, and control of institution: Fall 1976, fall 1991, and fall 1993
222.	Employees in institutions of higher education by race/ethnicity, primary occupation, control of institution, sex, and employment status: Fall 1993
223.	Employees in institutions of higher education, by primary occupation, sex, employment status, and by type and control of institution: Fall 1993
224.	Staff and student/staff ratios in institutions of higher education, by type and control of institution and by state: Fall 1993
Facu	lty
225.	Full-time and part-time senior instructional faculty in institutions of higher education, by employment status, control, and type of institution: Fall 1970 to fall 1993
226.	Full-time instructional faculty in institutions of higher education, by race/ethnicity, academic rank, and sex: Fall 1993
227.	Full-time and part-time instructional faculty and staff in institutions of higher education, by selected characteristics and type and control of institution: Fall 1992
228.	Full-time instructional faculty and staff in institutions of higher education, by instruction activities and type and control of institution: Fall 1992
229.	Part-time instructional faculty and staff in institutions of higher education, by instruction activities and type and control of institution: Fall 1992
230.	Full-time and part-time instructional faculty and staff in institutions of higher education, by type and control, academic rank, age, salary, race/ethnicity, and sex: Fall 1992
231.	Full-time and part-time instructional faculty and staff in institutions of higher education, by faculty characterisics and field: Fall 1992

232.	Percentage distribution of full-time and part-time instructional faculty and staff in institutions of higher education, by program area, race/ethnicity, and sex: Fall 1992
233.	Average base salaries of full-time instructional faculty and staff in institutions of higher education, by type and control of institution and by field of instruction: 1987–88 and 1992–93
234.	Average salary of full-time instructional faculty on 9-month contracts in institutions of higher education, by academic rank, sex, and control and type of institution: 1970–71 to 1995–96
235.	Average salary of full-time instructional faculty on 9-month contracts in institutions of higher education, by academic rank, sex, and by type and control of institution: 1980–81, 1990–91, 1994–95, and 1995–96
236.	Average salary of full-time instructional faculty on 9-month contracts in institutions of higher education, by type and control of institution and by state: 1995–96
237.	Average salary of full-time instructional faculty on 9-month contracts in institutions of higher education, by type and control of institution and by state: 1994–95
238.	Average salary of full-time instructional faculty on 9-month contracts in 4-year institutions of higher education, by type and control of institution and rank of faculty and by state: 1995–96
239.	Average salary of full-time instructional faculty on 9-month contracts in 4-year institutions of higher education, by type and control of institution and rank of faculty and by state: 1994–95
240.	Full-time instructional faculty with tenure for institutions reporting tenure status, by academic rank, sex, and type and control of institution: 1980–81, 1990–91, 1994–95, and 1995–96
Instit	utions
241.	Institutions of higher education, by control and type of institution: 1949–50 to 1995–96
242.	Institutions of higher education and branches, by type, control of institution, and state: 1995–96
243.	Institutions of higher education that have closed their doors, by control and type of institution: 1960–61 to 1995–96
Degre	ees
244.	Earned degrees conferred by institutions of higher education, by level of degree and sex of student: 1869–70 to 2006–07
245.	Degrees awarded by institutions of higher education, by control, level of degree, and state: 1994–95
246.	Earned degrees conferred by institutions of higher education, by level of degree and by state: 1993–94 and 1994–95
247.	Associate degrees conferred by institutions of higher education, by sex of student and field of study: 1988–89 to 1992–93
248.	Associate degrees and other subbaccalaureate awards conferred by institutions of higher education, by length of curriculum, sex of student, and field of study: 1994–95

xxii

269.	Master's degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1994–95	299
270.	Master's degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1993-94	300
271.	Doctor's degrees conferred by institutions of higher education, by racial/ethnic group and sex of student: 1976–77 to 1994–95	301
272.	Doctor's degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1994–95	302
273.	Doctor's degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1993–94	303
274.	First-professional degrees conferred by institutions of higher education, by racial/ethnic group and sex of student: 1976–77 to 1994–95	304
275.	First-professional degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1994–95	305
276.	First-professional degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1993–94	305
277.	Earned degrees in agriculture and natural resources conferred by institutions of higher education, by level of degree and sex of student: 1970–71 to 1994–95	306
278.	Earned degrees in architecture and related programs conferred by institutions of higher education, by level of degree and sex of student: 1949–50 to 1994–95	306
279.	Earned degrees in the biological/life sciences conferred by institutions of higher education, by level of degree and sex of student: 1951–52 to 1994–95	307
280.	Earned degrees in biology, microbiology, and zoology conferred by institutions of higher education, by level of degree: 1970–71 to 1994–95	307
281.	Earned degrees in business conferred by institutions of higher education, by level of degree and sex of student: 1955–56 to 1994–95	308
282.	Earned degrees in communications conferred by institutions of higher education, by level of degree and sex of student: 1970–71 to 1994–95	308
283.	Earned degrees in computer and information sciences conferred by institutions of higher education, by level of degree and sex of student: 1970-71 to 1994-95	309
284.	Earned degrees in education conferred by institutions of higher education, by level of degree and sex of student: 1949–50 to 1994–95	309
285.	Earned degrees in engineering conferred by institutions of higher education, by level of degree and sex of student: 1949–50 to 1994–95	310
286.	Earned degrees in chemical, civil, electrical, and mechanical engineering conferred by institutions of higher education, by level of degree: 1970–71 to 1994–95	310
287.	Earned degrees in English language and literature/letters conferred by institutions of higher education, by level of degree and sex of student: 1949–50 to 1994–95	311
288.	Earned degrees in modern foreign languages and literatures conferred by institutions of higher education, by level of degree and sex of student: 1949–50 to 1994–95	311
	to too too managementation and the second seco	انزی

289.	Earned degrees in French, German, and Spanish conferred by institutions of higher education, by level of degree: 1949–50 to 1994–95	312
290.	Earned degrees in the health professions and related sciences conferred by institutions of higher education, by level of degree and sex of student: 1970–71 to 1994–95	312
291.	Earned degrees in mathematics conferred by institutions of higher education, by level of degree and sex of student: 1949–50 to 1994–95	313
292.	Earned degrees in the physical sciences conferred by institutions of higher education, by level of degree and sex of student: 1959–60 to 1994–95	313
293.	Earned degrees in chemistry, geology, and physics conferred by institutions of higher education, by level of degree: 1970–71 to 1994–95	314
294.	Earned degrees in psychology conferred by institutions of higher education, by level of degree and by sex of student: 1949–50 to 1994–95	314
295.	Earned degrees in public administration and services conferred by institutions of higher education, by level of degree and sex of student: 1970–71 to 1994–95	315
296.	Earned degrees in the social sciences and history conferred by institutions of higher education, by level of degree and sex of student: 1970–71 to 1994–95	315
297.	Earned degrees in economics, history, political science and government, and sociology conferred by institutions of higher education, by level of degree: 1949–50 to 1994–95	316
298.	Earned degrees in visual and performing arts conferred by institutions of higher education, by level of degree and sex of student: 1970–71 to 1994–95	316
299.	Statistical profile of persons receiving doctor's degrees, by field of study: 1994-95	317
300.	Statistical profile of persons receiving doctor's degrees in education: 1979–80 to 1994–95	318
301.	Statistical profile of persons receiving doctor's degrees in engineering: 1979–80 to 1994–95	318
302.	Statistical profile of persons receiving doctor's degrees in the humanities: 1979–80 to 1994–95	319
303.	Statistical profile of persons receiving doctor's degrees in the life sciences: 1979–80 to 1994–95	319
304.	Statistical profile of persons receiving doctor's degrees in the physical sciences: 1979–80 to 1994–95	320
305.	Statistical profile of persons receiving doctor's degrees in the social sciences: 1979–80 to 1994–95	320
306.	Doctor's degrees conferred by 60 large institutions of higher education: 1985–86 to 1994–95	321
Outc	romes	
307.	Percentage distribution of 1980 high school sophomores, by highest level of education completed through 1992, by selected student characteristics: 1980 to 1992	322
308.	Mean number of semester credits completed by bachelor's degree recipients, by major and course area: 1972 to 1976 and 1980 to 1984	323

309.	Colleges and universities offering remedial services, by type and control of institution: 1987–88 to 1995–96	323
310.	Percent distribution of enrollment and completion status of first-time postsecondary students starting during the 1989–90 academic year, by degree objective and other student characteristics: 1994	324
311.	Scores on Graduate Record Examination (GRE) and subject matter tests: 1965 to 1996	325
Stud	lent Charges and Student Financial Assistance	
312.	Average undergraduate tuition and fees and room and board rates paid by students in institutions of higher education, by type and control of institution: 1964–65 to 1996–97	326
313.	Average undergraduate tuition and fees and room and board rates paid by students in institutions of higher education, by control of institution and by state: 1995–96 and 1996–97	328
314.	Average graduate and first-professional tuition paid by students in institutions of higher education: 1987–88 to 1996–97	329
315.	Percent of undergraduates receiving aid and average amount awarded in 1995–96 per student, by type and source of aid and selected student characteristics	330
316.	Undergraduates enrolled full-time and part-time, by aid status and source of aid during 1995–96, and control and level of institution	332
317.	Percent of undergraduates receiving aid, by type and source of aid received, and by control and level of institution: 1992-93 and 1995-96	333
318.	Undergraduates enrolled full-time and part-time, by federal aid program and by control and level of institution: 1995–96	334

INTRODUCTION

In the fall of 1997, about 66.3 million persons were enrolled in American schools and colleges (table 1). About 4.0 million were employed as elementary and secondary school teachers and as college faculty. Other professional, administrative, and support staff of educational institutions numbered 4.4 million. Thus about 75 million people were involved, directly or indirectly, in providing or receiving formal education. In a nation with a population of about 268 million, more than 1 out of every 4 persons participated in formal education.

Elementary/Secondary Enrollment

Since the enrollment rates of kindergarten and elementary school age children have not changed much in recent years, increases in elementary school enrollment have been driven primarily by increases in the number of young people. Enrollment in public elementary and secondary schools rose 18 percent between 1985 and 1997. The fastest growth occurred in the elementary grades, where enrollment rose 23 percent over the same period, from 27.0 million to a record high of 33.2 million in 1997 (table 2). Secondary enrollments declined 8 percent from 1985 to 1990, but then rose by 16 percent from 1990 to 1997, for a net increase of 6 percent.

Private school enrollment grew more slowly than public school enrollment over this period, rising 6 percent, from 5.6 million in 1985 to 5.9 million in 1997. As a result, the percentage of students enrolled in private schools declined from 12 percent in 1985 to 11 percent in 1996.

The National Center for Education Statistics (NCES) forecasts record levels of public school enrollment during the late 1990s. The fall 1997 public school enrollment marks a new record and new records are expected every year through the early 2000s (table 3). Between fall 1997 and fall 2007, public elementary enrollment is projected to grow by one half of one percent, while public secondary school enrollment is expected to rise by 13 percent.

Higher Education

College enrollment rose to a record level of 14.5 million in fall 1992 and is expected to increase in 1997, after falling slightly between 1993 and 1996 (table 3). Despite decreases in the traditional collegeage population during the 1980s and early 1990s,

total enrollment has remained relatively high because of the increased participation of older women students and a high rate of college attendance for recent high school graduates (tables 171 and 180). The number of part-time students has generally increased at a faster rate than full-time students (table 169).

Teachers

An estimated 3.1 million elementary and secondary school teachers will be engaged in classroom instruction in the fall of 1997 (table 4). This number has risen in recent years, up about 17 percent since 1987. The number of public school teachers in 1997 will be about 2.7 million and the number in private schools will be about 0.4 million. About 1.9 million teachers are expected to teach in elementary schools, while about 1.2 million will teach at the secondary level (table 4).

The number of public school teachers has risen at a slightly faster rate than the number of students over the past 10 years, resulting in a small decrease in the pupil/teacher ratio. In the fall of 1997, there were 17.3 public school pupils per teacher compared with 17.6 public school pupils per teacher 10 years earlier. During the same time period, the pupil/teacher ratio in private schools fell from 15.5 to 15.0 (table 64). Despite the historical trend towards lower pupil/ teacher ratios, the fluctuations since 1990 suggest stability in the pupil/teacher ratio.

The salaries of public school teachers, which lost purchasing power to inflation during the 1970s, rose faster than the inflation rate in the 1980s. The rising salaries reflect an interest by state and local education agencies in boosting teacher salary schedules and, to some extent, an increase in teachers' experience and education levels (tables 68, 69, and 77). The value of teachers' salaries, after adjustment for inflation, rose one and a half percent between 1986-87 and 1996-97. Since 1990-91, the average salary for teachers actually fell slightly after adjusting for inflation, offsetting increases in the 1980s. The average salary for teachers in 1996-97 was \$38,509 (table 77).

Public Perception

Public perception about problems facing the local

public schools has shifted in the past several years.

Between 1985 and 1990, an increasing proportion of people believed that drug use was a major problem facing schools. Then, the proportion of people who felt drug use was a major problem facing schools fell, from 38 percent in 1990 to 7 percent in 1995, before rising again to 16 percent in 1996. Lack of discipline was cited by 15 percent of the population; fighting, gangs, and violence was cited by 14 percent; and the lack of financial support was cited as a major problem by 13 percent of the population (table 23).

Faculty and Staff

During the fall of 1993, there were 915,000 faculty in higher education institutions. Making up this figure were 546,000 full-time, and 370,000 part-time faculty (table 223). In 1992, full-time instructors generally taught more hours and more students than part-time instructors, with 61 percent of full-time instructors teaching eight or more hours per week and two-thirds teaching 50 or more students. About 30 percent of part-time instructors taught eight or more hours per week and 30 percent taught 50 or more students (tables 228 and 229).

White males constitute a disproportionate share of college instructional faculty and staff. Overall, about 58 percent of full-time faculty and 49 percent of part-time faculty are white males. However, this distribution varies substantially by age of faculty. Among full-time faculty under 30, the balance between male and female faculty is even and 21 percent of the faculty are minorities. Among full-time faculty between 60 and 64 years of age, 79 percent of faculty are males and minorities amount to 12 percent (table 230).

Student Performance

Reading

Overall, the reading achievement scores for the country's 9-, 13- and 17-year-old students are mixed. Reading scores for 9- and 13-year-olds were somewhat higher in 1996 than they were in 1971. However, there has been little change since the mid 1980s. The reading performance of 17-year-olds was about the same in 1996 as it was in 1971. Many of the advancements in performance that had been made in earlier years among black students have not continued or have reversed. Black 13- and 17-yearolds exhibited higher reading performance in 1996 than in 1971. Black 9-year-olds' performance improved significantly between 1971 and 1980, but it has not improved further. The performance levels of white 9- and 13-year olds also rose between 1971 and 1996. Separate data for Hispanics were not gathered in 1971, but changes between 1975 and 1996 indicate an increase among 9-year-olds. There was no significant difference between the 1975 and 1996 reading performance among 13- and 17-year-old Hispanics (table 107).

Mathematics

Results from assessments of mathematics proficiency indicate that 9- and 13-year-old students improved their performance between 1973 and 1996. However, there has been little change for 9-year-olds since 1990, and the performance of older students on advanced mathematical operations has been stable (table 118). The proportion of 17-year-olds who demonstrated skill with moderately complex procedures and reasoning rose from 52 percent in 1978 to 60 percent in 1996. During the same time period, the proportion of 17-year-olds with skill in multi-step problem solving and algebra remained unchanged (table 119).

White, black, and Hispanic students improved their mathematics performance between 1973 and 1996, among all three age groups. In contrast to some of the declines noted in reading since the mid 1980s, mathematics scores for white, black, and Hispanic 9-, 13-, and 17-year-olds improved or remained stable between 1986 and 1996 (table 118).

A 1996 voluntary assessment of the states found that mathematics proficiency varied widely among eighth graders in the 42 jurisdictions (40 states, 1 territory, and the District of Columbia) that participated in the program (table 120). Overall, 62 percent of eighth grade students performed at or above the basic level in mathematics. Only four states and the District of Columbia had fewer than 50 percent of students performing at least at the basic level in math. Ten states had 70 percent or more of their students performing at or above the basic level.

Science

Long-term changes in science performance have been mixed, though changes over the past 10 years have been generally positive. In 1996, science performance among 17-year-olds was lower than in 1970, but higher than in 1986. The science performance level of 13-year-olds was higher in 1996 than in 1986, recouping the earlier declines. The science performance of 9-year-olds increased between 1986 and 1996, after showing no significant change between 1970 and 1986 (table 126).

The science performance of white 9- and 13-year-olds was about the same in 1996 as it was in 1970, and the performance of 17-year-olds was lower in 1996. However, the performance at each of the 3 age groups was higher in 1996 than in 1986. Black and Hispanic 9- and 13-year-olds had higher science performance in 1996 than in the 1970s. Black 17-year-olds showed a pattern consistent with white 13-year-olds with a decline through 1982 and an increase by 1996. Despite significant gains by younger

black and Hispanic students, their average performance remains lower than for white students. Although the performance gap between black and white students has narrowed, the science performance for black 13-year-olds was slightly lower than the average for white 9-year-olds in 1996 (table 126).

International Comparisons

The results of a 1995 international assessment in math and science show that U.S. fourth and eighth graders compare more favorably with other countries in science than in mathematics. In mathematics, U.S. eighth graders scored below the international average, falling below 20 of the 41 countries tested. Fourth graders performed above the international average of 26 countries tested, scoring below 7 countries, including Singapore, Korea, and Japan. U.S. students at both the fourth and eighth grade levels scored above the international average in science. Eighth grade students in the U.S. were outperformed by four out of 41 countries. Fourth grade students once again compared more favorably with their international counterparts than eighth grade students. Only one country outperformed the U.S. students in science out of 26 countries who participated in the fourth grade assessment (tables 395, 397, 401, and 402).

Graduates and Degrees

The number of high school graduates in 1996–97 totaled about 2.6 million. Approximately 2.4 million graduated from public schools and less than 0.3 million graduated from private schools. The number of high school graduates has declined from its peak in 1976–77 when 3.2 million people earned their diplomas. The dropout rate declined over this period, from 14 percent of all 16- to 24-year-olds in 1977 to 11 percent in 1996 (tables 99 and 103).

The number of degrees conferred by institutions of higher education during the 1995–96 school year by degree level has been estimated: 532,000 associate degrees; 1,186,000 bachelor's degrees; 406,000 master's degrees; 79,000 first-professional degrees; and 44,000 doctor's degrees (table 244).

The Bureau of the Census has collected annual statistics on the educational attainment of the population in terms of years of school completed. These data indicate that, between 1980 and 1996, the pro-

portion of the adult population 25 years of age and over with 4 years of high school or more rose from 69 percent to 82 percent and the proportion of adults with at least 4 years of college increased from 17 percent to 24 percent. In contrast, the proportion of young adults (25- to 29-year-olds) completing high school remained virtually unchanged (table 8).

Expenditures

Expenditures for public and private education, from preprimary through graduate school, are estimated at \$564 billion for 1996–97. The expenditures of elementary and secondary schools are expected to total about \$340 billion for 1996–97, while those for institutions of higher education will be about \$225 billion. Viewed in another context, the total expenditures for education are expected to amount to about 7.4 percent of the gross domestic product in 1996–97, about the same percentage as in the recent past (table 31).

Summary

The statistical highlights in this section of the report provide a quantitative description of the current American education scene. Assessment data indicate that there have been improvements in mathematics and science performance between 1986 and 1996. A higher proportion of high school graduates are going on to college. Yet, wide variations in student proficiency from state to state and mediocre mathematics scores of American students in international assessments pose challenges.

NOTE: Readers should be aware of the limitations of statistics. These limitations vary with the exact nature of a particular survey. For example, estimates based on a sample of institutions will differ somewhat from the figures that would have been obtained if a complete census had been taken using the same survey procedures. Although some of the surveys conducted by the National Center for Education Statistics are complete, census-type surveys, all surveys are subject to design, reporting, and processing errors and errors due to nonresponse. More information on survey methodologies can be found in the "Guide to Sources" in the appendix. Price indexes for inflation adjustments can be found in table 38.

CHAPTER 1

All Levels of Education

This chapter provides a broad overview of education in the United States. It brings together material from preprimary, elementary, secondary, and post-secondary education and from the general population to present a composite picture of the American educational system. Tables illustrate the total number of persons enrolled in school, the number of teachers, the number of schools, and total expenditures for education at all levels. This chapter also includes statistics on education-related topics such as educational attainment, family characteristics, population, and opinions about schools. Economic indicators and price indexes have been added to assist researchers in preparing comparative analyses.

Figure 1 shows the structure of education in the United States. It presents the three levels of education (elementary, secondary, and postsecondary) and gives the approximate age range of persons at each level. Pupils ordinarily spend from 6 to 8 years in the elementary grades, which may be preceded by 1 or 2 years in nursery school and kindergarten. The elementary school program is followed by a 4- to 6-year program in secondary school. Pupils normally complete the entire program through grade 12 by age 17 or 18.

High school graduates who decide to continue their education may enter a technical or vocational institution, a 2-year college, or a 4-year college or university. A 2-year college normally offers the first 2 years of a standard 4-year college curriculum and a selection of terminal-vocational programs. Academic courses completed at a 2-year college are usually transferable for credit at a 4-year college or university. A technical or vocational institution offers post-secondary technical training leading to a specific career.

An associate degree requires at least 2 years of college-level work, and a bachelor's degree normally can be earned in 4 years. At least 1 year beyond the bachelor's is necessary for a master's degree, while a doctor's degree usually requires a minimum of 3 or 4 years beyond the bachelor's.

Professional schools differ widely in admission requirements and in program length. Medical students, for example, generally complete a 4-year program of premedical studies at a college or university before they can enter the 4-year program at a medical

school. Law programs normally require 3 years of coursework beyond the bachelor's degree level.

Many of the statistics in this chapter are derived from the statistical activities of the National Center for Education Statistics. In addition, substantial contributions have been drawn from the work of other groups, both government and nongovernment, as shown in the source notes of the appropriate tables. Information on survey methodologies is in the "Guide to Sources" in the appendix and in the publications cited in the source notes.

Enrollment, Teachers, and Schools

Enrollment in elementary and secondary schools grew rapidly during the 1950s and 1960s and reached a peak in 1971 (table 3). This enrollment rise was caused by what is known as the "baby boom," a dramatic increase in births following World War II. From 1971 to 1984, total elementary and secondary school enrollment decreased every year, reflecting the decline in the school-age population over that period. After these years of decline, enrollment in elementary and secondary schools started to rise, hitting an all-time high in fall 1997 (table 3).

Public school enrollment in kindergarten through grade eight rose from 27.9 million in fall 1987 to an estimated 33.2 million in fall 1997. Enrollment in the upper grades declined from 12.1 million in 1987 to 11.3 million in 1990, before showing increases in the early 1990s. The net result of these trends was an overall increase in both the secondary and elementary levels.

The increase from 1987 to 1997 was concentrated in the elementary grades, but this pattern is expected to change. The growing numbers of young pupils that have been filling the elementary schools will cause significant increases at the secondary school level during the next decade. Between fall 1997 and fall 2007, public elementary enrollment is projected to grow by less than 1 percent, while public secondary school enrollment is expected to rise by 13 percent. Public school enrollment is projected to set new records every year until 2006.

The proportion of students in private schools and colleges has changed little over the past 10 years. The percentage of private elementary and secondary students decreased slightly, from 12 percent in 1987

to 11 percent in 1997, and the percentage of college students who attended private colleges and universities remained at 22 percent. In 1997, about 5.9 million students were enrolled in private schools at the elementary and secondary levels and 3.1 million students in institutions of higher education (table 3).

College enrollment fell from 14.5 million in fall 1992 to 14.3 million in fall 1995, and projections indicate that enrollment also dropped slightly in 1996. However, total college enrollment is expected to increase during the remainder of the 1990s, as increasing numbers of high school graduates pursue higher education.

Although school attendance rates among 5- to 17-year-olds have remained relatively steady over the past 10 years, the proportion of 18- and 19-year-olds attending high school or college rose from 55 percent in 1986 to 62 percent in 1996. The proportion of 20-to 24-year-olds enrolled in school rose from 24 percent to 33 percent during the same time period (table 6).

An estimated 3.1 million elementary and secondary school teachers were engaged in classroom instruction in the fall of 1997 (table 4). This number has risen about 17 percent since 1987. The number of public school teachers in 1997 was about 2.7 million and the number in private schools was estimated at 0.4 million. About 1.9 million teachers were teaching in elementary schools, while about 1.2 million were employed at the secondary level (table 4).

Educational Attainment

Americans have become more educated. In 1996, 82 percent of the population 25 years old and over

had completed high school and 24 percent had completed 4 or more years of college. This represents an increase from 1980, when 69 percent had completed high school and 17 percent had 4 years of college (table 8). In 1996, about 5 percent of persons, 25 years old or over, held a master's degree as their highest degree, slightly more than 1 percent held a professional degree (e.g., medicine or law), and 1 percent held a doctor's degree (table 9).

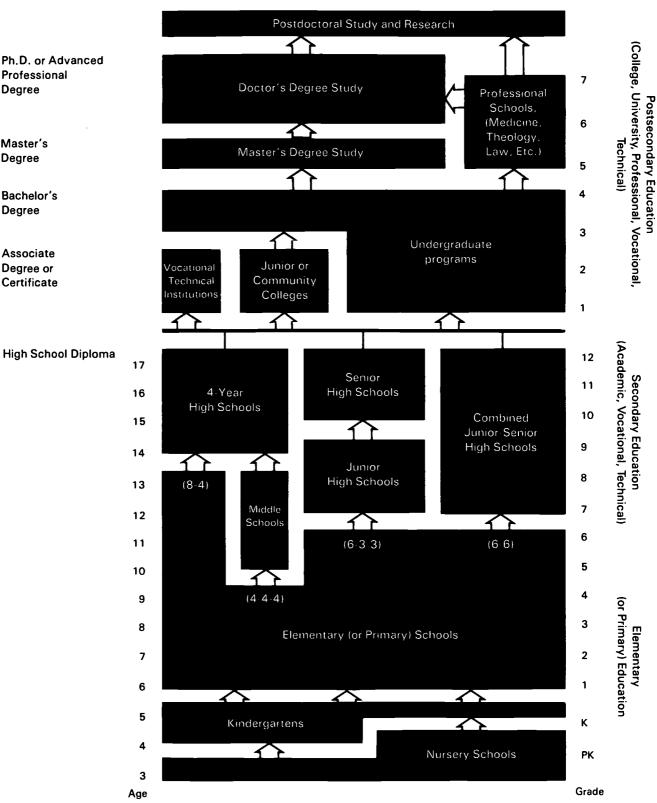

Expenditures

Education expenditures rose to an estimated high of \$564 billion in the 1996–97 school year. Elementary and secondary schools spent about 60 percent of this total, and colleges and universities accounted for the remaining 40 percent (table 31). An estimated 7.4 percent of the gross domestic product was spent by elementary and secondary schools and colleges and universities in 1996–97 (table 30).

The proportion of total state and local government funds spent on education declined during the 1980s, at least partly as a result of the drop in elementary and secondary enrollment in the early part of the decade, and the expansion of other governmental services. During this same time period, the proportion of federal funds spent on education rose (table 34). Of the 1992–93 state and local funds spent on education, about 70 percent went to elementary and secondary schools, 26 percent to colleges and universities, and 4 percent to other education programs (table 35).

¹Beginning in fall 1980, data include estimates for an expanded universe of private schools. Therefore, these totals may differ from figures shown in other tables, and direct comparisons with earlier years should be avoided.

some preprimary students. Higher education enrollment includes students in colleges, universities, professional schools, teachers colleges, and 2-year colleges. Higher education enrollment projections are based on the middle alternative projections published by the National Center for Education Statistics. Some data have been revised from previously published figures. Because of rounding, details may not add to totals.

¹ Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night. Enrollments in "special" schools, such as trade schools, business colleges, or correspondence schools, are not included.

² Data are as of April 1940. Data for all other years are as of October.

³ Preprimary enrollment collected using new procedures. May not be comparable to figures for earlier years.

⁻Data not available.

NOTE.—Data are based upon sample surveys of the civilian noninstitutional population.

SOURCE: U.S. Department of Commerce, Bureau of the Census, Historical Statistics of the United States, Colonial Times to 1970; Current Population Reports, Series P-20, various years; and Current Population Survey, unpublished data. (This table was prepared August 1997.)

¹Civilian noninstitutional population.

NOTE.—Data are based on a sample survey of the noninstitutional population. Although cells with fewer than 75,000 people are subject to relatively wide sampling vari-

ation, they are included in the table to permit various types of aggregations. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Commerce, Bureau of the Census, Current Population Survey, unpublished data. (This table was prepared July 1997.)

⁻Data not applicable or not available.

¹Percents do not add to total because of respondents giving to more than one type of charity.

² Sample size too small for reliable data.

NOTE.—Details for total households do not add to total because details only include households which reported a donation amount for the particular type of charity. The per-

centage of total includes households who reported giving donations, but did not specify amount.

¹ Preliminary.

NOTE.—Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Data for private elementary and secondary schools are estimated. Total expenditures for colleges and universities include current-fund expenditures and additions to plant value. Excludes expenditures of noncollegiate postsecondary institutions. Some data revised from previously published figures. Because of rounding, details may not add to totals.

¹ Estimated.

NOTE.—Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Data for private elementary and secondary schools are estimated. Total expenditures for colleges and universities include current-fund expenditures and additions to plant value. Excludes expenditures of noncollegiate postsecondary institutions. Some data have been revised from previously published figures. Because of rounding, details may not add to totals.

¹ Revised from previously published data.

NOTE.—Estimated distribution of expenditures by source of funds are obtained from distribution of revenue sources for current funds. Federally-supported student aid that goes to higher education institutions through students' tuition payments is shown under "All other" rather than "federal." Such payments would add substantial amounts and

several percentage points to the federal share. Other federal programs, not included in this table because they do not support regular educational institutions, would increase the federal share even further. Typical examples of these payments would be federal support for libraries and museums. Additionally, the federal contribution to education through tax expenditures is not reflected in this table. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data; Higher Education General Information Survey (HEGIS), "Financial Statistics of Institutions of Higher Education" survey; Integrated Postsecondary Education Data System (IPEDS) "Finance" survey, unpublished data. (This table was prepared July 1997.)

² Preliminary data.

³ Revenues from individuals including fees for transportation and books and food service receipts. This expenditure includes only the individual contributions for these categories and excludes contributions from public sources.

⁴ Some private elementary and secondary school revenues come from federal, state, and local sources. However, comprehensive data are not available to delineate the sources of revenues for private schools.

88

¹ Excludes duplicative intergovenmental transactions.

² General expenditures include monies paid by states to the federal government (\$3,626,834 in 1992–93), which are excluded from direct general expenditures.

³ Includes judicial and legal expenditures and expenditures on general and public buildings and other governmental administration.

¹ Includes state and local government expenditures for education services, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other general expenditures. Includes intergovernmental expenditure to the federal government.

² Includes outlays for "other education."

³ Includes assistance and subsidies to individuals and private institutions for elementary, secondary, and higher education, as well as miscellaneous education expenditures.

⁻Not applicable.

NOTE.—Current expenditure data in this table differ from figures appearing in other tables because of slightly varying definitions used in the *Governmental Finances* and Common Core of Data surveys. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Commerce, Bureau of the Census, unpublished data. (This table was prepared May 1997.)

¹ Data for years prior to 1963 include expenditures for government fiscal years ending during that particular calendar year. Data for 1963 and later years are the aggregations of expenditures for government fiscal years which ended on June 30 of the stated year. General expenditures exclude expenditures of publicly owned utilities and liquor stores, and of insurance-trust activities. Intergovernmental payments between state and local governments are excluded. Payments to the federal government are included.

-Gross domestic product data are adjusted by the GDP chained weight price deflator. Personal income data are adjusted by the personal consumption deflator. Some data have been revised from previously published figures.

¹ Index for urban wage earners and clerical workers through 1977; 1978 and later figures are for all urban consumers.

NOTE.—Some data have been revised from previously published figures.

SOURCE: Council of Economic Advisers, Economic Indicators, February 1991 and April 1997, and Economic Report of the President, February 1996; U.S. Department of Labor, Bureau of Labor Statistics, Consumer Price Index; Research Associates of Washington, "Inflation Measures for Schools and Colleges, 1990 Update," and unpublished data; and U.S. Office of Management and Budget, Budget of the U.S. Government, Fiscal Year 1997. (This table was prepared June 1997.)

² Consumer Price Index adjusted to a school-year basis (July through June).

CHAPTER 2

Elementary and Secondary Education

This chapter contains a variety of statistics on public and private elementary and secondary education. Data are presented for enrollments, teachers, schools, student performance, graduates, and expenditures. These data are derived from surveys conducted by the National Center for Education Statistics (NCES) and other public and private organizations. The variety of information provided ranges from simple counts of students and schools, to opinions of teachers and students concerning the state of education today.

Enrollments

Combined public elementary and secondary school enrollments increased by 14 percent from 1986 to 1996, but examined separately, enrollment at the elementary and secondary levels exhibited different patterns. Between 1986 and 1996, public elementary enrollment rose by 20 percent, while secondary enrollment increased by 4 percent. Secondary enrollment declined in most years during this period (tables 3 and 40).

Preprimary education enrollment has grown substantially. Between 1986 and 1996, preprimary enrollment of 3- to 5-year-olds rose by 27 percent. An important feature of the increasing participation of young children in preprimary schools is the increasing proportion in full-day programs. In 1996 about 47 percent of the children attended school all day compared with 38 percent in 1986 (table 46).

Slightly increasing numbers and proportions of children are being served in programs for the disabled. During the 1980–81 school year, 10 percent of students were served in these programs compared with 12 percent in 1995–96. Much of the rise since 1980–81 may be attributed to the increasing proportion of children identified as learning disabled, which rose from 4 percent of enrollment in 1980–81 to 6 percent of enrollment in 1995–96 (table 52).

Tuition at Private Schools

The average full tuition (highest tuition charged) for private schools was \$3,116 in 1993–94. Schools with religious orientation charged significantly lower tuition than nonsectarian schools. Students at Catholic schools paid \$2,178 on average and students at

schools with other religious orientations paid \$2,915 on average, compared with the average tuition of \$6,631 for nonsectarian private schools. Mean tuition paid for private elementary school students was lower than that paid by secondary and combined elementary/secondary schools' students, with Catholic school students paying \$1,628. Students at elementary schools with other religious orientations paid \$2,606, and students at nonsectarian schools paid \$4,693. Mean tuition paid for private secondary school students was substantially higher than that for private elementary school students, averaging \$3,643 at Catholic schools, \$5,261 at other religiously oriented schools, and \$9,525 at nonsectarian schools (table 61).

Teachers and Other School Staff

During the 1970s and early 1980s, public school enrollment decreased, while the number of teachers rose. As a result, the pupil/teacher ratio fell from 22.3 in 1970 to 17.9 in 1985. After 1985, the number of pupils per teacher continued downward, reaching 17.2 in 1990. Between 1990 and 1997, enrollment rose at about the same rate as the number of teachers, and the pupil-teacher ratio was estimated at 17.3 in fall 1997 (table 64).

In 1993–94, 73 percent of public school teachers were women, 33 percent were under 40, and more than 47 percent had a master's degree or above. By comparison, about 75 percent of the 378,000 full-time and part-time private school teachers were women. About 42 percent of the private school teachers were under age 40, and 34 percent had a master's or higher degree (table 67).

Principals tended to be older and have higher level credentials than teachers. Also, they were more likely to be male. About 7 percent of public school principals in 1993–94 were under age 40 and 99 percent had a master's degree or above. About 35 percent of the principals were women (table 87).

In general, public school teachers have higher salaries than private school teachers. In 1993–94, the average base salary for public school teachers was \$34,153, compared with \$21,968 for private school teachers (table 73). The average salary for public school teachers grew slowly during the 1990s, reaching \$38,509 in 1996–97. After adjustment for infla-

74

tion, teachers' salaries rose 1.5 percent between 1986-87 and 1996-97 (table 77).

The number of nonteaching staff employed by public schools grew at a faster rate than the number of pupils and teachers in the 1970s. During the 1970s, the proportion of the total staff who were teachers declined from 60 percent to 52 percent in fall 1980. In the 1980s and early 1990s, the number of teachers grew at about the same rate as other public school staff. In 1980, there were 9.8 pupils per staff member (total staff) compared with 9.0 pupils per staff member in 1995. In 1993–94, the number of pupils per staff member at private schools was 9.3 (tables 60 and 82).

Schools

Over the past decades, the trend to consolidate small schools has brought a large decline in the total number of public schools in the United States. In 1930, there were more than 262,000 public schools, compared with around 87,000 today. But this number has grown in recent years, with an increase of more than 2,600 schools between 1992–93 and 1995–96 (table 89).

The shift in structure of public school systems toward middle schools (grades 4, 5, or 6 to 6, 7, or 8) is continuing. The number of elementary schools rose by 7 percent to 61,000 between 1984–85 and 1995–96, but middle schools accounted for a disproportionate share of this increase, rising by 48 percent. Meanwhile, the number of junior high schools (grades 7 to 8 and 7 to 9) declined by 37 percent (table 94).

Elementary enrollment has risen faster than the number of schools, with the average elementary school size increasing as a result. Schools tend to be smaller in predominantly rural states, such as Nebraska, South Dakota, Montana, and North Dakota, and larger in states with large urban populations, such as California, Hawaii, Georgia, and Florida (tables 94, 96, 97, and 98).

Completions and Achievement

The dropout rate among 16- to 24-year-olds (which counts GED recipients and special program completers as graduates) suggests some improvements have been made over the past quarter century. Between 1968 and 1990, the dropout rate for 16- to 24-year-olds fell from 16.2 percent to 12.1 percent. The dropout rate for 1996 was 11.1, which is slightly lower than the 1990 figure. The dropout rate statistic is based on the civilian noninstitutionalized population, which excludes persons in prisons and persons not living in households (table 103). Comparisons of the number of public and private high school graduates with the 17-year-old population

suggest that the proportion of young people earning regular high school diplomas has not increased over the past 20 years. At its highest point in 1968–69, there were 77 graduates for every 100 persons 17 years of age. This ratio declined during the 1970s, falling to 71 in 1979–80. The ratio has fluctuated since then, reaching 70 in 1996–97. This indicator is not a graduation rate, however, because many students complete their high school education through alternative programs, such as night schools and the General Educational Development (GED) program (table 99).

Student achievement has improved in a number of areas. An overall increase was seen in reading proficiency scores for 9- and 13-year-olds since 1971, with 17-year-olds scoring about the same in 1996 as in 1971. After significant gains during the 1970s, 9-year-old reading proficiency fell during the 1980s, but the 1996 score remained above the 1971 level. The increase in reading ability was reflected by higher average proficiencies in other subjects for 9- and 13-year-old students. Significant gaps in performance continue to exist between racial/ethnic subgroups and between male and female students. Gender gaps favoring female students in reading were essentially the same in 1996 as in the 1971 (table 107).

The results of assessments in average writing achievement from 1984 to 1996 reveal a shift at grades 4 and 8. After declining between 1984 and 1990, average performance at grade 8 increased, and by 1996 had again returned to the earlier level. Also, at grade 4 there was an increase in performance between 1990 and 1996, countering downward fluctuations in the 1980s, so that performance was essentially unchanged between 1984 and 1996. Overall grade 11 writing performance declined between 1984 and 1996 (table 113).

Results from national assessments of mathematics achievement indicated a significant improvement at ages 9 and 13, between 1973 and 1996. Performance of 17-year-olds declined between 1973 and 1982, but an upturn during the following decade returned average performance back up to 1973 levels. For 9-, 13-, and 17-year-olds, there were increases in average mathematics proficiency between 1986 and 1996, including increases among black and Hispanic 9- and 17-year-olds. Gender gaps in mathematics among 17-year-olds narrowed between 1973 and 1996. However, the gap among 9- and 13-year-olds favoring females in 1973 reversed, and in 1996 the gap favored males (table 118).

Average science proficiency increased for 9-, 13-, and 17-year-old black students between 1970 and 1996. Although the average science proficiency of white students at all three age groups (ages 9, 13, and 17) remained significantly higher than the average proficiencies of black and Hispanic students,

ERIC

there was some evidence of gaps narrowing between 1970 and 1996. The performance gap between white and black students decreased for 9-year-olds and 13-year-olds between 1970 and 1996, but the gaps for 17-year-olds remained about the same. The performance gaps between white and Hispanic 9- and 17-year-olds remained about the same in 1996 as they were in 1977 (table 126). Gender gaps favoring 9-year-old and 13-year-old males in science did not narrow significantly between 1970 and 1996, but there was a narrowing of the gap between 17-year-old males and females (table 126).

The Scholastic Assessment Test (SAT, formerly known as the Scholastic Aptitude Test) was not designed as an indicator of student achievement, but rather to help predict how well students will do in college. Between 1986–87 and 1996–97, mathematics SAT scores increased by 10 points, while verbal scores fell by 2 points (table 129).

Over the past 12 years, the average number of science and mathematics courses completed by public high school graduates increased substantially. The mean number of mathematics courses (Carnegie units) completed in high school rose from 2.6 in 1982 to 3.4 in 1994, and the number of science courses rose from 2.2 to 3.0. The average number of courses in vocational-technical areas completed by all high school graduates dropped gradually, from 4.7 units in 1982 to 3.9 units in 1994. As a result of the increased academic course load, the proportion of students completing the recommendations of the National Commission on Excellence (4 units of English, 3 units of social studies, 3 units of science, 3 units of mathematics, and .5 units of computer science) rose from 3 percent in 1982 to 32 percent in 1994 (tables 133, 136, and 139).

Drugs and Violence

Twelfth-grade students at public schools were less likely to feel safe at school and were more likely to

report fights between racial/ethnic groups and gangs at school than students at Catholic and other private schools. About 10 percent of all 1992 high school seniors reported that they did not feel safe at school and 23 percent reported that there were often fights between different racial/ethnic groups (table 142). The proportion of public and private high school seniors who reported ever using an illicit drug rose from 55 percent in 1975 to 66 percent in 1981. After 1981, the proportion of seniors who had ever used drugs fell. After reaching 41 percent in 1992, the proportion rose again to 51 percent in 1996. Also, the proportion of high school seniors who had ever used cocaine fell from 17 percent in 1985 to 7 percent in 1996. Alcohol remained the most often used drug. The proportion of seniors who had used alcohol within the previous 30 days declined from 72 percent in 1980 to 51 percent in 1996 (table 150).

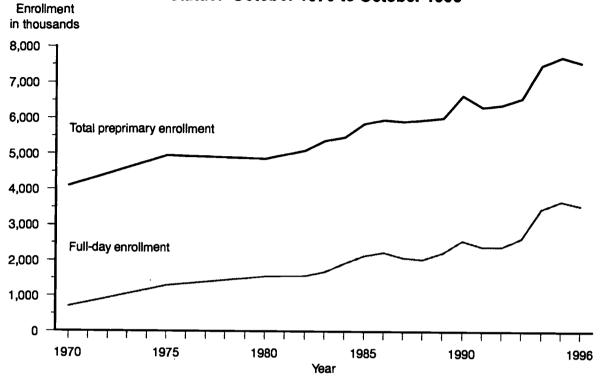

Resources and Expenditures

The state share of revenues for public elementary and secondary schools had grown steadily for many decades, but this trend began to reverse in the late 1980s. Between 1986–87 and 1994–95, the state share declined from 49.7 percent of all revenues to 46.8 percent, while the local share rose from 43.9 percent to 46.4 percent. The federal share also rose slightly over this period, from 6.4 percent to 6.8 percent (table 158).

The expenditure per student in public schools rose significantly during the late 1980s, but increased more slowly during the first part of the 1990s. Between 1985–86 and 1990–91, current expenditures per student in average daily attendance grew 14 percent, after adjustment for inflation. From 1990–91 to 1996–97, expenditures per student grew by 5 percent. In 1996–97, the estimated current expenditure per student in average daily attendance was \$6,564 (table 169).

¹Data on population and labor force are from the Bureau of the Census, and data on personal income and national income are are from the Bureau of Analysis, U.S. Department of Commence. Population data through 1900 are based on total population from the decemital census. From 1999-10 to 1959-60, population data are total population including armed forces overseas, as of July 1. Data for later years are for resident population that excludes armed forces overseas

² Data for 1869–70 through 1959–60 are school year enrollment. Data for later years are fall enrollment. ³ Data for 1870–71.

Estimated by the National Center for Education Statistics.
 Prior to 1919-20, data are for the number of different persons employed rather than number of positions.
 Prior to 1919-20, includes interest on school edat.
 Recause of the modification of the scope of "current expenditures for elementary and secondary schools," data of 1919-20, includes repress are not entirely comparable with prior years.
 Regimining in 1969-70, includes capital outlay by state and local school building authorities.
 Includes summer schools, community colleges, and adult education. Beginning in 1959-60, also includes community schools with "current expenditures for elementary and secondary schools."
 Includes community colleges and adult education.
 Recludes community colleges and adult education.
 Recludes community colleges and adult education.

12 Estimated by the National Education Association.

19 Excludes current expenditures not allocable to pupil costs.
14 "A.D.A." means average daily attendance in elementary and secondary schools.
15 The expenditure figure used here is the sum of current expenditures allocable to pupil costs, capital outlay, and interest on school debt.

16 Per-day rates derived by dividing annual rates by average length of term.

—Data not collected.

NOTE.—Kindergarien enrollment includes a relatively small number of nursery school pupils. Because of rounding, details may not add to totals. Some data have been revised from previously published figures. Beginning in 1959-60, data include Alaska and Hawaii. SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems; Statistics of Public Elementary and Sacondary School Systems; Revenues and Expenditures for Public Elementary and Sacondary Education, FY 1980; Common Core of Data surveys; and Council of Economic Advisers, Economic Report of the President (This table was prepared July 1997.)

¹ Data estimated by state education agencies.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data surveys. (This table was prepared April 1997.)

² Includes a relatively small number of prekindergarten students.

³ Beginning in 1983, data include students enrolled in public schools on federal bases and other special arrangements.

⁴ Data estimated by the National Center for Education Statistics.

⁵ Beginning in 1986, data include state vocational/technical schools.

⁶ Actual data.

⁻Data not available.

NOTE.—Some data have been revised from previously published figures.

Table 41.—Enrollment in public elementary and secondary schools, by grade and state: Fall 1995

NOTE.—Because of changes in reporting practices and imputation of data for nonrespondents in later years, data for prekindergarten enrollment are not comparable over time. Some data have been revised from previously published figures. Because of rounding, details may not add to totals.

¹ Includes students served under Chapter I and Individuals with Disabilities Education Act (IDEA), formerly the Education of the Handicapped Act.

NOTE.—Counts are based on reports from the 50 states and District of Columbia only (i.e., figures from U.S. territories are not included). Increases since 1987-88 are due in part to new legislation enacted fall 1986, which mandates public school special education services for all handicapped children ages 3 through 5. Some data have been revised from previously published figures. Because of rounding, details may not add to

SOURCE: U.S. Department of Education, Office of Special Education and Rehabilitative Services, Annual Report to Congress on the Implementation of The Individuals with Disabilities Education Act, various years, and unpublished tabulations; and National Center for Education Statistics, Common Core of Data survey. (This table was prepared May 1997.)

² Includes preschool children 3-5 years and 0-5 years served under Chapter I and IDEA, respectively.

³ Prior to 1987–88, these students were included in the counts by handicapping condi-

tion. Beginning in 1987-88, states were no longer required to report preschool handicapped students (0-5 years) by handicapping condition.

4 Less than .05 percent.

⁵ Based on the enrollment in public schools, kindergarten through 12th grade, including a relatively small number of prekindergarten students.

⁶ Less than .005 percent.

⁻Data not available.

Table 53.—Percentage distribution of disabled persons 3 to 21 years old receiving education services for the disabled, by age group and educational environment: 1994-95

¹ Includes a relatively small number of secondary ungraded and postgraduate students.

² Data for most years are partly estimated.

NOTE.—Includes enrollment in public schools that are a part of state and local school systems and also in most private schools, both religiously affiliated and nonsectarian. Excludes enrollment in subcollegiate departments of institutions of higher education, residential schools for exceptional children, and federal schools. Because of rounding, details may not add to totals. Some data have been revised from previously published fig-

³ Data for 1890 through 1950 and for 1960 are from the decennial censuses of population. The other figures are Bureau of the Census estimates as of July 1 preceding the opening of the school year.

4 Gross enrollment ratio based on school enrollment of all ages in grades 9 to 12 di-

vided by the 14- to 17-year-old population. Differs from enrollment rates in other tables which are based on the enrollment of persons in the given age group only.

5 Data are for 1927–28.

⁶ Data are for 1940-41.

⁷ Estimated.

¹ Estimated.

-Data not reported, not available, or not applicable.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data survey; and American Council on the Teaching of Foreign Languages, Foreign Language Enrollments in Public Secondary Schools, Fall 1989, Fall 1990, and Fall 1994. (This table was prepared April 1997.)

² Includes enrollment in ancient Greek (not shown separately). Fewer than 1,000 students were enrolled in this language in each of the years shown.

³Less than 0.05 percent.

⁴Until 1990, student enrollment in Japanese courses was included in the Other mod-

ern foreign languages category.

⁵ Includes students enrolled in unspecified modern foreign languages. In 1978, a relatively large number of students were not identified by field of study. Since 1990, enrollment in Japanese courses is reported as a separate category.

¹ Includes part-time teachers.

NOTE.—Data reported by the National Catholic Educational Association and data reby the National Center for Education Statistics are not directly comparable beurvey procedures and definitions differ. Excludes prekindergarten enrollment. SOURCE: National Catholic Educational Association, A Statistical Report on Catholic Elementary and Secondary Schools for the Years 1967–68 to 1969–70, as compiled from the Official Catholic Directory (Copyright © 1970 by the National Catholic Educational Association); Catholic Schools in America (1978 edition, Copyright © 1978 by the Franklin Press); and United States Catholic Elementary and Secondary Schools, 1989–90, 1990–91, 1991–92, 1992–93, 1993–94, 1994–95, 1995–96, and 1996–97 (Copyright © 1990, 1991, 1992, 1993, 1994, 1995, 1996, and 1997 by the National Catholic Educational Association. All rights reserved.) (This table was prepared July 1997.)

above.

2 Tuition weighted by the number of students enrolled in schools.

³Too few sample cases (fewer than 30 schools) for reliable estimates.

⁻Data not applicable.

² Includes estimates for the nonreporting schools.

³ Full-time equivalent.

⁴ Revised from previously published figures.

Includes special education, vocational/technical education, and alternative schools.
 Excludes prekindergarten enrollment.
 ²The National Center for Education Statistics employed an area frame sample to ac-

count for noninclusion of schools at the national level. However, caution should be exercised in interpreting state by state characteristics since the samples were not designed to produce such numbers.

⁻Insufficient data to compute a standard error.

NOTE.—Tabulation includes only schools that offer first grade or above.

SOURCE: U.S. Department of Education, National Center for Education Statistics, "Private School Survey, 1993–94." (This table was prepared August 1995.)

¹ Estimated.

NOTE.—Data for teachers are expressed in full-time equivalents. Distribution of unteachers by level is estimated. Distribution of elementary and secondary school by level is determined by reporting units. Kindergarten includes a relatively small number of nursery school teachers and students. Some data have been revised from previously published figures. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of Public Elementary and Secondary Day Schools; Common Core of Data surveys; and Projections of Education Statistics to 2007. (This table was prepared June 1997.)

² Preliminary data.

³ Projected.

Table 65.—Public elementary and secondary teachers, by level and state: Fall 1991 to fall 1996

NOTE.—Distribution of elementary and secondary teachers determined by reporting units. Teachers reported in full-time equivalents.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data surveys. (This table was prepared April 1997.)

¹ Data have been revised from previously published figures.

² Data estimated by state education agencies.

³ Data imputed by the National Center for Education Statistics based on previous year's data.

*Actual preliminary count by state.

—Data not available, not reported, or not applicable.

Table 66.—Teachers, enrollment, and pupil-teacher ratios in public elementary and secondary schools, by state: Fall 1990 to fall 1995

¹ Based on the Consumer Price Index prepared by the Bureau of Labor Statistics, U.S. Department of Labor, Price index does not account for different rates of change in the cost of living among states.

2 Preliminary or state estimate.

3 Estimated by the American Federation of Teachers. See NOTE.

4 Excludes state-paid health insurance.

Reflects the redefinition of classroom teacher.
 Preliminary or state estimate. Includes pay for extra duties.
 Estimated to exclude fringe benefits.

⁸ Includes 6 percent pension pick-up in Oregon and 9.5 percent in Nevada.

⁹ Median salary.

¹⁰ Including incentive pay or career ladder stipends and revision of classroom teacher definition.

NOTE.—Data in this table reflect results of surveys conducted by the American Federation of Teachers. Because of differing survey and estimation methods, these data are not entirely comparable with figures appearing in other tables.

SOURCE: American Federation of Teachers, Survey and Analysis of Salary Trends, various years. (This table was prepared April 1997.)

¹ Includes supervisors, principals, classroom teachers, and other instructional staff.

NOTE.—Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems; National Education Association, Estimates of School Statistics; (Latest edition 1996-97. Copyright @ 1997 by the National Education Association. All rights reserved.) and unpublished data. (This table was prepared August 1997.)

Based on the Consumer Price Index prepared by the Bureau of Labor Statistics, U.S.

Department of Labor. Price index does not account for different rates of change in the cost of living among states.

3 Estimated by National Education Association.

⁴ Excludes kindergarten teachers. ⁵ Includes administrators.

⁶ Includes clerical assistants to instructional personnel.

⁷ Includes attendance personnel

⁶ Excludes vocational schools not operated as part of the regular public school system.

⁹ Median salary.

⁻Data not available.

Table 81.—Estimated average annual salary of instructional staff 1 in public elementary and secondary schools and average annual earnings of full-time employees in all industries: 1929-30 to 1996-97

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data survey; and unpublished estimates. (This table was prepared April 1997.)

Some data have been revised from previously published figures.
 U.S. totals include imputations for underreporting and nonreporting states.
 Includes imputations for underreporting.
 Support staff underreported.
 Data estimated by the National Center for Education Statistics.

¹ Total differs from data appearing in other tables because of varying survey processing procedures and time period coverages.

² Percentages for those with less than a bachelor's degree are not shown.

³ Excludes principals reporting a salary of \$0. About 7.4 percent of private school principals had \$0 salary. If these principals are included in the average annual salary calculations, the average for all private school principals is \$29,714.

⁴ Too few cases for reliable estimate.

NOTE.—Details may not add to 100.0 percent because of rounding and survey item nonresponse. Data revised from previously published figures.

¹Central city of metropolitan statistical area (MSA) with population of 400,000 or more or a population density of 6,000 or more persons per square mile.

² Central city of an MSA but not designated as a large central city.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data survey; and U.S. Department of Commerce, Bureau of the Census, Survey of Local Government Finances, unpublished data. (This table was prepared October 1997.)

³ Place within the MSA of a large central city.

⁴ Place within the MSA of a mid-size central city.

⁵ Place not within an MSA but with population of 25,000 or more and defined as urban.

⁶ Place not within an MSA with a population of at least 2,500 but less than 25,000.

⁷ Place with a population of less than 2,500.

⁸ Average for schools reporting enrollment.

⁹ Ratio for schools reporting both FTE teachers and fall enrollment data.

¹⁰ Property tax and parent government contributions are determined on the basis of independence or dependence of the local school system and are mutually exclusive.

NOTE.—Locale classification procedures not comparable with previous years. Enrollments by locale were used to distribute school district revenue and expenditure amounts by locale classification.

¹ Includes school districts reporting enrollment of 0.

² Schools with both elementary and secondary programs are included under elementary schools and also under secondary schools.

³ Data for most years are partly estimated.

⁴ Includes regular schools and special schools not classified by grade span.

⁵ Includes elementary, secondary, and combined elementary/secondary schools.

 $^{^{\}rm 6}\text{These}$ data are from sample surveys and should not be compared directly with the data for earlier years.

 $^{^{7}\,\}mbox{Because}$ of expanded survey coverage, data are not directly comparable with figures for earlier years.

⁻Data not available.

[—]Data not reported.

Data exclude teachers reported as working in school district offices rather than in schools.

² Includes all categories of high school completers such as GEDs.
³ Expenditures by local school districts only. Excludes expenditures by state education agencies for local school dis-

⁴Current expenditure per pupil based on fall enrollment collected by the Bureau of the Census, not the enrollment figure shown in column 3.
⁵ Includes estimates of teachers for nonreporting school districts.

High school graduate figure for 1993-94.
 ISD=Independent school district.
 —Data not available or not applicable.
 NOTE.—Data on finances and per pupil expenditures prepared by the Bureau of the Census.

¹ Excludes vocational, special education, and alternative schools.

NOTE.—Includes schools with no grade lower than 7. Excludes schools not reported by grade level, such as some special education schools for the disabled.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data survey. (This table was prepared September 1997.)

² Vocational schools are included under appropriate grade span.

³ Average for schools reporting enrollment data.

Table 99.—High school graduates compared with population 17 years of age, by sex and control of school: 1869-70 to 1996-97

¹ Derived from Current Population Reports, Series P-25. 17-year-old population ad-

⁻Data not available.

NOTE.-Includes graduates of regular day school programs. Excludes graduates of other programs, when separately reported, and recipients of high school equivalency certificates. Some data have been revised from previously published figures. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of Public High Schools; Biennial Survey of Education in the United States; Statistics of State School Systems; Statistics of Nonpublic Elementary and Secondary Schools; Common Core of Data surveys; and U.S. Department of Commerce, Bureau of the Census, Current Population Reports, Series P-25. (This table was prepared April 1997.)

justed to reflect October 17-year-old population.

2 Includes graduates of public and private schools.

3 Data for 1929–30 and preceding years are from Statistics of Public High Schools and

exclude graduates of high schools which failed to report to the Office of Education.

4For most years, private school data have been estimated based on periodic private school surveys. For years through 1957–58, private includes data for subcollegiate departments of institutions of higher education and residential schools for exceptional children.

⁵ Public high school graduates based on state estimates.

¹ Revised from previously published data.

NOTE.—Data include graduates of regular day school programs, but exclude graduates of other programs and persons receiving high school equivalency certificates. They also exclude graduates of subcollegiate departments of institutions of higher education, federal schools for American Indians and on federal installations, and residential schools for disabled children. Some data have been revised from previously published figures. All 1995–96 and 1996–97 data are state estimates unless otherwise indicated.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data surveys. (This table was prepared April 1997.)

² National total includes estimates for nonreporting states.

³ Actual count.

⁴ Data imputed by the National Center for Education Statistics based on previous year's data.

⁵ Beginning in 1985-86, graduates from adult programs are excluded.

⁶ Data are for 1970-71.

⁻Data not reported.

^{1 &}quot;Status" dropouts.

NOTE.—"Status" dropouts are persons who are not enrolled in school and who are not high school graduates. People who have received GED credentials are counted as graduates. Data are based upon sample surveys of the civilian noninstitutional population.

SOURCE: U.S. Department of Commerce, Bureau of the Census, Current Population Survey, unpublished data. (This table was prepared September 1997.)

² Includes persons of Hispanic origin.

Includes persons or mispanic origin.
 Because of changes in data collection procedures, data may not be comparable with figures for earlier years.

¹Test scores of Hispanics were not tabulated separately.

NOTE.—These test scores are from the National Assessment of Educational Progress (NAEP). The NAEP scores have been evaluated at certain performance levels. A score of 300 implies an ability to find, understand, summarize, and explain relatively complicated literary and informational material. A score of 250 implies an ability to search for specific information, interrelate ideas, and make generalizations about literature,

science, and social studies materials. A score of 200 implies an ability to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. A score of 150 implies an ability to follow brief written directions and carry out simple, discrete reading tasks. Scale ranges from

¹ All participants of this age were in school.

NOTE.—These test scores are from the National Assessment of Educational Progress (NAEP). The NAEP scores have been evaluated at certain performance levels. A score of 300 implies an ability to find, understand, summarize, and explain relatively corplicated literary and informational material. A score of 250 implies an ability to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. A score of 200 implies an ability to understand,

combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. A score of 150 implies an ability to follow brief written directions and carry out simple, discrete reading tasks. Scale ranges from 0 to 500.

¹ As measured by the National Assessment of Educational Progress (NAEP).

² All participants of this age were in school.

³ Able to follow brief written directions and carry out simple, discrete reading tasks.

Able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information.

⁵Able to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials.

⁶ Data for 1971 include persons of Hispanic origin.

⁷ Able to find, understand, summarize, and explain relatively complicated literary and informational material.

[—]Data not available.

¹ As measured by the National Assessment of Educational Progress (NAEP). Fortyone states and Guam participated in the test, but the sample size in two states was insufficient to permit a reliable estimate.

NOTE.—These test scores are from the National Assessment of Educational Progress (NAEP). The NAEP scores have been evaluated at certain performance levels. A score of 300 implies an ability to find, understand, summarize, and explain relatively complicated literary and informational material. A score of 250 implies an ability to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. A score of 200 implies an ability to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. A score of 150 implies an ability to follow brief written directions and carry out simple, discrete reading tasks. Scale ranges from 0 to 500. Excludes states not participating in the survey. Some data have been revised from previously published figures.

² Parents' highest level of education. Data not shown for students who did not know parents' level of education.

³ Sample size is insufficient to permit a reliable estimate.

Did not satisfy one or more of the guidelines for school sample participation rates.

Data are subject to appreciable nonresponse bias.

⁵ The nature of the sample does not allow accurate determination of the variability of this value.

⁻Data not available.

NOTE.—These test scores are from the National Assessment of Educational Progress (NAEP). The writing scale score ranges from 0 to 500 and is defined as the average of a respondent's estimated scores on specific writing tasks. The average response method is used to estimate average writing achievement for each participant as if each had performed all 11 writing tasks. Standard errors appear in parentheses.

¹ All participants of this age were in school.

NOTE.—These test scores are from the National Assessment of Educational Progress (NAEP). Performers at the 150 level know some basic addition and subtraction facts, and most can add two-digit numbers without regrouping. They recognize simple situa-tions in which addition and subtraction apply. Performers at the 200 level have considerable understanding of two-digit numbers and know some basic multiplication and division facts. Performers at the 250 level have an initial understanding of the four basic operations. They can also compare information from graphs and charts, and are developing an ability to analyze simple logical relations. Performers at the 300 level can compute decimals, simple fractions and percents. They can identify geometric figures, measure lengths and angles, and calculate areas of rectangles. They are developing the skills to operate with signed numbers, exponents, and square roots. Performers at the 350 level can apply a range of reasoning skills to solve multi-step problems. They can solve routine problems involving fractions and percents, recognize properties of basic geometric figures, and work with exponents and square roots. Scale ranges from 0 to 500. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Assessment of Educational Progress, *NAEP 1996 Trends in Academic Progress*, prepared by Educational Testing Service. (This table was prepared September 1997.)

¹ As measured by the National Assessment of Educational Progress (NAEP).
2 Virtually no students were able to perform multi-step problems and algebra.
3 Virtually all students knew simple arithmetic facts. Data are only for students enrolled in school.
4 Scale score of 150 or above.
5 Scale score of 200 or above.
5 Scale score of 200 or above.

⁶ Scale score of 250 or above.
⁷ Scale score of 300 or above.

⁸ Scale score of 350 or above.

⁻Data not available or not applicable.

Table 120.—Average proficiency in mathematics content areas for 8th graders in public schools, by region and state: 1996

			Stut	e: 1990

¹ Achievement levels are in developmental status.

NOTE.—These test scores are from the National Assessment of Educational Progress (NAEP). Forty-four states, the District of Columbia, and one outlying area participated in the 1996 Trial State Assessment of 8th graders. Scale ranges from 0 to 500. Results are not shown for states with a school participation rate of less than 70 percent. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress, NAEP 1996 Mathematics Report Card for the Nation and the States, prepared by Educational Testing Service. (This table was prepared August 1997.)

² Excludes students who responded "I don't know" to the question about education level of parents.

³ This level denotes partial mastery of prerequisite knowledge and skills that are fun-

damental for proficient work at the 8th grade.

4 This level represents solid academic performance for 8th graders. Students reaching this level have demonstrated competency over challenging subject matter, including subject-matter knowledge, application of such knowledge to real-world situations, and analytical will be consorted to the extraction and analytical will be consorted to the extraction and analytical statements. ical skills appropriate to the subject matter.

⁵This level signifies superior performance.

⁻Data not available.

-Data not available.

NOTE.—These test scores are from the National Assessment of Educational Progress (NAEP). Scale ranges from 0 to 500.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress, *NAEP 1996 Trends in Academic Progress*, prepared by Educational Testing Service. (This table was prepared September 1997.)

¹ Indicates ability to perform simple additive reasoning and problem solving. ² Indicates ability to perform simple multiplicative reasoning and 2-step problem solv-

ing.

3 Indicates ability to perform reasoning and problem solving involving fractions, decimals, percents, elementary geometry, and simple algebra.

4 Indicates ability to perform reasoning and problem solving involving geometry, algebra. and beginning statistics and probability.

5 Includes Asian/Pacific Islanders and American Indians/Alaskan Natives.

Table 124.—Percent of students at or above selected science proficiency levels, 1 by sex, race/ethnicity, control of school, and age: 1977 to 1996

		9-year	-olds ²			13-yea	r-olds ³	-		17-ува	ır-olds ³	<u>-</u>
Sex, race/ethnicity, control, and year	Know everyday science facts 4	Understand simple scientific principles ⁵	Apply general scientific informa- tion ⁶	Analyze scientific procedures and data 7	Understand simple scientific principles ⁵	Apply general scientific informa- tion ⁶	Analyze scientific procedures and data ⁷	Integrate specialized scientific informa- tion ⁸	Understand simple scientific principles ⁵	Apply general scientific informa- tion ⁶	Analyze scientific procedures and data ⁷	Integrate specialized scientific informa- tion ⁸

SOURCE: U.S. Department of Education, National Assessment of Educational Progress, NAEP 1996 Trends in Academic Progress, prepared by Educational Testing Service. (This table was prepared September 1997.)

 ¹ As measured by the National Assessment of Educational Progress (NAEP).
 2 Virtually no students were able to integrate specialized scientific information.
 3 Virtually all students knew everyday science facts. Data exclude persons not enrolled

in school.

4 Scale score of 150 or above.

⁵ Scale score of 200 or above.

⁶ Scale score of 250 or above.

⁷ Scale score of 300 or above.

⁸ Scale score of 350 or above.

⁻Data not available or not applicable.

NOTE.—Standard errors appear in parentheses.

¹ Parents' highest level of education. Data not shown for students who did not know parents' level of education.

2 Sample size is insufficient to permit a reliable estimate.

NOTE.—These test scores are from the National Assessment of Educational Progress (NAEP). The NAEP scores have been evaluated at certain performance levels. A score of 300 implies an ability to find, understand, summarize, and explain relatively complicated literary and informational material. A score of 250 implies an ability to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. A score of 200 implies an ability to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. A score of 150 implies an ability to follow brief written directions and carry out simple, discrete reading tasks. Scale ranges from 0 to 500. Excludes states not participating in the survey. Some data have been revised from previously published figures.

¹ Excludes persons not enrolled in school.

NOTE.—These test scores are from the National Assessment of Educational Progress (NAEP). Performers at the 150 level know some general scientific facts of the type that could be learned from everyday experiences. Performers at the 200 level are developing some understanding of simple scientific principles, particularly in the life sciences. Per-formers at the 250 level can interpret data from simple tables and make inferences about the outcomes of experimental procedures. They exhibit knowledge and understanding of the life sciences and also demonstrate some knowledge of basic information from the physical sciences. Performers at the 300 level can evaluate the appropriateness of the

design of an experiment and have the skill to apply their scientific knowledge in interpreting information from text and graphs. These students also exhibit a growing understanding of principles from the physical sciences. Performers at the 350 level can infer relationships and draw conclusions using detailed scientific knowledge from the physical sciences, particularly chemistry. They also can apply basic principles of genetics and interpret the societal implications of research in this field. Scale ranges from 0 to 500. Standard errors appear in parentheses.

¹ Socioeconomic status was measured by a composite score on parental education and occupations, and family income. The "Low" SES group is the lowest quartile; the "Middle" SES group is the middle two quartiles; and the "High" SES group is the upper quartile.

3 in the full data file, twenty-five percent of all students fall into each one of the quartile groupings. Because dropouts and students who were retained in grades between 8 and 11 were excluded from this tabulation, the scores are slightly higher.

NOTE.—Because of rounding, details may not add to totals.

¹ Formerly known as the Scholastic Aptitude Test.

NOTE.—Possible scores on each part of the SAT range from 200 to 800. No racial/ ethnic group data are available prior to 1975–76. No data are available for 1985–86 due to changes in the Student Descriptive Questionnaire completed when students registered for the test.

Formerly known as the Scholastic Aptitude Test.

NOTE.—Possible scores on each part of the SAT range from 200 to 800. Rankings of states based on SAT scores alone are invalid because of the varying proportions of students in each state taking the tests.

SOURCE: College Entrance Examination Board, "College-Bound Seniors: 1995 Profile of SAT Program Test Takers," Copyright 1995 by the College Entrance Examination Board. All rights reserved.) (This table was prepared November 1995.)

² Based on the number of high school graduates in 1995 as projected by the Western Interstate Commission for Higher Education and the number of 1995 seniors who took the SAT.

⁻Data not available.

SOURCE: U.S. Department of Education, National Center for Education Statistics, "High School and Beyond," First Followup survey; and "National Education Longitudinal Study of 1988," Second Followup Student survey. (This table was prepared April 1995.)

² Beginning in 1985, data are for seniors who graduated in year shown and had taken

the ACT in their junior or senior years.

Minimum score, 1; maximum score, 36.

Beginning in 1990, the test was changed to "reading".

⁵Beginning in 1990, the test was changed to "science reasoning".

⁸Beginning in 1990, scores were 27 or above.

⁷ As of 1990, scores were 18 or below.

⁸ Includes political and persuasive (e.g., sales) fields through 1975; thereafter, business and commerce.

⁹ Beginning in 1993, includes engineering and engineering related technologies.

¹⁰ Includes religion through 1975.

¹¹ Includes education and teacher education.

⁻Not available.

SOURCE: The American College Testing program, High School Profile Report, annual. (This table prepared April 1997.)

¹ Includes special education, "other," and "don't know."

2 Socioeconomic status was measured by a composite score on parental education and occupations, and family income. The "Low" SES group is the lowest quartile; the "Middle" SES group is the middle two quartiles; and the "High" SES group is the upper quartile.

¹ Includes nonoccupational vocational education, vocational general introduction, agriculture, business, marketing, health, occupational home economics, trade and industry, and technical courses.

7 Includes students who complete less than 12 Carnegie units in academic courses and less than 3 Carnegie units in a specific labor market preparation field.

NOTE.—The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course.

SOURCE: U.S. Department of Education, National Center for Education Statistics, "High School and Beyond," First Followup survey; "1990 High School Transcript Study," "National Education Longitudinal Study of 1988," Second Followup survey, and the "1994 High School Transcript Study." (This table was prepared June 1997.)

² Includes personal and social courses, religion and theology, and courses not included in the other subject fields.

³Computer courses are included in mathematics and vocational categories.

³ Computer courses are included in mathematics and vocational categories.
⁴ Includes students who complete at least 12 Carnegie units in academic courses, but less than 3 Carnegie units in any specific labor market preparation field.
⁵ Includes students who complete at least 3 Carnegie units in a specific labor market preparation field, but less than 12 Carnegie units in academic courses.
⁶ Includes students who complete at least 12 Carnegie units in academic courses and

at least 3 Carnegie units in a specific labor market preparation field.

NOTE.—The Camegie unit is a standard of measurement that represents one credit for the completion of a 1-year course.

SOURCE: U.S. Department of Education, National Center for Education Statistics, "High School and Beyond," First Followup survey; "1990 High School Transcript Study," "National Education Longitudinal Study of 1988," Second Followup survey, and the "1994 High School Transcript Study." (This table was prepared June 1997.)

¹ Includes students who complete at least 12 Camegie units in academic courses, but less than 3 Camegie units in any specific labor market preparation field.
² Includes students who complete at least 3 Camegie units in a specific labor market preparation field, but less than 12 Carnegie units in academic courses.
³ Includes students who complete at least 12 Camegie units in academic courses and at least 3 Camegie units in a specific labor market preparation field.

⁴ Includes students who complete less than 12 Camegie units in academic courses and less than 3 Camegie units in a specific labor market preparation field.

¹ These data only report the percentage of students who earned credit in each mathematics course while in high school and does not count those students who took these courses prior to entering high school. In 1992, approximately 93 percent of graduates had taken algebra I before or during high school, and 70 percent had taken geometry. -Less than 0.05 percent.

¹ Most states have an upper age limit whereby education is provided up to a certain age or completion of secondary school, whichever comes first.

² Ages 7 to 16 or high school graduation.

³ Ages 6 to 16 or tenth grade completion.

NOTE.—The Education of the Handicapped Act (EHA) Amendments of 1986 make it mandatory for all states receiving EHA funds to serve all 3- to 18-year-old disabled chil-

SOURCE: U.S. Department of Education, Office of Special Education and Rehabilitative Services, The Eighteenth Annual Report to Congress on the Implementation of The Individuals with Disabilities Education Act, 1996; National Association of State Directors of Special Education, Inc., unpublished data; Education Commission of the States, "Clearinghouse Notes," March 1997; and Council of Chief State School Officers, State Education Policies on Student Attendance and Use of Time: 1995. (This table was prepared May 1997.)

 ⁴ Upper age limit for eligibility has been updated for 1997.
 5 State has established two points in the program year by which children must be 3 years of age to be eligible for services.

⁶ Students over the age of 16 may withdraw with the approval of a principal and student's guardians, and if an alternative education program exists.
⁷ From age 7 until student (1) graduates; (2) between age 16 to 18 and meets require-

ments for exit interview before graduation; or (3) reaches 18. Withdrawal before 18 requires parent/guardian and principal written permission.

⁸ Must have parental signature for leaving school between ages 16 to 18.

Age 18 takes effect in 2000.
 Age 16 or completion of eighth grade.
 Ages 6 to 17 for New York City and Buffalo.

¹² Permits parental waiver of kindergarten at age 5.

¹³ Or can exit if age 16 or older, has a useful occupation, has met graduation requirements or has a certificate of education competency.

¹⁴ Ages 6 to 18 or high school graduation.

⁻Data not available.

1993		All courses c	2	19	21	13	<u> </u>
		State		Washington	West Virginia Standard (1989)	Standard (2002)	186.

State allows dual credit for college coursework.

³ Local boards determine at least some requirements. 2 Minimum competency test is required.

2.A Career Pathway is a planned program of sequenced or specialized courses designed to develop knowledge and skills in a particular career area. Students may use the Additional Academic Coursework (visual and performing arts.

toreign language and/or vocational technical education coursework, including Junior ROTC) as an option, to pursue individual academic interests. The credits in these two categories will eventually replace the elective credits.

NOTE.—Local school districts frequently have other graduation requirements in addition to state requirements. ¹ Includes a relatively small amount from nongovernmental private sources (gifts and tuition and transportation fees from patrons). These sources accounted for 2.7 percent of total revenues in 1994–95.

² Revised from previously published figures.

NOTE.—Beginning in 1980-81, revenues for state education agencies are excluded. Beginning in 1988-89, data reflect new survey collection procedures and may not be en-

tirely comparable with figures for earlier years. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems; Revenues and Expenditures for Public Elementary and Secondary Education; and Common Core of Data surveys. (This table was prepared September 1997.)

¹ Excludes funds for schools and school districts.

FTE=full-time equivalent.

NOTE.—Because of rounding, details may not add to totals.

SOURCE: U.S. General Accounting Office, Education Finance, Extent of Federal Funding in State Education Agencies, and U.S. Department of Education, National Center for Education Statistics, Common Core of Data survey. (This table was prepared September 1996.)

Excludes runds for schools and school districts.

² Core education activities include: Chapter 1; Chapter 2; Special Education; Child Nutrition; Vocational Education; Adult Education; AIDS Education; Civil Rights Act; and Homeless Education Programs.

³ Excludes District of Columbia and Hawaii.

⁴ Excludes State Teacher Retirement Program.

⁻⁻ Data not available.

-Data not available.

NOTE.—Beginning in 1959-60, includes Alaska and Hawaii. Beginning in 1980-81, state administration expenditures were excluded from both "total" and "current" expenditures. Beginning in 1988-89, extensive changes were made in the data collection procedures. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems; and Common Core of Data surveys. (This table was prepared May 1997.)

 ¹ Revised from previously published data.
 ² Plant operation also includes plant maintenance.
 ³ Prior to 1959–60, items included under "other school services" were listed under "auxiliary services," a more comprehensive classification that also included community

⁴ Prior to 1959-60, data shown for adult education represent combined expenditures tor adult education, summer schools, and community colleges.

⁵ Included under summer schools.

⁶ Prior to 1969–70, excludes capital outlay by state and local schoolhousing authori-

ties.
7 Less than 0.05 percent.

¹ Includes estimated data for subfunctions of food services and enterprise operations. ² Includes expenditures for guidance, health, attendance, and speech pathology serv-

ices.

³ Includes expenditures for curriculum development, staff training, libraries, and media d computer centers.

es expenditures for operations funded by sales of products or services (e.g., okstore or computer timė).

⁵ Includes expenditures for property, and for buildings and alterations completed by

school district staff or contractors.

—Data not available or not applicable.

NOTE.—Excludes expenditures for state education agencies. Some data have been revised from previously published figures. Because of rounding, details may not add to

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data survey. (This table was prepared September 1997.)

Table 164.—Expenditures for instruction in public elementary and secondary schools, by subfunction and state: 1993-94 and 1994-95

NOTE.—Beginning in 1980-81, expenditures for state administration are excluded. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems*; and Common Core of Data surveys. (This table was prepared September 1997.)

Data revised from previously published figures.
 Data estimated by state education agencies.
 U.S. total includes National Center for Education Statistics estimates for nonreporting states.

4 Estimated by the National Center for Education Statistics.

5 Actual preliminary count.

¹ Includes expenditures for adult education, community colleges, private school programs funded by local and state education agencies, and community services.

213

² Includes expenditures for property and for building and alterations completed by school district staff or contractors.

³ Includes expenditures for health, attendance, and speech pathology services.

Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

⁵Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time).

NOTE.-Excludes expenditures for state education agencies. Because of rounding, details may not add to totals.

¹ Includes expenditures for adult education, community colleges, private school programs funded by local and state education agencies, and community services.

Common Core of Data survey. (This table was prepared May 1997.)

² Includes expenditures for property and for building and alterations completed by school district staff or contractors.

³ Includes expenditures for health, attendance, and speech pathology services.

⁴ Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

⁵ Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time).

NOTE .- Excludes expenditures for state education agencies. Some data have been revised from previously published figures. Because of rounding, details may not add to

¹ Based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. These data do not reflect differences in inflation rates from state to state.

NOTE.—Beginning in 1980–81, state administration expenditures are excluded. Beginning in 1988–89, extensive changes were made in the data collection procedures. Some data have been revised from previously published figures.

¹ Data for 1919–20 to 1953–54 are based on school-year enrollment.

² Based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

³ Estimated.

CHAPTER 3

Postsecondary Education

Postsecondary education includes an array of diverse educational experiences, including a wide range of programs offered by American colleges and universities. For example, a community college may offer vocational training or the first 2 years of training at the college level. A university typically offers a full undergraduate course of study leading to a bachelor's degree as well as first-professional and graduate programs leading to advanced degrees. Vocational and technical institutions offer training programs which are designed to prepare students for specific careers. Other types of educational opportunities for adults include community groups, churches, libraries, and businesses.

This chapter provides an overview of the latest statistics on postsecondary education, which includes academic, vocational and continuing professional education programs after high school. However, to maintain comparability over time, most of the data in the Digest are for higher education institutions, which include 2- and 4-year colleges and universities and exclude most vocational and continuing education programs. This chapter highlights historical data that enable the reader to observe long-range trends in American higher education.

Other chapters provide related information on postsecondary education. Data on price indexes and on the number of degrees held by the general population are in chapter 1. Chapter 4 contains tabulations on federal funding for postsecondary education. Information on employment outcomes for college graduates is in chapter 5. Chapter 7 contains data on college libraries and use of computers by young adults. Further information on survey methodologies is in the "Guide to Sources" in the appendix and in the publications cited in the source notes.

Enrollment

Higher education enrollment increased by 9 percent between 1975 and 1985. Between 1985 and 1995, enrollment increased at a faster rate (16 percent), from 12.2 million to 14.3 million. There was a slight decline in enrollment in the later part of the period from 1992 to 1995, but it was overshadowed by large increases in the late 1980s. Much of this growth was in part-time and female enrollment (table 172). Between 1985 and 1995, the number of men

enrolled rose 9 percent, while the number of women increased by 23 percent. Part-time enrollment rose by 19 percent compared to an increase of 15 percent in full-time enrollment. In addition to the enrollment in 2-year colleges, 4-year colleges, and universities, about 850,000 students attended noncollegiate postsecondary institutions in fall 1995 (table 170). The number of older students has been growing more rapidly than the number of younger students, though this pattern is beginning to change. Between 1985 and 1995, the enrollment of students under age 25 increased by 13 percent. During the same period, enrollment of persons 25 and over rose by 22 percent. From 1995 to 2007, NCES projects a rise of 20 percent in enrollments of persons under 25 and an increase of 4 percent in the number 25 and over (table 176).

Enrollment trends have differed at the undergraduate, graduate, and first-professional levels. Undergraduate enrollment generally increased during the 1970s, but dipped between 1983 and 1985. From 1985 to 1992, undergraduate enrollment increased each year, rising 18 percent before declining slightly between 1993 and 1995. Graduate enrollment had been steady at about 1.3 million in the late 1970s and early 1980s, but rose about 26 percent between 1985 and 1995. After rising very rapidly during the 1970s, enrollment in first-professional programs stabilized in the 1980s. There was a 9 percent increase in first-professional enrollment between 1985 and 1995 (tables 187, 188, and 189).

Since 1984, the number of women in graduate schools has exceeded the number of men. Between 1985 and 1995, the number of male full-time graduate students increased by 23 percent, compared to 64 percent for full-time women. Among part-time graduate students, the number of men increased by 6 percent compared to a 26 percent increase for women (table 188).

The proportion of American college students who are minorities has been increasing. In 1976, 16 percent were minorities, compared with 25 percent in 1995. Much of the change can be attributed to rising numbers of Hispanic and Asian students. The proportion of Asian and Pacific Islander students rose from 2 percent to 6 percent, and the Hispanic proportion rose from 4 percent to 8 percent during that time

period. The proportion of black students has fluctuated over the previous 19 years, before rising to 11 percent in 1995. These percentages exclude foreign students enrolled in U.S. colleges and universities (table 206).

Despite the sizable numbers of small colleges, most students attend the larger colleges and universities. In fall 1995, 36 percent of higher education campuses had fewer than 1,000 students; however, these campuses enrolled only 4 percent of college students. While 11 percent of the campuses enrolled 10,000 or more students, they accounted for 50 percent of total college enrollment (table 215).

Faculty, Staff, and Salaries

The student/staff ratio at colleges and universities dropped from 5.4 in 1976 to 4.9 in 1993. During the same time period, the student/faculty ratio dropped from 16.6 to 15.5. The proportion of administrative staff and other non-teaching professional staff rose from 15 percent in 1976 to 22 percent in 1993, while the proportion of nonprofessional staff declined from 42 percent to 35 percent (table 221).

Approximately 2.6 million people were employed in colleges and universities in the fall of 1993, including 1.7 million professional and .9 million nonprofessional staff. About 43 percent of the staff were faculty or teaching assistants, 6 percent were managerial, 16 percent were other non-teaching professionals, and 35 percent were nonprofessional staff (table 223).

Colleges differ widely in their practices of employing part-time and full-time staff. In fall 1993, 51 percent of the employees at public 2-year colleges were employed full-time compared with 72 percent at public 4-year colleges and 73 percent at private 4-year colleges. A higher proportion of the faculty at public 4-year colleges were employed full-time (76 percent) than at private 4-year colleges (62 percent) or public 2-year colleges (35 percent) (table 223).

Full-time and part-time faculty and instructional staff also differ by the number and types of students that they teach. In 1992, 67 percent of full-time faculty taught 50 students or more, while only 30 percent of part-time faculty taught that many students. Part-time faculty also taught fewer hours per week. About 46 percent of full-time faculty taught for 10 or more hours per week, compared to 18 percent of part-time faculty. Of the full-time faculty teaching only undergraduate students, 61 percent taught three or more classes, compared to 18 percent of part-time faculty (tables 228 and 229).

The proportion of time that full-time faculty spent teaching was 55 percent in 1992. For the remaining faculty time, research and scholarship accounted for 18 percent of the time; professional growth, 5 percent; administration, 13 percent; outside consulting, 3

percent; service and non-teaching activities, 7 percent (table 228).

About 12 percent of U.S. faculty in colleges and universities were minorities in 1993. Five percent of the faculty were black; 4 percent, Asian/Pacific Islanders; 3 percent, Hispanic; and .4 percent, American Indian/Alaskan Native. The majority of college faculty were white males. Fifty-two percent of faculty fell in this category, while 33 percent were white females. About 14 percent of executive, managerial, and administrative staff were minorities in 1993, compared to about 29 percent of the nonprofessional staff. The distribution of minority staff was similar at public and private institutions. About 19 percent of all staff at public institutions were minorities compared to 20 percent at private institutions (table 222).

College faculty generally suffered losses in the purchasing power of their salaries from 1972–73 to 1980–81, when average salaries fell 17 percent after adjustment for inflation. During the 1980s, average salaries rose and recouped most of the losses. Between 1992–93 and 1995–96, there was a slight rise in average faculty salaries. Average salaries for men in 1995–96 (\$52,814) were considerably higher than the average for women (\$42,871), but women's salaries have increased at a slightly faster rate since 1990–91 (table 234).

The proportion of faculty with tenure has remained relatively stable in recent years. About 65 percent of full-time faculty had tenure in 1995–96, but a large difference existed between the proportion of men and women with tenure. Seventy-two percent of men compared with 51 percent of women had tenure in 1995–96. About 68 percent of the faculty at public institutions had tenure, compared with 58 percent of faculty at private institutions (table 240).

The age distribution of full-time faculty was concentrated in the middle age brackets in 1992. Faculty under the age of thirty composed one percent of the total, but 36 percent were ages 30 to 44, and 37 percent were 45 to 54 years old. Thirteen percent were 55 to 59; 8 percent, 60 to 64; and 5 percent, 65 or older (table 231).

Degrees

During the 1995–96 academic year, 9,962 institutions offered postsecondary education. This included 2,244 4-year colleges, 1,462 2-year colleges, and 6,256 vocational and technical institutions (tables 242 and 356). Institutions awarding various higher education degrees in 1994–95 numbered 2,184 for associate degrees, 1,855 for bachelor's degrees, 1,351 for master's degrees, and 482 for doctor's degrees (tables 258).

More people are completing college. Between 1984-85 and 1994-95, the number of associate, bachelor's, master's, and doctor's degrees rose. As-

sociate degrees increased 19 percent, bachelor's degrees increased 18 percent, master's degrees increased 39 percent, and doctor's degrees increased 35 percent during this period. The number of first-professional degrees was slightly higher in 1994–95 than it was in 1984–85. The number of first-professional degrees declined in the mid 1980s before increasing in the early 1990s (table 244).

The total number of bachelor's degrees increased slowly during the early 1980s and more rapidly towards the end of that decade, especially for women. Between 1984–85 and 1994–95, the number of bachelor's degrees awarded to men increased by 9 percent, while those awarded to women rose by 28 percent (table 244).

Of the 1,160,000 bachelor's degrees conferred in 1994–95, the largest numbers of degrees were conferred in the fields of business (234,000), social sciences (128,000), and education (106,000). At the master's degree level, the largest fields were education (101,000) and business (94,000). The largest fields at the doctor's degree level were education (6,900), engineering (6,100), biological sciences (4,600) and physical sciences (4,500) (tables 250, 251, and 252).

The pattern of bachelor's degrees by field of study has shifted significantly in recent years. Declines are significant in some male majority fields such as engineering and computer and information sciences. Engineering and engineering technologies declined 15 percent between 1984-85 and 1989-90, and then posted a further 4 percent decline between 1989-90 and 1994-95 (table 285). Computer and information sciences grew rapidly during the 1970s and mid 1980s, but dropped 42 percent between 1985-86 and 1994-95 (table 283). Other technical fields have been driven upwards in recent years, in part, by increasing numbers of female graduates. For example, biological science degrees declined by 3 percent between 1984-85 and 1989-90, and then rose 50 percent between 1989-90 and 1994-95. During the later period, the number of male graduates grew 46 percent, while the number of female graduates grew 55 percent (table 279). After declining by 32 percent overall between 1984-85 and 1989-90, the number of male graduates in the physical sciences grew by 13 percent, while the number of female graduates grew 33 percent between 1989-90 and 1994-95 (table 292). After declining by 29 percent between 1984-85 and 1989-90, the number of male graduates in agriculture and natural resources grew by 44 percent between 1989-90 and 1994-95, while the number of female graduates grew 75 percent (table

Some fields that had been increasing grew at a more rapid pace between 1989-90 and 1994-95. For

example, the number of degrees conferred in visual and performing arts increased by 5 percent between 1984–85 and 1989–90, but increased 22 percent between 1989–90 and 1994–95 (table 298). Public administration rose by 18 percent during the first period and by 34 percent in the second 5 year period (table 295). Some fields, such as psychology, increased rapidly in both of the 5 year periods, rising 35 percent between 1984–85 and 1989–90, and then a further 34 percent between 1989–90 and 1994–95 (table 294).

Less than half (46 percent) of the bachelor's degree seeking students who enrolled in college in 1989–90 had completed their degree by spring 1994. About 8 percent of students had completed an associate degree or other certificate below the bachelor's degree, 18 percent of the students were still enrolled toward a bachelor's degree, and 28 percent were no longer working towards a bachelor's degree (table 310).

Finances

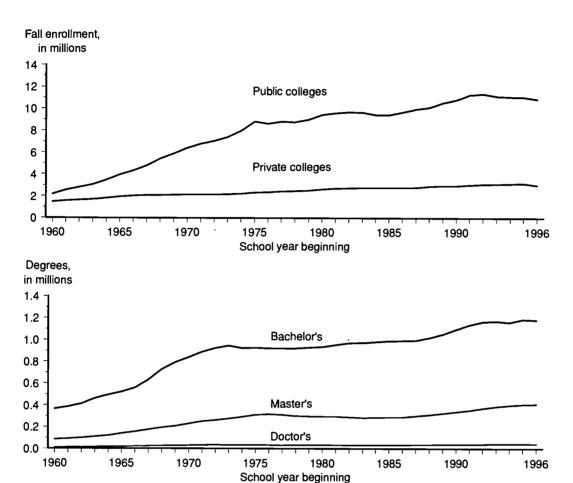

For the 1996–97 academic year, annual undergraduate charges for tuition, room, and board were estimated to be \$6,534 at public colleges and \$18,071 at private colleges. Between 1986–87 and 1996–97, charges at public colleges have risen by 20 percent, and charges at private colleges have increased by 31 percent, after adjustment for inflation (tables 38 and 312).

Trend data show increases in the expenditures per student at institutions of higher education through the late 1980s and further increases after 1992. After an adjustment for inflation at colleges and universities, current-fund expenditures per student rose about 8 percent between 1984–85 and 1989–90, and another 8 percent between 1989–90 and 1994–95 (table 336).

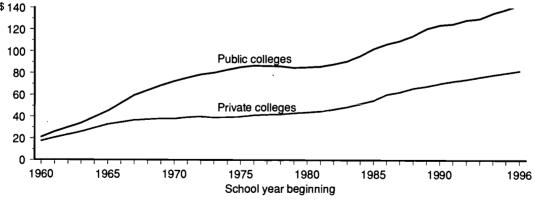

Scholarships and fellowships have been rising more rapidly than most other types of college expenditures in recent years. At public universities, between 1984-85 and 1994-95, inflation adjusted scholarships and fellowships expenditures per fulltime-equivalent student rose 91 percent compared with 11 percent for instruction expenditures per student. At private universities during the same period, scholarships and fellowships costs per student rose 78 percent, and the instruction costs rose by 38 percent (tables 341 and 344). Another rapidly rising expenditure for public colleges during the decade was research, which rose by 38 percent per full-timeequivalent student at public universities, and by 47 percent at other public 4-year colleges (tables 341 and 342).

¹ Preliminary data

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys; and Integrated Postsecondary Education Data Systems (IPEDS), "Fall Enrollment" surveys. (This table was prepared December 1996.)

² Large increase is due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

238

¹ Excludes first-time freshmen in occupational programs not creditable towards a bach-

-Data not available.

NOTE.—Alaska and Hawaii are included in all years. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Fall Enrollment in Higher Education, various years; "Fall Enrollment in Colleges and Universities" survey; and Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment" surveys. (This table was prepared January 1997.)

elor's degree.

² Data for 2-year branches of 4-year college systems are aggregated with the 4-year institutions.

³ Because of imputation techniques, data are not consistent with figures for other

years.
4 Data not comparable with pre-1990 figures because of a change in reporting procedures.
⁵ Preliminary data.

¹Individuals age 16 to 24 who graduated from high school during the preceding 12 months.

NOTE.—Data are based upon sample surveys of the civilian population. High school graduate data in this table differ from figures appearing in other tables because of varying survey procedures and coverage. High school graduates include GED recipients.

SOURCE: American College Testing Program, unpublished tabulations, 1987, derived from statistics collected by the U.S. Bureau of the Census; and U.S. Department of Labor, College Enrollment of High School Graduates, various years. (This table was prepared July 1997.)

BEST COPY AVAILABLE

²Enrollment in college as of October of each year for individuals age 16 to 24 who graduated from high school during the preceding 12 months.

³ Includes persons of Hispanic origin.

⁴Due to the small sample size, data are subject to relatively large sampling errors.

⁻Data not available.

¹ Includes students who were enrolled in college, but did not report high school completion.

NOTE.—Data are based upon sample surveys of the civilian noninstitutional population. Percents based on 18- to 24-year-old high school graduates for 1992 and later

years, use a slightly different definition of graduation and may not be directly comparable with figures for other years. All college students are counted as high school graduates.

SOURCE: U.S. Department of Commerce, Bureau of the Census, Current Population Survey, unpublished data. (This table was prepared June 1997.)

¹Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology in 1980 and 1981.

NOTE.—Because of a revision in data compilation procedures, figures for 1986 and later years are not directly comparable with data for earlier years.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys; and Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment" surveys. (This table was prepared January 1997.)

²Because of imputation techniques, data are not consistent with figures for other years.

¹ Students who are enrolled at the reporting institution for the first time.

² All of the new students reported by the institutions in that state; i.e., all in-migrants and "remaining" students.

³ All students living in a particular state when first admitted to an institution in any state. Students may be enrolled in any state.

⁴ Students who attend institutions in their home state.

⁵ Includes students coming to U.S. colleges from foreign countries and the outlying

⁶ Students are reported in "state unknown" when an institution is unable to determine the student's home state.

⁻Data not available or not applicable.

NOTE.—Data for U.S. Service Schools are included in state totals. Some data revised from previously published figures.

Distribution for U.S. citizens only.
 Preliminary data.
 Not applicable.

NOTE.—Because of underreporting and nonreporting of racial/ethnic data, some figures are slightly lower than corresponding data in other tables. Because of rounding, details may not add to totals.

¹ Preliminary data. Minority includes black. Hispanic, Asian or Pacific islander, and American Indian/Alaskan Native students.

NOTE.—Some institutions do not report separate enrollment data for each branch campus. For this reason, counts of institutions in this table are somewhat tower than figures appearing in other tables.

¹ Totals differ from those shown in other tables. This table presents data collected in sample surveys of households rather than surveys of institutions. Excludes persons age 35 and over.

-Data not available

NOTE.—Data are based upon sample surveys of the civilian noninstitutional poputation. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Commerce, Bureau of the Census, *Current Population Reports*, Series P-20, No. 403, and unpublished data. (This table was prepared June 1997.)

² Data for 1985 to 1993 are controlled to 1980 census base.

³ Data are controlled to 1990 census base. Large increase in 1994 is partly due to the change in census base and change in survey form administration procedures.

⁴ Data for 1965 and 1970 include persons of Hispanic origin.

Ondecialed			•													

Includes less-than-2-year schools.

2 Too few sample cases for a reliable estimate.

3 Includes students whose classification is unknown.

—Data not available.

NOTE.—Because of different survey editing and processing procedures, enrollment data in this table may differ from those appearing in other tables. Because of rounding, details may not add to totals. Includes students who enrolled at any time during the 1995–96 academic year.

SOURCE: U.S. Department of Education, National Center for Education Statistics, "The 1995-96 National Post-secondary Student Aid Study," unpublished data. (This table was prepared November 1997).

¹These preliminary data represent the institution branches and enrollments reported in the "Fall Enrollment" survey.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment" surveys. (This table was prepared January 1997.)

² Some institutions do not report separate enrollment data for each branch campus. For this reason, counts of institutions in this table are somewhat lower than figures appearing in other tables.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment, 1995" survey. (This table was prepared May 1997.)

¹ College and university campuses ranked by fall 1995 preliminary enrollment data.

² Publicly controlled institutions are identified by a "1," private, nonprofit, by a "2," and private, proprietary, by a "3."

³ The types of institutions are identified as follows: "1" for 4-year institutions and "2" for 2-year institutions.

Table 217.—Selected statistics for college and university campuses enrolling more than 14,600 students in 1995

¹ Historically black colleges and universities are accredited institutions of higher education established prior to 1964 with the principal mission of educating black Americans. Federal regulations, 20 U.S. Code, Section 1061 (2), allow for certain exceptions to the founding date. Most institutions are in the southern and border states and were established prior to 1954.

NOTE.—Because of rounding, details may not add to totals.

¹ Includes faculty members with the title of professor, associate professor, assistant professor, instructor, lecturer, assisting professor, adjunct professor, or interim professor (or the equivalent). Excluded are graduate students with titles such as graduate or teaching fellow who assist senior faculty.

2 Estimated on the basis of enrollment.

NOTE.—Data exclude faculty employed by system offices. Some data have been revised from previously published figures. For methodological details on estimates, see Projections of Education Statistics to 2000. Because of rounding, details may not add to totals.

NOTE.—Data exclude faculty employed by system offices. Totals may differ from figures reported in other tables because of varying survey methodologies.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Staff" survey. (This table was prepared June 1996.)

³ Because of revised survey methods, data are not directly comparable with figures for years prior to 1987.

-Too few sample cases (fewer than 30) for a reliable estimate.

NOTE.—Data for 1992–93 differ from other tables because of adjustments to maintain consistency with the 1987–88 data. Data have been revised from previously published figures. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Study of Postsecondary Faculty (NSOPF), 1987–88 and 1992–93. (This table was prepared September 1996.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, SOURCE: U.S. Department of Education, National Center for Education Statistics, Education Directory, Colleges and Universities; Higher Education General Information Survey (HEGIS), "Fall Enrollment in Higher Education" and "Institutional Characteristics of Colleges and Universities" surveys; and Integrated Postsecondary Education Data System (IPEDS), "Institutional Characteristics" surveys. (This table was prepared September 1975) tember 1996.)

¹Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

²Because of revised survey procedures, data are not entirely comparable with figures for earlier years. The number of branch campuses reporting separately has increased since 1986–87.

NOTE.-Includes those colleges designated as institutions of higher education by the Integrated Postsecondary Education Data System, even if they have a less than 2-year program.

—Data not available or not applicable.

NOTE.—The new Classification of instructional Programs was initiated in 1991–92. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonorny. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey: "Agricultura and natural resources" includes Agricultura business and production, Agricultural sciences, and Conservation and renewable natural resources; "Business" includes Business management and administrative services, Marketing operations'

marketing and distribution, and Consumer and personal services; and "Engineering-related technologies" includes Engineering-related technologies, Mechanics and repairers, and Construction trades. SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, and Integrated Postsecondary Education Data System (IPEDS), "Completions" surveys. (This table was prepared March 1997.)

NOTE.—The new Classification of Instructional Programs was initiated in 1991-92. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonormy. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IFEDS "Completions" survey, "Agricultura and natural resources" includes Agricultura business and production, Agricultural sciences, and Conservation and renewable natural resources; "Business" includes Business management and administrative services, Marketing operations/

marketing and distribution, and Consumer and personal services; and "Engineering-related technologies" includes Engineering-related technologies, Mechanics and repairers, and Construction trades.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, and Integrated Postsecondary Education Data System (IPEDS), "Completions" surveys. (This table was prepared March 1997.)

²Excludes 4,807 men and 1,150 women whose racial/ethnic group was not available. ³ Excludes 4,819 men and 1,384 women whose racial/ethnic group was not available.

⁴ Racial/ethnic data were imputed for approximately 45,400 men and 55,400 women.

This tabulation excludes 11,490 men and 10,862 women whose racial/ethnic group could not be imputed. In addition, data for 1,033 men and 1,512 women were not available by field of study and were not imputed by race.

⁵Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported.

⁶ Excludes 2,353 men and 2,267 women whose racial/ethnic group and field of study were not available.

des 2,564 men and 2,275 women whose racial/ethnic group and field of study available.

des 8,413 men and 11,277 women whose racial/ethnic group and field of study available. 349

⁹ Excludes 4,673 men and 5,171 women whose racial/ethnic group and field of study were not available.

¹⁰ Excludes 2,913 men and 3,689 women whose racial/ethnic group and field of study were not available.

¹¹ Excludes 799 men and 727 women whose racial/ethnic group and field of study were not available. Data revised from previously published data.

¹² Excludes 622 men and 524 women whose racial/ethnic group and field of study were not available.

NOTE.—Because of rounding, percents may not add to 100.0.

¹Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Excludes 799 men and 727 women whose racial/ethnic group and field of study were not available.

NOTE.—To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey: "Agriculture and natural resources" includes Agricultural business and production,

Agricultural sciences, and Conservation and renewable natural resources; and "Business" includes Business management and administrative services, Marketing operations/marketing and distribution, and Consumer and personal services. Data revised from previously published data.

¹ Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity for students whose race/ethnicity as not reported. Excludes 957 men and 389 women whose racial/ethnic group and field of study were not available.

NOTE.—To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey: "Agriculture and natural resources" includes Agricultural business and production,

Agricultural sciences, and Conservation and renewable natural resources; and "Business" includes Business management and administrative services, Marketing operations/marketing and distribution, and Consumer and personal services.

¹ Excludes 387 men and 175 women whose racial/ethnic group was not available.

NOTE.—Because of rounding, percents may not add to 100.0.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, and Integrated Postsecondary Education Data System (IPEDS), "Completions" surveys. (This table was prepared April 1997.)

Excludes 733 men and 91 women whose racial/ethnic group was not available.
 Excludes 1,377 men and 179 women whose racial/ethnic group was not available.
 Excludes 3,973 men and 1,857 women whose racial/ethnic group was not available.
 Excludes 3,973 men and 1,857 women whose racial/ethnic group was not available.
 Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not

reported.

⁶ Excludes 482 men and 369 women whose racial/ethnic group and field of study were

⁷ Excludes 727 men and 1,109 women whose racial/ethnic group and field of study

were not available.

⁸ Excludes 4,686 men and 3,837 women whose racial/ethnic group and field of study were not available.

Excludes 2,299 men and 1,857 women whose racial/ethnic group and field of study vailable.

¹⁰ Excludes 504 men and 380 women whose racial/ethnic group and field of study were not available.

¹¹ Excludes 730 men and 921 women whose racial/ethnic group and field of study were not available.

¹² Excludes 475 men and 102 women whose racial/ethnic group and field of study were not available.

¹ Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Excludes 475 men and 102 women whose racial/ethnic group and field of study were not available.

NOTE.—To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey: "Agriculture and natural resources" includes Agricultural business and production,

Agricultural sciences, and Conservation and renewable natural resources; and "Business" includes Business management and administrative services, Marketing operations/marketing and distribution, and Consumer and personal services.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Completions" survey. (This table was prepared April 1997.)

Table 270.—Master's degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1993-94

¹ Includes Ph.D., Ed.D, and comparable degrees at the doctoral level. Excludes first-

professional degrees.

2 Excludes 106 men whose racial/ethnic group was not available.

3 Excludes 53 men and 2 women whose racial/ethnic group was not available.

4 Excludes 116 men and 3 women whose racial/ethnic group was not available.

Excludes 404 men and 232 women whose racial/ethnic group was not available.
 Reported racial/ethnic distributions of students by level of degree, field of degree. and sex were used to estimate race/ethnicity for students whose race/ethnicity was not

reported.

7 Excludes 51 men and 10 women whose racial/ethnic group and field of study were not available.

⁸ Excludes 153 men and 105 women whose racial/ethnic group and field of study were

not available.

⁹ Excludes 423 men and 324 women whose raclal/ethnic group and field of study were

not available.

¹⁰ Excludes 389 men and 180 women whose racial/ethnic group and field of study were not available.

¹¹ Excludes 93 men and 18 women whose racial/ethnic group and field of study were not available.

¹² Excludes 21 men and 15 women whose racial/ethnic group and field of study were

not available. $^{13}\,\mathrm{Excludes}$ 18 men and 1 woman whose racial/ethnic group and field of study were not available.

NOTE.—Because of rounding, percents may not add to 100.0.

¹ Excludes 394 men and 12 women whose racial/ethnic group was not available.

NOTE.—For years 1984–85 to 1994–95, reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Because of rounding, percents may not add to 100.0.

² Excludes 227 men and 10 women whose racial/ethnic group was not available.

³ Excludes 598 men and 18 women whose racial/ethnic group was not available.

Excludes 2,954 men and 1,052 women whose racial/ethnic group and field of study were not available.
 Excludes 183 men and 61 women whose racial/ethnic group and field of study were

⁵ Excludes 183 men and 61 women whose racial/ethnic group and field of study were not available.

⁶ Excludes 245 men and 188 women whose racial/ethnic group and field of study were not available.

 $^{^7}$ Excludes 1,259 men and 758 women whose racial/ethnic group and field of study wars act evailable.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, and Integrated Postsecondary Education Data System (IPEDS), "Completions" surveys. (This table was prepared April 1997.)

Table 275.—First-professional degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1994–95

¹ Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes firstprofessional degrees, such as M.D., D.D.S., and D.V.M.
² Includes mathematics, computer science, physics, astronomy, chemistry, and earth,

NOTE.—The above classification of degrees by field differs somewhat from that in most publications of the National Center for Education Statistics (NCES). The major dif-

ferences are that history is included under humanities rather than social sciences and that psychology is included under social sciences. The number of degrees also differs slightly from that reported in the NCES "Completions" survey. The above tabulation excludes some non-research doctorate degrees such as doctor's degrees in theology. Total includes a small number of graduates not reported by field of study. Because of rounding, percents may not add to 100.0.

atmospheric, and marine sciences.

³ Distribution by race/ethnicity based on U.S. citizens and those with permanent visas

only.

Includes 2-year, 4-year, and foreign colleges and universities, medical schools, and elementary/secondary schools.

⁵ Includes only recipients with definite employment plans.

Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first-professional degrees (e.g., M.D., D.D.S., and D.V.M.).
 Institutions are ranked by the total number of doctor's degrees conferred during the 10-year period ending June 30, 1995.
 Includes degrees conferred by the Endowed and Statutory Colleges.
 —Not applicable.

¹ Highest degree attained at any institution. Students who have attained may also be enrolled.

-Data not available or not applicable.

NOTE.—Data reflect completion and enrollment status by spring 1994 of first-time postsecondary students starting academic year 1989-90. Some cells in this table have relatively large sampling errors. See sampling error table in appendix.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Beginning Postsecondary Student Longitudinal Survey, 1994. (This table was prepared September 1996.)

² Status as of 1994. Includes those students who are no longer working towards a

bachelor's degree, but who had completed another type of degree or award.

3 Status as of 1994. Includes students who had completed another type of degree or award (associate degree: 11.8 percent, certificate: 2.7 percent) but are still working to-

ward a bachelor's degree.

4 Status as of 1994. Enrollment can be full-time or part-time. Includes students who

are still enrolled, but are no longer working toward a bachelor's degree.

5 Students were considered to have a diploma only if they had a regular high school diploma. Students with a GED or other high school credentials were considered to have no diploma.

¹Total includes examinees who received no score on one or more General Test measures.
²Data reported for 1994, 1995, and 1996 are from the revised education test.

—Data not reported or not applicable.

NOTE.—GRE scores for the verbal, quantitative, and analytical sections range from 200 to 800. Subject matter test scores range from 200 to 990.

NOTE.—Data are for the entire academic year and are average charges paid by students. Tuition and fees were weighted by the number of full-time-equivalent undergraduates but were not adjusted to reflect student residency. Room and board were based on full-time students. The data have not been adjusted for changes in the purchasing power of the dollar. Some data have been revised from previously published figures. Because of rounding, details may not add to totals.

¹ Data for 1986-87 and later years reflect 20 meals per week rather than meals 7 days per week

² Room and board data are estimated.

³Because of revisions in data collection procedures, figures are not entirely comparable with those for previous years. In particular, data on board rates are somewhat higher than earlier years because they reflect a basis of 20 meats per week rather than meats served 7 days per week. Since many institutions serve fewer than 3 meats each day, the 1986-87 and later data reflect a more accurate accounting of total board costs. Because of their low response rate, data for private 2-year colleges must be interpreted with caution.

4 Preliminary data based on fall 1995 enrollment weights.

[—]Data not available.

¹ Preliminary data based on fall 1995 enrollments.

NOTE.—Data are for the entire academic year and are average charges. Tuition and fees were weighted by the number of full-time-equivalent undergraduates in 1995, but are not adjusted to reflect student residency. Room and board are based on full-time students. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment" and "Institutional Characteristics" surveys. (This table was prepared October 1997.)

¹Numbers of undergraduates may not equal figures reported in other tables, since these data are based on a sample survey. Includes all postsecondary institutions.

NOTE.—Because of rounding and/or the fact that some students receive aid from multiple sources, row details may not add to totals. Because of rounding and survey item nonresponse, enrollment data may not add to totals. Data include undergraduates in noncollegiate and collegiate institutions.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Postsecondary Student Aid Study, 1995–96. (This table was prepared September 1997)

² Includes students who reported they were awarded aid, but did not specify the source or type of aid.

³ Details on federal and nonfederal work study participants are not available.

⁴ Includes students who were single, divorced, or widowed.

⁵ Excludes persons whose attendance status was not reported.

⁶ Enrollment data include persons whose attendance status was not reported.

[—]Data not applicable.

¹ Numbers of undergraduates may not equal figures reported in other tables, since these data are based on a sample survey. Includes students who enrolled at any time

NOTE.—Because some students receive aid from multiple sources, percents do not add to totals. Excludes students whose attendance status was not reported.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Postsecondary Student Aid Study, 1992–93 and 1995–96. (This table was prepared September 1997.)

during the academic year.

² Includes students who reported that they were awarded aid but did not specify the source of the aid.

c includes students who reported that they were awarded aid but did not specify the source of the aid.
3 Full-time students are students who attend full-time for the entire academic year. All other students, including those who attend full-time for part of the academic year, are counted as part-time students.

¹ Preliminary data.

NOTE.—Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Financial Statistics of Institutions of Higher Education" surveys; and Integrated Postsecondary Education Data System (IPEDS), "Finance" surveys. (This table was prepared July 1997.)

² Excludes Pell Grants. Federally supported student aid that is received through students is included under tuition and auxiliary enterprises.

³ Generally includes only those revenues associated with major federally funded research and development centers (FFRDC).

⁴Less than 0.05 percent.

¹ Preliminary data.

² Includes federally supported aid received through students.

Includes appropriations, grants, contracts, and revenues associated with major federally funded research and development centers (FFRDC). Excludes Pell Grants.

4 Research institutions are committed to graduate education through the doctorate, and give high priority to research. Research I institutions receive \$40 million or more annually in federal support. Research II institutions receive between \$15.5 million and \$40 million

annually.

Specialized institutions award baccalaureate or higher level degrees in specific fields of study.

 $^{^{\}rm 6}$ Tribally controlled colleges are located on reservations and are members of the American Indian Higher Education Consortium.

NOTE.—Because of rounding, details may not add to totals.

¹ Includes federal appropriations, unrestricted and restricted federal contracts and grants, and revenue for independent operations. Independent operations generally include only the revenues associated with major federally funded research and development centers. Excludes Pell Grants. Federally supported student aid that is received through students is excluded.

⁻Not applicable.

¹ Includes all separately budgeted programs, other than research, which are supported by sponsors outside the institution. Examples are training programs, workshops, and training and instructional institutes. For years not shown, most expenditures for these programs are included under "Extension and public service."
² Generally includes only those expenditures associated with federally funded research and development centers (FFRDCs).
³ Data for 1929-30 to 1945-46 are based on school year enrollment.
⁴ Data adjusted by the consumer price index computed on a school year basis.
⁵ Expenditures for federally funded research and development centers are included under "Organized research."
³ Included under "Other current expenditures."
² Expenditures for hospitals included under "Organized activities related to instructional departments."

NOTE.—The data in this table reflect limitations of data availability and comparability. Major changes in data collection forms in 1965-66 and 1974-75 cause significant data comparability problems among the three mostly consistent time periods, 1929-30 to 1963-64, 1965-66 to 1973-74, and 1974-75 to the present. The largest problems affect Hospitals, Independent operations, Organized research, Other sponsored programs, Extension and public service, and Scholarships and fellowships.

(This table was prepared July 1997.)

departments."

⁶ Expenditures were for federal contract courses.

⁹ Includes current expenditures for physical plant assets. In later years, the educational and general expenditures for physical plant assets are included under "Other general expenditures."

¹⁰ Preliminary data.

[—]Data not available.

¹ Preliminary data.

² Generally includes only those expenditures associated with major federally funded research and development centers (FFRDC).

³ Research institutions are committed to graduate education through the doctorate, and give high priority to research. Research I institutions receive \$40 million or more annually in federal support. Research II institutions receive between \$15.5 million and \$40 million

⁴ Specialized Institutions award baccalaureate or higher level degrees in specific fields

of study.

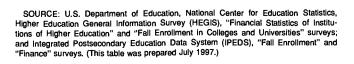

5 Tribally controlled colleges are located on reservations. They are members of the American Indian Higher Education Consortium.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Finance, 1994–95" survey. (This table was prepared July 1997.)

Table 336.—Current-fund expenditures and expenditures per full-time-equivalent student in Institutions of higher education, by type and control of institution: 1970–71 to 1994–95

¹ Data are based on sample surveys of institutions of higher education.

SOURCE: Council for Aid to Education, Research Report, "Contributions to Colleges Drop for First Time Since 1975"; and "Voluntary Support of Education," various years. (This table was prepared June 1996.)

² Excludes Pell Grants.

³ Generally includes only those expenditures associated with major federally funded research and development centers (FFRDC).

⁴Less than 0.05 percent

²Total expenditures include current-fund expenditures and additions to plant value.

¹ Includes institutional and academic support less libraries.

² Preliminary data.

NOTE.—Data in this table may differ slightly from data appearing in other tables. Data \$\ 6-77\$ through 1985-86 include only institutions which provided both enrollment ance data. The Higher Education Price Index was used to convert the per student to constant dollars. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Financial Statistics of Institutions of Higher Education" surveys; Integrated Postsecondary Education Data System (IPEDS), "Finance" surveys; and Research Associates of Washington, unpublished data. ² Preliminary data.

NOTE.—Data in this table may differ slightly from data appearing in other tables. Data for 1976–77 through 1985–86 include only institutions which provided both enrollment and finance data. The Higher Education Price Index was used to convert the per student figures to constant dollars. Because of rounding, details may not add to totals.

¹ Excludes universities. See preceding table.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Financial Statistics of Institutions of Higher Education" surveys; Integrated Postsecondary Education Data System (IPEDS), "Finance" surveys; and Research Associates of Washington, unpublished data. (This table was prepared June 1997.)

² Includes institutional and academic support less libraries.

³ Preliminary data.

NOTE.—Data in this table may differ slightly from data appearing in other tables. Data 7 through 1985–86 include only institutions which provided both enrollment data. The Higher Education Price Index was used to convert the per student onstant dollars. Because of rounding, details may not add to totals.

¹ Adult education is defined as all education activities, except full-time enrollment in higher education credential programs. Examples of adult education activities include part-time college attendance, classes or seminars given by employers, and classes taken for adult literacy purposes, or for recreation and enjoyment. Includes adult basic education and English as a second language classes.

NOTE.—Data are based upon a sample survey of the civilian noninstitutional population. Because of rounding and survey item nonresponse, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Household Education Survey, "Participation in Adult Education," unpublished data. (This table was prepared October 1997.)

² Percentages based on the respondent's reports of the first six work-related courses taken.

² Percentages based on the respondent's reports of the first three part-time higher education courses taken.

¹ Adult education is defined as all education activities, except full-time enrollment in higher education credential programs. Examples of adult education activities include part-time college attendance, classes or seminars given by employers, and classes taken for adult literacy purposes, or for recreation and enjoyment.

NOTE.—Data are based upon a sample survey of the civilian noninstitutional population. Because of rounding and survey item nonresponse, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Institutional Characteristics" surveys. (This table was prepared September 1996.)

CHAPTER 4

Federal Programs for Education and Related Activities

This chapter provides a summary of federal funds for education to help describe the magnitude of the federal fiscal effort and give some indication of the scope and variety of the education programs. Data in this chapter reflect outlays and obligations of federal agencies. These tabulations differ from federal receipts reported in other chapters because of numerous variations in the data collection systems. Federal dollars are not necessarily spent by recipient institutions in the same year they are appropriated. In some cases, institutions cannot identify the source of federal revenues because they flow through state agencies. Some types of revenues, such as tuition and fees, are reported as revenues from students even though they may be supported by federal student aid programs. Some institutions that receive federal education funds are not included in regular surveys conducted by the National Center for Education Statistics. Thus, the revenue data tabulated in this chapter are not comparable with figures reported in other chapters. Readers should be careful about comparing data on obligations shown in some tables with data on outlays and appropriations appearing in others.

Federal on-budget funding for education showed sizable growth between fiscal years (FYs) 1965 and 1997, after adjustment for inflation. Particularly large increases occurred between 1965 and 1975. After a period of small increases between 1975 and 1980, federal funding for education, excluding estimated federal tax expenditures for education, declined approximately 16 percent between 1980 and 1985 after adjustment for inflation. From 1985 to 1997, federal on-budget funding for education increased by 30 percent (table 357).

During the 1965 to 1975 period, after adjustment for inflation, federal funds for elementary and secondary education rose by 210 percent, postsecondary education by 263 percent, other education by 144 percent, and by 7 percent for research at educational institutions. Between 1975 and 1980, federal funding for elementary and secondary education rose by 2 percent and research by 14 percent, but postsecondary education fell slightly by 2 percent and other education fell by 35 percent. After declining 22 percent between 1980 and 1985, federal funding for elementary and secondary education programs rose

by 50 percent between 1985 and 1997. Postsecondary education fell by 25 percent between 1980 and 1985 then fell 4 percent between 1985 and 1997. Between 1985 and 1997, other education rose by 69 percent, and research by 25 percent, after adjustment for inflation (table 357).

According to FY 1997 estimates, \$31.1 billion or about 43 percent of the \$73.1 billion spent by the federal government on education came from the U.S. Department of Education. Large amounts of money also came from the U.S. Department of Health and Human Services (\$13.1 billion), the U.S. Department of Agriculture (\$9.7 billion), the U.S. Department of Labor (\$4.6 billion), the U.S. Department of Defense (\$3.7 billion), and the U.S. Department of Energy (\$2.6 billion) (table 358).

Fiscal year 1997 estimates call for federal program funds for elementary and secondary education to be \$36.6 billion; for postsecondary education, \$15.4 billion; for research at universities and related institutions, \$15.9 billion; and for other programs, \$5.1 billion (table 359).

Over 58 percent of total federal education support, excluding estimated federal tax expenditures, went to educational institutions in FY 97. Another 19 percent was used for student support. Banks and other lending agencies received 9 percent, and all other recipients, including libraries, museums, and federal institutions, received 14 percent (table 360).

Between FYs 1990 and 1997, U.S. Department of Education obligations rose 88 percent, after adjustment for inflation. Funds for student financial assistance increased to \$35.8 billion in 1997, a rise of 165 percent since 1990. Funds for elementary and secondary education were an estimated \$10.5 billion in 1997, an increase of 20 percent since 1990, after adjustment for inflation. Funds for the handicapped increased by 59 percent, to \$6.7 billion, and funds for vocational and adult education increased 10 percent, after adjustment for inflation (tables 38 and 361).

Of the \$31.1 billion spent by the U.S. Department of Education in FY 1997, about \$11.8 billion went to school districts, \$5.1 billion to institutions of higher education, \$5.1 billion to college students, and \$4.0 billion to state education agencies. A portion of the remaining \$5.2 billion went to banks to subsidize student loans (table 362).

Thirty-three percent of public elementary and secondary school students in the United States received publicly funded free or reduced-price lunches in 1993–94. At public elementary schools, the participation rate was 39 percent compared with 22 percent for public secondary schools (table 371).

About 13 percent of all elementary and secondary school children received Title I services in 1993–94. Federally sponsored Title I programs are designed to compensate the link between family poverty and low student achievement, particularly for children in schools with high concentrations of poverty. Children in rural areas (13 percent) and central cities (17 percent) were more likely to receive services than those in suburban areas (9 percent) (table 372).

Federal Education Legislation

A capsule view of the history of federal education activities is provided in the following list of selected legislation:

- 1787 Northwest Ordinance authorized land grants for the establishment of educational institutions.
- 1802 An Act Fixing the Military Peace Establishment of the United States established the U.S. Military Academy. (The U.S. Naval Academy was established in 1845 by the Secretary of the Navy.)
- 1862 First Morrill Act authorized public land grants to the states for the establishment and maintenance of agricultural and mechanical colleges.
- 1867 Department of Education Act authorized the establishment of the U.S. Department of Education.*
- **1876** Appropriation Act, U.S. Department of the Treasury, established the U.S. Coast Guard Academy.
- **1890** Second Morrill Act provided for money grants for support of instruction in the agricultural and mechanical colleges.
- 1911 State Marine School Act authorized federal funds to be used for the benefit of any nautical school in any of 11 specified state seaport cities.
- **1917** *Smith-Hughes Act* provided for grants to states for support of vocational education.

- 1919 An Act to Provide for Further Educational Facilities authorized the sale by the federal government of surplus machine tools to educational institutions at 15 percent of acquisition cost.
- **1920** *Smith-Bankhead Act* authorized grants to states for vocational rehabilitation programs.
- **1935** Bankhead-Jones Act (Public Law 74–182) authorized grants to states for agricultural experiment stations.
 - Agricultural Adjustment Act (Public Law 74—320) authorized 30 percent of the annual customs receipts to be used to encourage the exportation and domestic consumption of agricultural commodities. Commodities purchased under this authorization began to be used in school lunch programs in 1936. The National School Lunch Act of 1946 continued and expanded this assistance.
- 1936 An Act to Further the Development and Maintenance of an Adequate and Well-Balanced American Merchant Marine (Public Law 74–415) established the U.S. Merchant Marine Academy.
- **1937** National Cancer Institute Act established the Public Health Service fellowship program.
- 1941 Amendment to Lanham Act of 1940 authorized federal aid for construction, maintenance, and operation of schools in federally impacted areas. Such assistance was continued under Public Law 815 and Public Law 874, 81st Congress, in 1950.
- 1943 Vocational Rehabilitation Act (Public Law 78–16) provided assistance to disabled veterans.
 - School Lunch Indemnity Plan (Public Law 78–129) provided funds for local lunch food purchases.
- 1944 Servicemen's Readjustment Act (Public Law 78–346) known as the GI Bill, provided assistance for the education of veterans.
 - Surplus Property Act (Public Law 78–457) authorized transfer of surplus property to educational institutions.
- 1946 National School Lunch Act (Public Law 79—396) authorized assistance through grants-inaid and other means to states to assist in providing adequate foods and facilities for the establishment, maintenance, operation, and

447

^{*}The U.S. Department of Education as established in 1867 was later known as the Office of Education. In 1980, under Public Law 96–88, it became a cabinet-level department. Therefore, for purposes of consistency, it is referred to as the "U.S. Department of Education" even in those tables covering years when it was officially the Office of Education.

- George-Barden Act (Public Law 80-402) expanded federal support of vocational education.
- 1948 United States Information and Educational Exchange Act (Public Law 80–402) provided for the interchange of persons, knowledge, and skills between the United States and other countries.
- **1949** Federal Property and Administrative Services Act (Public Law 81–152) provided for donation of surplus property to educational institutions and for other public purposes.
- 1950 Financial Assistance for Local Educational Agencies Affected by Federal Activities (Public Law 81–815 and Public Law 81–874) provided assistance for construction (Public Law 815) and operation (Public Law 874) of schools in federally affected areas.
 - Housing Act (Public Law 81–475) authorized loans for construction of college housing facilities.
- 1954 An Act for the Establishment of the United States Air Force Academy and Other Purposes (Public Law 83–325) established the U.S. Air Force Academy.
 - Educational Research Act (Public Law 83–531) authorized cooperative arrangements with universities, colleges, and state educational agencies for educational research.
 - School Milk Program Act (Public Law 83–597) provided funds for purchase of milk for school lunch programs.
- 1956 Library Services Act (Public Law 84–597) provided grants to states for extension and improvement of rural public library services.
- 1957 Practical Nurse Training Act (Public Law 84–911) provided grants to states for practical nurse training.
- 1958 National Defense Education Act (Public Law 85–864) provided assistance to state and local school systems for strengthening instruction in science, mathematics, modern foreign languages, and other critical subjects; improvement of state statistical services; guidance, counseling, and testing services and training institutes; higher education student loans and fellowships; foreign language study and training provided by colleges and universities; experimentation and dissemination of information on more effective utiliza-

- tion of television, motion pictures, and related media for educational purposes; and vocational education for technical occupations necessary to the national defense.
- Education of Mentally Retarded Children Act (Public Law 85–926) authorized federal assistance for training teachers of the handicapped.
- Captioned Films for the Deaf Act (Public Law 85–905) authorized a loan service of captioned films for the deaf.
- **1961** Area Redevelopment Act (Public Law 87–27) included provisions for training or retraining of persons in redevelopment areas.
- 1962 Manpower Development and Training Act (Public Law 87–415) provided training in new and improved skills for the unemployed and underemployed.
 - Migration and Refugee Assistance Act of 1962 (Public Law 87–510) authorized loans, advances, and grants for education and training of refugees.
- 1963 Health Professions Educational Assistance Act of 1963 (Public Law 88–129) provided funds to expand teaching facilities and for loans to students in the health professions.
 - Vocational Education Act of 1963 (Part of Public Law 88–210) increased federal support of vocational education schools; vocational work-study programs; and research, training, and demonstrations in vocational education.
 - Higher Education Facilities Act of 1963 (Public Law 88–204) authorized grants and loans for classrooms, libraries, and laboratories in public community colleges and technical institutes, as well as undergraduate and graduate facilities in other institutions of higher education.
- 1964 Civil Rights Act of 1964 (Public Law 88–352) authorized the Commissioner of Education to arrange for support for institutions of higher education and school districts to provide inservice programs for assisting instructional staff in dealing with problems caused by desegregation.
 - Economic Opportunity Act of 1964 (Public Law 88–452) authorized grants for college workstudy programs for students from low-income families; established a Job Corps program and authorized support for work-training programs to provide education and vocational training and work experience opportunities in

welfare programs; authorized support of education and training activities and of community action programs, including Head Start, Follow Through, and Upward Bound; and authorized the establishment of Volunteers in Service to America (VISTA).

1965 Elementary and Secondary Education Act of 1965 (Public Law 89–10) authorized grants for elementary and secondary school programs for children of low-income families; school library resources, textbooks, and other instructional materials for school children; supplementary educational centers and services; strengthening state education agencies; and educational research and research training.

Health Professions Educational Assistance Amendments of 1965 (Public Law 89–290) authorized scholarships to aid needy students in the health professions.

Higher Education Act of 1965 (Public Law 89–329) provided grants for university community service programs, college library assistance, library training and research, strengthening developing institutions, teacher training programs, and undergraduate instructional equipment. Authorized insured student loans, established a National Teacher Corps, and provided for graduate teacher training fellowships.

National Foundation on the Arts and the Humanities Act (Public Law 89–209) authorized grants and loans for projects in the creative and performing arts and for research, training, and scholarly publications in the humanities.

National Technical Institute for the Deaf Act (Public Law 89–36) provided for the establishment, construction, equipping, and operation of a residential school for postsecondary education and technical training of the deaf.

School Assistance in Disaster Areas Act (Public Law 89–313) provided for assistance to local education agencies to help meet exceptional costs resulting from a major disaster.

1966 International Education Act (Public Law 89–698) provided grants to institutions of higher education for the establishment, strengthening, and operation of centers for research and training in international studies and the international aspects of other fields of study.

National Sea Grant College and Program Act (Public Law 89–688) authorized the establishment and operation of Sea Grant Colleges and programs by initiating and supporting programs of education and research in the various fields relating to the development of marine resources.

Adult Education Act (Public Law 89–750) authorized grants to states for the encouragement and expansion of educational programs for adults, including training of teachers of adults and demonstrations in adult education (previously part of Economic Opportunity Act of 1964).

Model Secondary School for the Deaf Act (Public Law 89–694) authorized the establishment and operation, by Gallaudet College, of a model secondary school for the deaf.

1967 Education Professions Development Act (Public Law 90–35) amended the Higher Education Act of 1965 for the purpose of improving the quality of teaching and to help meet critical shortages of adequately trained educational personnel.

Public Broadcasting Act of 1967 (Public Law 90–129) established a Corporation for Public Broadcasting to assume major responsibility in channeling federal funds to noncommercial radio and television stations, program production groups, and ETV networks; conduct research, demonstration, or training in matters related to noncommercial broadcasting; and award grants for construction of educational radio and television facilities.

1968 Elementary and Secondary Education Amendments of 1968 (Public Law 90–247) modified existing programs, authorized support of regional centers for education of handicapped children, model centers and services for deafblind children, recruitment of personnel and dissemination of information on education of the handicapped; technical assistance in education to rural areas; support of dropout prevention projects; and support of bilingual education programs.

Handicapped Children's Early Education Assistance Act (Public Law 90–538) authorized preschool and early education programs for handicapped children.

Vocational Education Amendments of 1968 (Public Law 90–576) modified existing programs and provided for a National Advisory Council on Vocational Education and collection and dissemination of information for pro-

grams administered by the Commissioner of Education.

- 1970 Elementary and Secondary Education Assistance Programs, Extension (Public Law 91–230) authorized comprehensive planning and evaluation grants to state and local education agencies; provided for the establishment of a National Commission on School Finance.
 - National Commission on Libraries and Information Services Act (Public Law 91–345) established a National Commission on Libraries and Information Science to effectively utilize the nation's educational resources.
 - Office of Education Appropriation Act (Public Law 91–380) provided emergency school assistance to desegregating local education agencies.
 - Environmental Education Act (Public Law 91–516) established an Office of Environmental Education to develop curriculum and initiate and maintain environmental education programs at the elementary-secondary levels; disseminate information; provide training programs for teachers and other educational, public, community, labor, and industrial leaders and employees; provide community education programs; and distribute material dealing with the environment and ecology.
 - Drug Abuse Education Act of 1970 (Public Law 91–527) provided for development, demonstration, and evaluation of curricula on the problems of drug abuse.
- 1971 Comprehensive Health Manpower Training Act of 1971 (Public Law 92–257) amended Title VII of the Public Health Service Act, increasing and expanding provisions for health manpower training and training facilities.
- 1972 Drug Abuse Office and Treatment Act of 1972
 (Public Law 92–255) established a Special Action Office for Drug Abuse Prevention to provide overall planning and policy for all federal drug-abuse prevention functions; a National Advisory Council for Drug Abuse Prevention; community assistance grants for community mental health centers for treatment and rehabilitation of persons with drugabuse problems, and, in December 1974, a National Institute on Drug Abuse.
 - Education Amendments of 1972 (Public Law 92–318) established the Education Division in the U.S. Department of Health, Education, and Welfare and the National Institute of Education; general aid for institutions of higher

- education; federal matching grants for state Student Incentive Grants; a National Commission on Financing Postsecondary Education: State Advisory Councils on Community Colleges; a Bureau of Occupational and Adult Education and State Grants for the design, establishment, and conduct of postsecondary occupational education; and a bureau-level Office of Indian Education. Amended current Office of Education programs to increase their effectiveness and better meet special needs. Prohibited sex bias in admission to vocational. professional. and graduate schools, and public institutions of undergraduate higher education.
- 1973 Older Americans Comprehensive Services Amendment of 1973 (Public Law 93–29) made available to older citizens comprehensive programs of health, education, and social services.
 - Comprehensive Employment and Training Act of 1973 (Public Law 93–203) provided for opportunities for employment and training to unemployed and underemployed persons. Extended and expanded provisions in the Manpower Development and Training Act of 1962, Title I of the Economic Opportunity Act of 1962, Title I of the Economic Opportunity Act of 1964, and the Emergency Employment Act of 1971 as in effect prior to June 30, 1973.
- 1974 Education Amendments of 1974 (Public Law 93–380) provided for the consolidation of certain programs; and established a National Center for Education Statistics.
 - Juvenile Justice and Delinquency Prevention Act of 1974 (Public Law 93–415) provided for technical assistance, staff training, centralized research, and resources to develop and implement programs to keep students in elementary and secondary schools; and established, in the U.S. Department of Justice, a National Institute for Juvenile Justice and Delinquency Prevention.
- 1975 Indian Self-Determination and Education Assistance Act (Public Law 93–638) provided for increased participation of Indians in the establishment and conduct of their education programs and services.
 - Harry S Truman Memorial Scholarship Act (Public Law 93–642) established the Harry S Truman Scholarship Foundation and created a perpetual education scholarship fund for

450

Indochina Migration and Refugee Assistance Act of 1975 (Public Law 94–23) authorized funds to be used for education and training of aliens who have fled from Cambodia or Vietnam.

Education for All Handicapped Children Act (Public Law 94–142) provided that all handicapped children have available to them a free appropriate education designed to meet their unique needs.

1976 Educational Broadcasting Facilities and Telecommunications Demonstration Act of 1976 (Public Law 94–309) established a telecommunications demonstration program to promote the development of nonbroadcast telecommunications facilities and services for the transmission, distribution, and delivery of health, education, and public or social service information.

Education Amendments of 1976 (Public Law 94–482) extended and revised federal programs for education assistance for higher education, vocational education, and a variety of other programs.

1977 Youth Employment and Demonstration Projects
Act of 1977 (Public Law 95–93) established a
youth employment training program that includes, among other activities, promoting
education-to-work transition, literacy training
and bilingual training, and attainment of certificates of high school equivalency.

Career Education Incentive Act (Public Law 95–207) authorized the establishment of a career education program for elementary and secondary schools.

1978 Tribally Controlled Community College Assistance Act of 1978 (Public Law 95–471) provided federal funds for the operation and improvement of tribally controlled community colleges for Indian students.

Education Amendments of 1978 (Public Law 95–561) established a comprehensive basic skills program aimed at improving pupil achievement (replaced the existing National Reading Improvement program); and established a community schools program to provide for the use of public buildings.

Middle Income Student Assistance Act (Public Law 95-566) modified the provisions for student financial assistance programs to allow middle-income as well as low-income students attending college or other postsecondary institutions to qualify for federal education assistance.

1979 Department of Education Organization Act (Public Law 96–88) established a U.S. Department of Education containing functions from the Education Division of the U.S. Department of Health, Education, and Welfare along with other selected education programs from HEW, the U.S. Department of Justice, U.S. Department of Labor, and the National Science Foundation.

1980 Asbestos School Hazard Detection and Control Act of 1980 (Public Law 96–270) established a program for inspection of schools for detection of hazardous asbestos materials and provided loans to assist educational agencies to contain or remove and replace such materials.

1981 Education Consolidation and Improvement Act of 1981 (Part of Public Law 97–35) consolidated 42 programs into 7 programs to be funded under the elementary and secondary block grant authority.

1983 Student Loan Consolidation and Technical Amendments Act of 1983 (Public Law 98–79) established 8 percent interest rate for Guaranteed Student Loans and extended Family Contribution Schedule.

Challenge Grant Amendments of 1983 (Public Law 98–95) amended Title III, Higher Education Act, and added authorization of Challenge Grant program. The Challenge Grant program provides funds to eligible institutions on a matching basis as incentive to seek alternative sources of funding.

Education of the Handicapped Act Amendments of 1983 (Public Law 98–199) added the Architectural Barrier amendment and clarified participation of handicapped children in private schools.

1984 Education for Economic Security Act (Public Law 98–377) added new science and mathematics programs for elementary, secondary, and postsecondary education. The new programs included magnet schools, excellence in education, and equal access.

Carl D. Perkins Vocational Education Act (Public Law 98–524) continued federal assistance for vocational education through FY 1989. The act replaced the Vocational Education Act of 1963. It provided aid to the states to make vocational education programs acces-

- Human Services Reauthorization Act (Public Law 98–558) reauthorized the Head Start and Follow Through programs through FY 1986. It also created a Carl D. Perkins scholarship program, a National Talented Teachers Fellowship program, a Federal Merit Scholarships program, and a Leadership in Educational Administration program.
- 1985 Montgomery GI Bill—Active Duty (Public Law 98–525), brought about a new GI Bill for individuals who initially entered active military duty on or after July 1, 1985.
 - Montgomery GI Bill—Selected Reserve (Public Law 98–525), is an education program for members of the Selected Reserve (which includes the National Guard) who enlist, reenlist, or extend an enlistment after June 30, 1985, for a 6-year period.
- 1986 Handicapped Children's Protection Act of 1986
 (Public Law 99–372) allowed parents of handicapped children to collect attorneys' fees in cases brought under the Education of the Handicapped Act and provided that the Education of the Handicapped Act does not preempt other laws, such as Section 504 of the Rehabilitation Act
 - Drug-Free Schools and Communities Act of 1986 (Part of Public Law 99–570), part of the Anti-Drug Abuse Act of 1986, authorized funding for FYs 1987–89. Established programs for drug abuse education and prevention, coordinated with related community efforts and resources, through the use of federal financial assistance.
- 1987 Higher Education Act Amendments of 1987 (Public Law 100–50) made technical corrections, clarifications, or conforming amendments related to the enactment of the Higher Education Amendments of 1986.
- 1988 Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 (Public Law 100–297) reauthorized through 1993 major elementary and secondary education programs including: Chapter 1, Chapter 2, Bilingual Education, Math-Science Education, Magnet Schools, Impact Aid, Indian Education, Adult Education, and other smaller education programs.
 - Technology-Related Assistance for Individuals with Disabilities Act of 1988 (Public Law 100-

- 407) provided financial assistance to states to develop and implement consumer-responsive statewide programs of technology-related assistance for persons of all ages with disabilities.
- Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (Public Law 100–628) extended for 2 additional years programs providing assistance to the homeless, including literacy training for homeless adults and education for homeless youths.
- Tax Reform Technical Amendments (Public Law 100–647) authorized an Education Savings Bond for the purpose of postsecondary educational expenses. The bill grants tax exclusion for interest earned on regular series EE savings bonds.
- 1989 Children with Disabilities Temporary Care Reauthorization Act of 1989 (Public Law 101– 127) revised and extended the programs established in the Temporary Child Care for Handicapped Children and Crises Nurseries Act of 1986.
 - Drug-Free Schools and Communities Act Amendments of 1989 (Public Law 101–226) amended the Drug-Free Schools and Communities Act of 1986 to revise certain requirements relating to the provision of drug abuse education and prevention programs in elementary and secondary schools.
 - Childhood Education and Development Act of 1989 (Part of Public Law 101–239) authorized the appropriations to expand Head Start Programs and programs carried out under the Elementary and Secondary Education Act of 1965 to include child care services.
- 1990 Excellence in Mathematics, Science and Engineering Education Act of 1990 (Public Law 101–589) promotes excellence in American mathematics, science, and engineering education by creating a national mathematics and science clearinghouse, and creating several other mathematics, science, and engineering education programs.
 - Student Right-To-Know and Campus Security Act (Public Law 101–542) requires institutions of higher education receiving federal financial assistance to provide certain information with respect to the graduation rates of student-athletes at such institutions. The act also requires the institution to certify that it has a campus security policy and will annually submit a uniform crime report to the Federal Bureau of Investigation (FBI).

452

National and Community Service Act of 1990 (Public Law 101–610) increased school and college-based community service opportunities and authorized the President's Points of Light Foundation.

School Dropout Prevention and Basic Skills Improvement Act of 1990 (Public Law 101–600) improves secondary school programs for basic skills improvements and dropout reduction.

Asbestos School Hazard Abatement Reauthorization Act of 1990 (Public Law 101–637) reauthorized the Asbestos School Hazard
Abatement Act of 1984, which provided financial support to elementary and secondary
schools to inspect for asbestos and to develop and implement an asbestos management plan.

Eisenhower Exchange Fellowship Act of 1990 (Public Law 101–454) provided a permanent endowment for the Eisenhower Exchange Fellowship Program.

Public Service Assistance Education Act (Enacted as part of Department of Defense Authorization Act, Public Law 101–510) gave federal agencies authority to provide new educational benefits to employees by paying for an employee to obtain an academic degree for which there is an agency shortage of qualified personnel, and by repaying up to \$6,000 per year of the student loan of a qualified employee in exchange for a 3-year commitment.

Omnibus Budget Reconciliation Act of 1990 (Public Law 101–508) included a set of student aid provisions that were estimated to yield a savings of \$2 billion over 5 years. These provisions included delayed Guaranteed Student Loan disbursements, tightened ability-to-benefit eligibility, and expanded pro rata refund policy and the elimination of student aid eligibility at high default schools.

1991 National Literacy Act of 1991 (Public Law 102–73) established the National Institute for Literacy, the National Institute Board, and the Interagency Task Force on Literacy. Amended various federal laws to establish and extend various literacy programs.

National Defense Authorization Act for Fiscal Years 1992 and 1993 (Public Law 102–190) authorized appropriations for military functions of the U.S. Department of Defense. Included Defense Manufacturing Education Program and planning for science, mathematics, and engineering education.

National Commission on Time and Learning Act (Public Law 102–62) established the National Education Commission on Time and Learning. Directed the Secretary of Education to: (1) make grants for research in the teaching of writing; and (2) carry out a program to educate students about the history and principles of the Constitution, including the Bill of Rights. Established the National Council on Education Standards and Testing.

High-Performance Computing Act of 1991 (Public Law 102–194) directed the President to implement a National High-Performance Computing Program. Provided for: (1) establishment of a National Research and Education Network; (2) standards and guidelines for high performance networks; and (3) the responsibility of certain federal departments and agencies with regard to the Network.

Veterans' Educational Assistance Amendments of 1991 (Public Law 102–127) restored certain educational benefits available to reserve and active-duty personnel under the Montgomery GI Bill to students whose course studies were interrupted by the Persian Gulf War.

Civil Rights Act of 1991 (Public Law 102–166) amended the Civil Rights Act of 1964, the Age Discrimination in Employment Act of 1967, and the Americans with Disabilities Act of 1990, with regard to employment discrimination. Established the Technical Assistance Training Institute.

1992 Higher Education Amendments of 1992 (Public Law 102–325) amended the Higher Education Act of 1965 to revise and reauthorize funding for its various programs.

Ready-To-Learn Act (Public Law 102–545) amended the General Education Provisions Act to establish Ready-To-Learn Television programs to support educational programming and support materials for preschool and elementary school children and their parents, child care providers, and educators.

National Commission on Time and Learning, Extension (Public Law 102–359) amended the National Education Commission on Time and Learning Act to extend the authorization of appropriations for such Commission,

amended the Elementary and Secondary Education Act of 1965 to revise provisions for (1) a specified civic education program; (2) schoolwide projects for educationally disadvantaged children, and provided for additional Assistant Secretaries of Education.

1993 Student Loan Reform Act (Public Law 103-66) reformed the student aid process by phasing in a system of direct lending designed to provide savings for taxpayers and students. Allows students to choose among a variety of repayment options, including income contingency.

National Service Trust Act (Public Law 103-82) amended the National and Community Service Act of 1990 to establish a Corporation for National Service and enhance opportunities for national service. In addition, the Act provided education grants up to \$4,725 per year for 2 years to people age 17 years or older who perform community service before, during, or after postsecondary education.

NAEP Assessment Authorization (Public Law 103-33) authorizes the use of NAEP for state-by-state comparisons.

Migrant Student Record Transfer System Extension (Public Law 103-59) extends the operation of the migrant student record transfer system.

1994 Goals 2000: Educate America Act (Public Law 103-227) established a new federal partnership through a system of grants to states and local communities to reform the nation's education system. The Act formalized the national education goals and established the National Education Goals Panel. It also created a National Education Standards and Improvement Council (NESIC) to provide voluntary national certification of state and local education standards and assessments and established the National Skill Standards Board to develop voluntary national skill standards.

> School-To-Work Opportunities Act of 1994 (Public Law 103-239) established a national framework within which states and communities can develop School-To-Work Opportunities systems to prepare young people for first jobs and continuing education. The Act also provided money to states and communities to develop a system of programs that include work-based learning, school-based learning, and connecting activities components. School-To-Work programs will provide

students with a high school diploma (or its equivalent), a nationally recognized skill certificate, or an associate degree (if appropriate) and may lead to a first job or further education.

Safe Schools Act of 1994 (Part of Public Law 103-227) authorized the award of competitive grants to local educational agencies with serious crime to implement violence prevention activities such as conflict resolution and peer mediation.

Educational Research, Development, Dissemination, and Improvement Act of 1994 (Part of Public Law 103-227) authorized the educational research and dissemination activities of the Office of Educational Research and Improvement. The regional educational laboratories and university-based research and development centers are authorized under this act.

Student Loan Default Exemption Extension (Public Law 103-235) amended the Higher Education Act of 1965 to extend until July 1. 1998, the effective date for cohort default rate extension for Historically Black Colleges and Universities, tribally controlled community colleges, and Navajo community colleges.

Improving America's Schools Act (Public Law 103-382) reauthorized and revamps the Elementary and Secondary Education Act. The legislation includes Title I, the federal government's largest program providing educational assistance to disadvantaged children; professional development and technical assistance programs; a safe and drug-free schools and communities provision; and provisions promoting school equity.

1995

Amendment to the Elementary and Secondary Education Act of 1965 (Public Law 104-5) amended a provision of Part A of Title IX of the Elementary and Secondary Education Act of 1965 relating to Indian education, to provide a technical amendment and for other purposes.

1996 Contract With America: Unfunded mandates (Public Law 104-4) a bill to curb the practice of imposing unfunded federal mandates on states and local governments; to strengthen the partnership between the federal government and state, local, and tribal governments; to end the imposition, in the absence of full consideration by Congress, of federal mandates on state, local, and tribal governments

without adequate funding, in a manner that may displace other essential governmental priorities and to ensure that the federal government pays the costs incurred by those governments in complying with certain requirements under federal statutes and regulations; and for other purposes.

Developmental Disabilities Assistance and Bill of Rights Act Amendments of 1996 (Public Law 104–1834) amended the Developmental Disabilities Assistance and Bill of Rights Act to extend the act, and for other purposes.

Remove grant limits on historically black colleges (Public Law 104–141) amended section 326 of the Higher Education Act of 1965 to

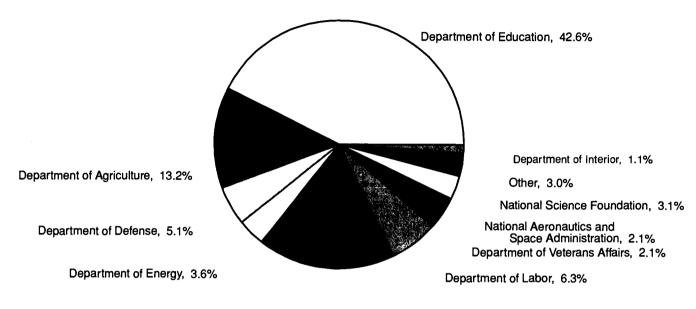

permit continued participation by historically black graduate and professional schools in the grant program authorized by that section.

Correct impact-aid payments (Public Law 104–195) amends the Impact Aid Program to provide for a hold-harmless with respect to amounts for payments relating to the federal acquisition of real property, and for other purposes.

Human Rights, Refugee, and Other Foreign Relations Provisions Act of 1996 (Public Law 104–319) made certain provisions with respect to internationally recognized human rights, refugees, and foreign relations to revise U.S. human rights policy.

"Federal Tax Expenditures, FY 1984 to FY 1989," and "Federal Tax Expenditures, FY 1970 to FY 1990" by Stephen M. Barro, prepared for the National Center for Education Statistics; and unpublished data obtained from various federal agencies. (This table was prepared May 1997.)

²The Federal Direct Student Loan (FDSL) program, recently renamed the William D. Ford Direct Loan program, provides students with the same benefits they are currently eligible to receive under the Federal Family Education Loan (FFEL) program but provides loans to students through federal capital rather than through private lenders. This program is an off-budget support program.

³ Formerly the Guaranteed Student Loan program. New student loans guaranteed by the federal government and disbursed to borrowers.

⁴ Student loans created from institutional matching funds (1/3 of the federal contribution). Excludes repayments of outstanding loans.

⁵Student loans created from institutional matching funds (1/9 of the federal contribution). This was a demonstration project that involved only 10 institutions and had unsubsidized interest rates.

 $^{^{\}rm 8}$ Employer contributions to student earnings.

Footnotes

¹ Excludes \$4,440,000,000 for federal support for medical education benefits under Medicare in the U.S. Department of Health and Human Services. Is not included in the total because data before fiscal year 1990 are not available. This program has existed since Medicare began, but was not available as a separate budget item until FY 90.

² Excludes \$4,900,000,000 for federal support for medical education benefits under Medicare in the U.S. Department of Health and Human Services. Is not included in the total because data before fiscal year 1990 are not available. This program has existed since Medicare began, but was not available as a separate budget item until FY 90.

³ Excludes \$5,350,000,000 for federal support for medical education benefits under Medicare in the U.S. Department of Health and Human Services. Is not included in the total because data before fiscal year 1990 are not available. This program has existed since Medicare began, but was not available as a separate budget item until FY 90.

⁴Excludes \$5,710,000,000 for federal support for medical education benefits under Medicare in the U.S. Department of Health and Human Services. Is not included in the total because data before fiscal year 1990 are not available. This program has existed since Medicare began, but was not available as a separate budget item until FY 90.

⁵ Excludes \$6,150,000,000 for federal support for medical education benefits under Medicare in the U.S. Department of Health and Human Services. Is not included in the total because data before fiscal year 1990 are not available. This program has existed since Medicare began, but was not available as a separate budget item until FY 90.

⁶ Excludes \$7,510,000,000 for federal support for medical education benefits under Medicare in the U.S. Department of Health and Human Services. Is not included in the total because data before fiscal year 1990 are not available. This program has existed since Medicare began, but was not available as a separate budget item until FY 90.

⁷ Excludes \$8,010,000,000 for federal support for medical education benefits under Medicare in the U.S. Department of Health and Human Services. Is not included in the total because data before fiscal year 1990 are not available. This program has existed since Medicare began, but was not available as a separate budget item until FY 90.

⁸ Estimated. Excludes \$8,700,000,000 for federal support for medical education benefits under Medicare in the U.S. Department of Health and Human Services. Is not included in the total because data before fiscal year 1990 are not available. This program has existed since Medicare began, but was not available as a separate budget item until FY 90.

⁹ The U.S. Department of Education was created in May 1980. It formerly was the Office of Education in the U.S. Department of Health, Education, and Welfare. ¹⁰ Section VI was funded by the U.S. Department of Education in FYs 65–81 in the Impact Aid program. This program provides for the education of dependents of federal employees residing on federal property in cases where free public education is available only in the nearby community.

11 This program creates a national framework for education reform and meeting the National Education Goals. This program includes the School-To-Work Opportunities program which will initiate a national system to be administered jointly by the U.S. Departments of Education and Labor. Both departments are to establish a national framework within which all states can create statewide systems to help youth acquire the knowledge, skills, abilities, and labor market information they need to make an effective transition from school to work or to further their education or training.

12 Starting in FY 94, the Special Milk program was included in the Child Nutrition program.

¹³ These commodities are purchased under Section 32 of the Act of August 24, 1935, for use in the child nutrition programs.

14 This program assisted in the construction of public facilities, such as vocational schools, through grants or loans. No funds have been appropriated for this account since FY 77, and it was completely phased out in FY 84 after the monitoring of closeouts of projects was completed. Data are not available for previous years.

¹⁵The U.S. Department of Energy was created in 1977. It formerly was the Energy Research and Development Administration and before that the Atomic Energy Commission. No funds were designated for any of the education programs listed on this table in the U.S. Department of Energy in FYs 96 and 97, due to budget cuts.

¹⁶ This program was established in 1979. Funds were first appropriated for this program in FY 80.

¹⁷ The U.S. Department of Health and Human Services was part of the U.S. Department of Health, Education, and Welfare until May 1980.

¹⁸The Head Start program was formerly in the Office of Economic Opportunity, and funds were appropriated to the U.S. Department of Health, Education, and Welfare, Office of Child Development, beginning in 1972.

¹⁹ This program was created by the Family Support Act of 1988. It provides funds for the Job Opportunities and Basic Skills Training program.

²⁰ After age 18, benefits terminate at the end of the school term or in 3 months, whichever is less.

²¹ This program provides funding for supplemental programs for eligible Indian students in public schools.

²² Negative amounts occur when program receipts exceed out-

²³ This program finances the cost of academic, social, and occupational education courses for inmates in federal prisons.

Footnotes—Continued

²⁴The Job Corps program was formerly in the Office of Economic Opportunity, and funds were appropriated to the U.S. Department of Labor beginning in 1971 and 1972.

²⁵Some of the work and training programs included in this program were in the Office of Economic Opportunity and were transferred to the U.S. Department of Labor in 1971 and 1972. Beginning in FY 94, the School-to-Work Opportunities program is included. This program is administered jointly by the U.S. Departments of Education and Labor.

²⁶The U.S. Department of Transportation was created in 1967.
²⁷This program was transferred from the U.S. Department of the Treasury to the U.S. Department of Transportation in 1967.

²⁸ This program was established in FY 72 and closed in FY 86.
²⁹ The states' share of revenue-sharing funds could not be spent on education in FYs 81–86.

³⁰ The U.S. Department of Veterans Affairs, formerly the Veterans Administration, was created in March 1989.

³¹ This program provides educational assistance allowances in order to restore lost educational opportunities to those individuals whose careers were interrupted or impeded by reason of active military service between January 31, 1955, and January 1, 1977. Includes "Readjustment Benefits," Chapter 34, for education other than college and also includes the Veterans Job Training program for service persons and veterans. The Chapter 34 program closed December 31, 1989. The Veterans Job Training Program was put in the program Payments to State Education Agencies. Veterans who were still eligible to receive benefits under Chapter 34 were covered by Chapter 30 (The All-Volunteer-Force Educational Assistance program).

32 This program is in "Readjustment Benefits" program, Chapter 31, and covers the costs of subsistence, tuition, books, supplies, and equipment for disabled veterans requiring vocational rehabilitation.

33 This program is in the "Readjustment Benefits" program, Chapter 35, and provides benefits to children and spouses of veterans.

³⁴The purpose of this program is to provide stable and permanent employment to those men and women who have served on active duty on or after August 2, 1990, and are unemployed.

³⁵This agency was established March 9, 1965. Its first year of appropriations was 1966. The outlays were larger in the years 1970 and 1975 for elementary and secondary education because of the construction of facilities for vocational schools.

³⁶This agency was established in 1965. In 1970, \$900,000 was appropriated through the Office of Education, U.S. Department of Health, Education, and Welfare, for the National Endowment for the Arts, Arts in Education program.

³⁷ This agency was established in 1965. First year of appropriations was 1966.

38 The Economic Opportunity Act of 1964 authorized 10 major action programs, including Job Corps, Neighborhood Youth Corps, Adult Literacy, Work Experience, College Work-Study, and Community Action programs, including Head Start, Follow Through, and Upward Bound, and authorized the establishment of Volunteers in Service to America (VISTA). These programs were transferred to the U.S. Department of Health, Education, and Welfare, U.S. Department of Labor, and the Action Agency in the 1970s. An act on January 4, 1975 established the Community Services Administration as the successor agency to the Office of Economic Opportunity.

³⁹ Head Start program funds were transferred to the U.S. Department of Health, Education, and Welfare, Office of Child Development. in 1972.

⁴⁰ Most of these programs were transferred to the U.S. Department of Health, Education, and Welfare, Office of Education, in 1972.

⁴¹ The Job Corps programs were transferred to the U.S. Department of Labor in 1971 and 1972.

⁴²These programs were transferred to the U.S. Department of Labor in 1971 and 1972.

⁴³These programs were transferred to the Action Agency in 1972.

⁴⁴ Similar programs were included in the "higher education" program in 1965 through 1975.

⁴⁵The Student Loan Reform Act of 1993 authorized a new Federal Direct Student Loan (FDSL) program, recently renamed the William D. Ford Direct Loan program. This program is a new streamlined lending system that simplifies the process of obtaining and repaying loans for student and parent borrowers and provides borrowers with greater choice in repayment plans. The FDSL program was phased in beginning with the 1994–95 academic year.

⁴⁶ Similar programs were included in the "higher education" program in 1965 through 1975, formerly called the "Guaranteed Student Loan" program.

⁴⁷ This program was transferred from the U.S. Department of Housing and Urban Development to the U.S. Department of Health, Education, and Welfare, Office of Education, in FY 79.

⁴⁸ The Historically Black Colleges and Universities (HBCUs) Capital Financing program was authorized by the Higher Education Act Amendments of 1992 to provide HBCUs with private funds for projects such as repairs, renovation and construction of classrooms, libraries, laboratories, dormitories, instructional equipment, and research instruments.

⁴⁹ First year of appropriations for this program was 1967.

⁵⁰ Program funds were first appropriated for Tuskegee Institute in 1972.

51 The Sea Grant College Program Act of 1966 established a matching fund grant program that provides for the establishment of a network of programs in fields related to development and preservation of the nation's coastal and marine resources. This program was transferred from the National Science Foundation to the U.S. Department of Commerce, October 1970. Appropriations began in 1968.

Footnotes—Continued

52 This program was transferred to the U.S. Department of Transportation in FY 81 by Public Law 97-31, from the U.S. Department of Commerce.

53 The U.S. Department of Defense funds for FYs 90 to 96 exclude military pay and reserve accounts which were included in previous years. FY 65 data are not available except for service academies.

54 Included in total above.

55 Instructional costs only are included. These include academics, audiovisual, academic computing center, faculty training, mili-

tary training, physical education, and libraries.

56 Includes special education programs (military and civilian); legal education program; flight training; advanced degree program; college degree program (officers); and "Armed Forces Health Professions Scholarship" program.

⁵⁷No funds have been appropriated for this program since FY

82.

58 This program receives funds periodically.

58 This program receives funds periodically.

59 Appropriations began in FY 84.

60 Appropriations began in FY 89.

⁶¹ Does not include higher education assistance loans.

62 Appropriations began in FY 78.

63 Alcohol, drug abuse, and mental health training programs are included starting in fiscal year 1992.

64 Beginning in fiscal year 1992, data were included in the Na-

tional Institutes of Health training grants program.

65 Postsecondary student benefits were ended by the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) and were completely phased out by August 1985.

66 Includes adult education, tribally-controlled community col-

leges, postsecondary instruction, and other education.

⁶⁷ This program was transferred from the U.S. Department of State to the International Communication Agency (I.C.A.) in the Reorganization Plan No. 2 of 1977, which consolidated the functions of the U.S. Information Agency (U.S.I.A.) and the U.S. Department of State's Bureau of Educational and Cultural Affairs. In FY 82 the I.C.A. became the U.S.I.A.

⁶⁸ This program provides funds for advanced study and research projects of the Russian, Eurasian, and Eastern European countries by American institutions of higher education and private research firms. Appropriations began in FY 88.

69 This program was transferred to the U.S. Department of Transportation in FY 81 by Public Law 97-31 from the U.S. De-

partment of Commerce.

70 Includes flight training. This program was in the U.S. Department of the Treasury in 1965 and was transferred to the U.S. De-

partment of Transportation in 1967.

71 Includes benefits for Vietnam-era veterans under Chapter 34 (GI Bill) of the "Readjustment Benefits" education and training program. This program provides educational assistance allowances, primarily on a monthly basis, in order to restore lost educational opportunities to those individuals whose careers were interrupted or impeded by reason of active military service between January 31, 1955, and January 1, 1977. This program closed December 31, 1989. Some veterans who were still eligible were put in Chapter 30 (the All-Volunteer-Force Educational Assistance program).

72 Includes service persons under Chapter 34 (Gl Bill) of the "Readjustment Benefits" education and training program. Service persons with over 180 days of active duty, any part of which was before January 1, 1977, are eligible to participate in this program.

73 Includes post-Vietnam-era veterans, under Chapter 32, of the post-Vietnam-era "Veterans Education Account." Provides education and training assistance payments to veterans and service persons with no active duty time before January 1, 1977. Funding is provided through participants' contributions while on active duty and through transfers from the U.S. Department of Defense (DOD). Participants' contributions, up to a maximum of \$2,700, are deposited to the fund prior to discharge. When the participant enters training, the monthly disbursement from his or her account is matched two for one from funds provided by DOD. Additional amounts in the form of incentive bonuses may also be provided by DOD funds. The U.S. Department of Veterans Affairs funds are not appropriated for this program, so these data represent obligations, which are funded through other agencies' appropriations.

⁷⁴ Public Law 98-525, enacted October 19, 1984 (New GI Bill), established two new peacetime educational programs; an assistance program for veterans who entered active duty during the period beginning July 1, 1985, and ending on June 30, 1988, and an assistance program for certain members of the Selected Reserve.

75 Chapter 30, also called the Montgomery Bill, and the new GI Bill are for eligible veterans who have agreed to have their military pay reduced \$100 per month for their first 12 months of active duty in order to participate in this program. The "Readjustment Benefits" account under the U.S. Department of Veterans Affairs pays only the basic allowance, up to a maximum of \$300 per month, for full-time training. "Supplemental Benefits" are paid by the U.S. Department of Defense (DOD).

76 Chapter 106 is for members of the Selected Reserve. The reserve components include the Army, Navy, Air Force, Marine Corps Reserve, Army National Guard and Air National Guard under the U.S. Department of Defense (DOD), and the Coast Guard Reserve, which is under the U.S. Department of Transportation (DOT) when it is not operating as a service in the Navy. Eligible persons can receive up to \$140 per month for full-time training. The DOD and DOT pay for this program, and the U.S. Department of Veterans Affairs administers it.

77 Includes dependents of veterans under Chapter 35, the "Readjustment Benefits" education and training program. Provides education and training benefits to dependents of veterans who died of a service-connected disability or whose service-connected disability is rated permanent and total.

⁷⁸ These payments have been made to state education agencies for a number of years but were not a separate budget item until FY 88.

⁷⁹ The U.S.I.A. was called the "International Communication Agency" in FYs 80 and 81.

80 This program was in the "Educational and Cultural Affairs" program in FYs 80-83, and became an independent program in

81 This program was combined with the "Educational and Cultural Affairs" program in FY 77.

82 Public Law 99-661 established this program to operate the scholarship program in tribute to the former Senator from Arizona. The Foundation awards scholarships and fellowships to outstanding graduate and undergraduate students who intend to pursue careers or advanced degrees in science or mathematics. The Foundation may also award honoraria to outstanding individuals who have made significant contributions to improve the instruction of science and mathematics in secondary schools.

83 Appropriations for this program began in FY 76.

84 Public Law 99-498 established this Institute as an independent non-profit corporation administered by a Board of Trustees. The Institute provides Native Americans with an opportunity to obtain a postsecondary education in various fields of Indian art and

85 Public Laws 99-500 and 99-591 established the James Madison Memorial Fellowship Foundation to operate a fellowship program to encourage graduate study of the American Constitution. First year of appropriations was FY 88.

86 This program will be transferred to the Institute of Museum and Library and Library Services beginning in fiscal year 1998.

87 This program was transferred to the U.S. Department of Transportation in FY 68 from the U.S. Department of Housing and Urban Development.

Footnotes—Continued

⁸⁸ This program was established by the Juvenile Justice and Delinquency Prevention Act of 1974 to provide education and training and to provide leadership in improving correctional programs and practices in prisons. FY 75 had large outlays because of the construction of buildings and facilities.

89 Appropriations for this program began in FY 70. This program is part of the Federal-Aid Highway Act of 1970, Public Law 91-

605.

90 The Federal Aviation Administration, originally an independent agency, was transferred to the U.S. Department of Transportation in FY 67.

⁹¹ Appropriations began in FY 72. No funds have been appropriated since FY 82.

92 First year of appropriations was FY 70.

⁹³ The National Service Trust Act of 1993 established a new agency, the Corporation for National and Community Service. On October 1, 1993, ACTION became part of the Corporation for National and Community Service—ACTION was established on July 1, 1971. This agency brings together a number of volunteer programs. Some of these funds were formerly in the Office of Economic Opportunity.

94 These programs included the Service Learning programs, University Year for ACTION, Volunteers in Service to America, Youth Challenge program, and the National Student Volunteer program in FY 1975. In FY 80, programs included were the University Year for ACTION, Young Volunteers for ACTION, and National Service Learning programs. In fiscal year 1985, the program included was the Service Learning programs, and in FYs 89 to 94, programs included were the Literacy Corps and the Student Community Services program. In FYs 94 through 97 the AmeriCorps program was included. This program provides education grants of up to \$4,725 per year, for up to 2 years, to help pay for college or to repay student loans for people age 17 years or older who perform community service before, during or after postsecondary education.

⁹⁵The Federal Emergency Management Agency was created on March 25, 1979, representing a combination of five existing agencies. The two largest were the Defense Civil Preparedness Agency in the U.S. Department of Defense and the Federal Preparedness Agency in the General Services Administration. The funds for the Federal Emergency Management Agency in FY 70 to FY 75 were in the other agencies.

96 First year of appropriations was FY 68.

97 First appropriations for the "other training programs" were in the late 1960s. These programs include the Fall-Out Shelter Analysis, Blast Protection Design through 1992. Starting in FY 1993, earthquake training and safety for teachers and administrators for grades 1 through 12 are included.

⁹⁸ The disaster relief program repairs and replaces damaged and destroyed school buildings. In FY 94 and FY 95 funds were for repairs due to the Northridge Earthquake in California. In FY 94, \$37.2 million was spent on school districts; \$4.2 million was spent on community colleges and \$43.8 million spent on universities. In FY 95, \$74.4 million was spent on school districts; \$8.4 million on community colleges and \$87.6 million on colleges and universities.

⁹⁹This program was transferred from the General Services Administration to the National Archives and Records Administration in April 1985.

100 This program makes grants for the promotion of scholarly, cultural, and artistic exchanges between Japan and the United States. Appropriations began in FY 76.

101 The National Archives and Records Administration became an independent agency in April 1985.

¹⁰²This program was established by the act of July 20, 1970, Public Law 91–345.

103 This program was established by Congress to conduct and support research and scholarships in the fields of peace, arms control, and conflict resolution. This program began operation in February 1986.

104 Includes federal obligations for research and development centers administered by colleges and universities. FYs 96 and 97 are estimated.

¹⁰⁵Total outlays for FYs 65 and 70 include the "Research and Training" program. FY 75 includes the "National Institute of Education" program. FYs 80 to 97 include outlays for the Office of Educational Research and Improvement.

—Data not available or not applicable.

NOTE.—Some data have been revised from previously published figures. To the extent possible, amounts reported represent outlays rather than obligations. Because of rounding, details may not add to totals.

² Estimated.

Includes preschool incentive grants.

Includes programs of national significance and special programs for the disadvan-

taged.

5 Includes national programs for research, demonstrations, evaluation and technical assistance, literacy training for homeless adults, and some other small programs.

6 includes Pell Grants, Supplemental Education Opportunity Grants, State Student In-

centive Grants, and Income Contingent Loans.

⁷ Formerly the Guaranteed Student Loan program.

Fromeny the Guaranteed Student Loan program.

Includes Federal Direct Student Loan program starting in fiscal year 1994.

This program starting in fiscal year 1994 is included under the program, "Funds for Improvement of Postsecondary Education."

¹⁰ International education and foreign languages are included under this program start-

ing in fiscal year 1994.

11 This program is included under the "Special programs for the disadvantaged" pro-

[—]Data are not available or not applicable.

¹ Title I, formerly called Chapter 1, Education Consolidation and Improvement Act of 1981, includes Grants to Local Education Agencies, Migrant Education—Basic State Grants, Program for Neglected and Delinquent Children, Capital Expenses, and Even Stath—State Educational Agencies.

Start—State Educational Agencies.

² Title VI, formerly called Chapter 2 Education Consolidation and Improvement Act of 1981, includes Eisenhower Professional Development Grants, Drug-Free Schools and Communities—State Grants, Education for Homeless Children and Youth, and Innovative Education Program Strategies.

³ Impact Aid—Basic Support Payments and Impact Aid—Payments for Children with Disabilities.

 Includes Vocational Education—Basic Grants to States, Tech-Prep Education, and Adult Education-State Grant Program.

5 Includes Special Education—Grants to States, Preschool Grants, Special Education—Grants for Infants and Families with Disabilities, and Education of Children with Disabilities.

⁶ Includes Emergency Immigrant Education Program and Bilingual Education State Grants.

⁷ Includes Institutional Aid to Strengthen Higher Education Institutions serving significant numbers of low-income students, Other Special Programs for the Disadvantaged, Cooperative Education, Fund for the Improvement of Postsecondary Education, Fellowships and Scholarships, and annual interest subsidy grants for facilities construction.

⁸ Includes Pell Grants, State Student Incentive Grants, and Guaranteed Student Loan interest subsidies.

⁹ Includes Public Library Services, Public Library Construction and Technology Enhancement, and Interlibrary Cooperation and Resource Sharing.

¹º Includes Rehabilitation Services—Vocational Rehabilitation Grants to States, Supported Employment Services for Individuals with Severe Disabilities, Rehabilitation Services—Client Assistance Program, Independent Living—State Grants, and Program of Protection and Advocacy of Individual Rights.

11 Includes State and Local Education Systemic Improvement Grants.

NOTE.—Data reflect revisions to figures in the *Budget of the United States Government, Fiscal Year 1998.* To the extent possible, data represent obligations rather than outlays. Because of the exclusion of certain programs, totals in this table are lower than those reported in other tables. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, based on unpublished tabulations from the Office of Management and Budget; and U.S. Department of Commerce, Bureau of the Census, Federal Expenditures by State for Fiscal Year 1996. (This table was prepared April 1997.)

Eisenhower Professional Development Grants, Drug-Free Schools and Communities—State Grants, Education for Homeless Children and Youth, Christa McAuliffe Fellowships, and Innovative Education Program Strategies.

³ Impact Aid—Basic Support Payments and Impact Aid—Payments for Children with Disabilities.

⁴Includes Vocational Education—Basic Grants to States, State Councils, Tech-Prep Education, Adult Education-State Administered Basic Grant Program, and State Literacy Resource Centers.

⁵ Includes Special Education—Grants to States (Part B, Individuals with Disabilities Education Act), Preschool Incentive Grants to States, Special Education—Grants for Infants and Families with Disabilities, and Education of Children with Disabilities in State Operated or Supported Schools.

⁶ Includes Emergency Immigrant Education Program and Bilingual Education State

rinstitutional Aid to Strengthen Higher Education Institutions serving signifies of low-income students, Other Special Programs for the Disadvantaged,

Cooperative Education, Fund for the Improvement of Postsecondary Education, Fellowships and Scholarships, and annual interest subsidy grants for facilities construction.

glandudes Pell Grants, State Student Incentive Grants, Guaranteed Student Loan interest subsidies, and Postsecondary Review Program.

⁹ Includes Public Library Services, Public Library Construction and Technology Enhancement, and Interlibrary Cooperation and Resource Sharing.

¹⁰ Includes Rehabilitation Services—Vocational Rehabilitation Grants to States, Supported Employment Services for Individuals with Severe Disabilities, Rehabilitation Services—Client Assistance Program, Independent Living—State Grants, and Program of Protection and Advocacy of Individual Rights.

11 Includes State and Local Systemic Improvement.

NOTE.—Data reflect revisions to figures in the *Budget of the United States Government, Fiscal Year 1997.* To the extent possible, data represent obligations rather than outlays. Because of the exclusion of certain programs, totals in this table are lower than those reported in other tables. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, based on unpublished tabulations from the Office of Management and Budget; and U.S. Department of Commerce, Bureau of the Census, Federal Expenditures by State for Fiscal Year 1995. (This table was prepared April 1996.)

Table 365.—Appropriations for Title I and Title VI, Elementary and Secondary Education Act (ESEA) 1 of 1994, by state or other area: 1995-96 and 1996-97

¹ Elementary and Secondary Education Act was most recently revised through the Improving America's Schools Act (IASA) of 1994.

BEST COPY AVAILABLE

² Data are based on fiscal year 1996 budget authorizations. Excludes \$3,664,000 for evaluation and studies.

³ Formerly Chapter 1.

⁴ Data are based on fiscal year 1997 budget authorizations. Excludes \$3,359,000 for evaluation and studies.

⁵ Formerly Chapter 2.

⁶ Includes capital expenses, and Even Start grants. ⁷ Total includes other activities and outlying areas.

NOTE.—Column 3 total includes columns 4, 7, 8, and 9. Columns 5 and 6 are subset totals of column 4. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, Budget Service, Elementary, Secondary, and Vocational Education Analysis Division; and unpublished data. (This table was prepared February 1997.)

¹ Dollars reflect actual obligations during the fiscal year regardless of when the funds were actually spent by a recipient institution. Data include obligations to federally funded research and development centers administered by colleges and universities.

NOTE.—Totals exclude loans to individuals, such as the Federal Family Education Loan Program sponsored by the U.S. Department of Education, and federal training and development activities, as well as funds allocated to state agencies, even though the final recipient of such funds is known to be an academic institution. Tuition support programs such as Pell Grants are included in these figures.

SOURCE: National Science Foundation, Federal Support to Universities, Colleges, and Nonprofit Institutions, Fiscal Year 1995. (This table was prepared May 1997.)

² Includes U.S. Department of Commerce, U.S. Department of Housing and Urban Development, U.S. Department of the Interior, Agency for International Development, U.S. Department of Labor, U.S. Department of Transportation, and Nuclear Regulatory Commission.

¹ Special Meal Assistance program is combined with "School Lunch" program.

NOTE.-Data are based on obligations as reported September 30, 1996. Negative amounts occur when program receipts exceed the obligations. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Agriculture, Food and Nutrition Service, Budget Division, unpublished data. (This table was prepared February 1997.)

²Commodities are based on preliminary food orders for fiscal year 1996.

³ Undistributed amount reflects the difference between preliminary state earnings reports and federal obligations as of September 30, 1996.

¹The distribution of enrollment by age was: 6 percent were 5 years old and over; 64 percent were 4-year-olds; 27 percent were 3-year-olds; and 3 percent were under 3 years of age. Handicapped children accounted for 13.2 percent in Head Start programs. The racial/ethnic composition was: American Indian/Alaskan Native, 4 percent; Hispanic, 24 percent; black, 36 percent; white, 33 percent; and Asian, 3 percent.

²The distribution of enrollment by age was: 6 percent were 5 years old and over; 64 percent were 4-year-olds; 27 percent were 3-year-olds; and 3 percent were under 3 years of age. Handicapped children accounted for 13.0 percent in Head Start programs. The racial/ethnic composition was: American Indian/Alaskan Native, 4 percent; Hispanic, 24 percent; black, 36 percent, white, 33 percent; and Asian, 3 percent.

³The distribution of enrollment by age was: 7 percent were 5 years old and over; 61 percent were 4-year-olds; 28 percent were 3-year-olds; and 4 percent were under 3 years of age. Handicapped children accounted for 13.1 percent in Head Start programs.

The racial/ethnic composition was: American Indian/Alaskan Native, 4 percent; Hispanic, 25 percent; black, 36 percent; white, 33 percent; and Asian, 3 percent.

⁴The distribution of enrollment by age was: 6 percent were 5 years old and over; 62 percent were 4-year-olds; 29 percent were 3-year-olds; and 4 percent were under 3 years of age. Handicapped children accounted for 12.8 percent in Head Start programs. The racial/ethnic composition was: American Indian/Alaskan Native, 3.5 percent; Hispanic, 25.2 percent; black, 36 percent; white, 32.3 percent; and Asian, 3 percent.

CHAPTER 5

Outcomes of Education

This chapter contains tables comparing educational attainment and work force characteristics. The data show labor force participation and income levels of high school dropouts and high school and college graduates. Population characteristics are provided for many of the measures to help evaluate disparities among various demographic groups. The first set of tables contains data from the Bureau of the Census on educational attainment and income of the labor force, and data from the Bureau of Labor Statistics on employment and unemployment. These tables provide information on the educational attainment of the labor force, by occupation, sex, and race/ethnicity; income, by level of education attained; and unemployment rates, by levels of education attained, sex, and race/ethnicity.

The second group of tables was compiled from Bureau of Labor Statistics reports on high school dropouts and graduates. These data show the labor force participation and college enrollment of high school students within the year after they leave school. The tabulations also provide comparative labor force participation and unemployment rates for graduates and dropouts. Additional information on college enrollment rates by race/ethnicity and sex have been included to help form a more complete picture of high school outcomes.

The third set of tables has been prepared from the Recent College Graduates and Baccalaureate and Beyond surveys from the National Center for Education Statistics, and from a Bureau of the Census survey on earnings and education. These tables provide data on employment outcomes for high school and college graduates. A table provides a salary comparison by field of college degree for the entire population. Trends in salaries received by college graduates also are featured in this section.

Statistics on educational attainment of the entire population are in Chapter 1. More detailed data on the number of high school and college graduates are contained in Chapters 2 and 3. Chapter 3 contains trend data on the proportion of high school graduates going to college. Additional data on the income of persons by educational attainment may be obtained from the Bureau of the Census in the *Current Population Reports*, Series P—60. The Bureau of Labor Statistics has a series of publications dealing with the

educational characteristics of the labor force. Further information on survey methodologies is in the "Guide to Sources" in the appendix and in the publications cited in the source notes.

Opinions

One life goal consistently rated "very important" by young men and women was "being successful in work." A survey of 1992 high school seniors found that 89 percent of the men and 90 percent of the women rated "being successful in work" as a "very important goal." Two of the other most highly rated goals in the 1992 survey were "finding steady work" ("very important" for 87 percent of men and 89 percent of women) and "having strong friendships" ("very important" for 80 percent of both men and women). Two years later in 1994, these values continued to be highly rated by the former high school seniors. Another value that was highly rated two years after high school was "Providing better opportunities for my children" which was cited by 91 percent of the young adults as "very important" (table 374).

Labor Force

Adults with higher levels of education were more likely to participate in the labor force than those with less education. About 81 percent of adults, 25 years and over, with a bachelor's degree participated in the labor force in 1996 compared with 66 percent of persons who were high school graduates and 41 percent of those who were not high school graduates. The labor force participation rates for blacks, age 25 and older, with bachelor's degrees and high school diplomas were higher than the average for all people with similar levels of education (table 375).

Persons with lower levels of educational attainment were more likely to be unemployed than those who had higher levels of educational attainment. The 1996 unemployment rate for adults (25 years old and over) who had not completed high school was 8.7 percent compared with 4.7 percent for those with 4 years of high school and 2.2 percent for those with a bachelor's degree or higher. Among persons with at least a high school diploma, young people had

415

higher unemployment rates than persons 25 and over (table 377).

One year after graduating from college in 1992–93, 87 percent of those receiving bachelor's degrees were employed (73 percent full time and 14 percent part time), 4.5 percent were unemployed, and 8.5 percent were not in the labor force (table 384).

Income

Between 1990 and 1995, median annual income of male full-time workers, when adjusted for inflation, declined 4 percent. However, there was no change for female full-time workers overall. Income of men who were year-round full-time workers with 4 or more years of college increased by 1 percent, compared with a 9 percent drop for men with 1 to 3 years of high school. Income for men who had completed high school dropped by 5 percent (table 378).

Women's incomes are much lower than men's incomes, even after adjusting for level of education. The average 1995 incomes for full-time year-round workers with a bachelor's degree were \$45,266 for men and \$32.051 for women.

Dropouts and Graduates

The difficulties in entering the job market for dropouts, and youth in general, are highlighted by comparing their labor force and unemployment status. Only 58 percent of 1995–96 dropouts were in the labor force (employed or looking for work), and 28 percent of the labor force were unemployed. Of the 1996 high school graduates who were not in college, 78 percent were in the labor force, and 24 percent of those in the labor force were unemployed (tables 380 and 381).

About two-thirds of the college graduates of the class of 1992–93 had jobs in professional, managerial, and technical areas in 1994. The remainder were employed in nonprofessional, nonmanagerial, and nontechnical areas. Overall, about 56 percent of the employees reported that their bachelor's degree was necessary to obtain their current job (table 384).

A 1992 assessment of literacy skills for adults found that about 22 percent of the adult population lacked the ability to perform simple arithmetic operations, and 21 percent could not locate a simple piece of information in a short text excerpt. Only about one-fifth of the population could solve mathematical problems requiring 2 or more steps or integrate information from complex passages (table 388).

(This table was prepared April 1997.)

 ¹ Includes fewer than 9 years education for 1989 and 1990.
 ² Includes 1 to 3 years high school for 1989 and 1990.
 ³ Includes 4 years of high school for 1989 and 1990, and equivalency certificates for

the other years.

Includes 1 to 3 years of college and associate degrees for 1989 and 1990.

Includes 1 to 3 years of college and associate degrees 1
 Not reported separately for 1989 and 1990.
 Includes 4 or more years of college for 1989 and 1990.
 Includes 4 years of college for 1989 and 1990.
 Data not collected in 1989 and 1990.
 Data not collected in 1989 and 1990.
 Data are based on 1990 census controls.

¹ The labor force includes all employed persons plus those seeking employment. The labor force participation rate is the percentage of persons either employed or seeking employment.

² Includes persons who graduated from high school between January and October

NOTE.—Data are based upon sample surveys of the civilian noninstitutional population. Percents are only shown when the base is 75,000 or greater. Even though the standard errors are large, smaller estimates are shown to permit users to combine categories in various ways. Because of rounding, details may not add to totals.

¹ Persons who dropped out of school between October of the earlier year and October of the later year.

NOTE.—Data are based upon sample surveys of the civilian noninstitutional population. Includes dropouts from any grade, including a small number from elementary and middle schools. Percents are only shown when the base is 75,000 or greater. Even though the standard errors are large, smaller estimates are shown to permit users to combine categories in various ways. Detail for the above race and Hispanic-origin groups will not sum to totals because data for the "other races" group are not presented and Hispanics are included in both the white and black population groups. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Labor, Bureau of Labor Statistics, College Enrollment of High School Graduates, various years. (This table was prepared July 1997.)

² The labor force includes all employed persons plus those seeking employment. The labor force participation rate is the percentage of persons either employed or seeking employment. The unemployment rate is the percent of persons in the labor force who are seeking employment.

³ Includes persons of Hispanic origin.

⁴ Data not shown where base is less than 75,000.

⁵ Persons of Hispanic origin may be of any race.

Includes those not working in technical, managerial, or administrative types of jobs who reported that they did not need a college degree to obtain their job.

2 includes those who have not finished all requirements for teaching certification or were previously qualified to teach.

3 includes computer sciences.

—Data not available.

NOTE.—Data are from sample surveys of recent college graduates. Notes on methodology are included in the Guide to Sources. Data exclude bachelor's recipients from U.S. Service Schools. Deceased graduates and graduates living at foreign addresses at the time of the survey are not included.

the text and information given in the task, or to make low-level inferences. A level 4 score of 326 to 375 requires the reader to perform multiple-feature matches and to integrate or synthesize information from complex passages. A level 5 score of 376 to 500 requires the reader to search for information in dense text which contains a number of score of 0 to 225 requires the reader to locate a single piece of information in a short text. A level 2 score of 226 to 275 requires the reader to locate a single piece of information in the text with several distractors or to make low-level inferences. A level 3 score of 276 to 325 requires the reader to make literal or synonymous matches between 1 Prose literacy is the ability to understand and use information contained in various kinds of textual material. A level distractors.

² Document literacy reflects the knowledge and skills used to process information from documents. A level 1 score of 0 to 225 requires the reader to locate pieces of information based on a literal match. A level 2 score of 226 to 275 requires the reader to match a single piece of information among several distractors. A level 3 score of 276 to 325 requires the reader to integrate multiple pieces of information from one or more documents. A level 4 score of 326 to 375 requires the performance of multiple feature matches, cycling through documents, and integrating informance.

ion. A level 5 score of 376 to 500 requires the reader to search through complex displays that contain multiple distractors, to make high-level text-based inferences.

³Quantitative literacy is the ability to perform numerical operations in everyday life. A level 1 score of 0 to 225 requires the reader to perform a single, relatively simple, arithmetic operation. A level 2 score of 226 to 275 requires the reader to perform a single operation using numbers that are either stated in the task or easily located in the material. A level 3 score of 276 to 325 requires the reader to use two or more numbers to solve the problem. A level 4 score of 326 to 375 requires the reader to perform two or more sequential operations or a single operation in which the quantities are found in different types of displays. A level 5 score of 376 to 500 requires the reader to perform multiple operations sequentially. They must extract the features of the problem from text or rely on background known. edge to determine the quantities or operations needed.

CHAPTER 6

International Comparisons of Education

This chapter offers a broad perspective on education across the nations of the world. It also provides an international context for examining the condition of education in the United States. In the early 1990s, the National Center for Education Statistics (NCES) expanded its role in collecting international data by serving as the national research center for the International Association for the Evaluation of Educational Achievement (IEA) Reading Literacy Study. In addition, NCES has provided funding for international research studies comparing mathematics and science education, including the Third Mathematics and Science International (TIMSS) and the Second International Assessment of Educational Progress. NCES is also cooperating with international agencies in the compilation of statistics and the development of education indicators.

Some of the data in this chapter were drawn from materials prepared by the United Nations Eduand Cultural Scientific, Organization (UNESCO), the Institute of International Education, the Organization for Economic Cooperation and Development (OECD), and the International Assessment of Educational Progress (IAEP). The basic summary data on enrollments, teachers, enrollment ratios, and finances were synthesized from information appearing in Education at a Glance published by OECD. Even though OECD tabulations are very carefully prepared, international data users should be cautioned about the many problems of definition and reporting involved in the collection of data about the educational systems in the world. This chapter provides information from the Third International Mathematics and Science Study (TIMSS), carried out by the International Association for the Evaluation of Educational Achievement (IEA). The mathematics and science performance of 8th grade students in 41 countries, and 4th grade students in 26 countries, was studied through assessments administered during 1994-95. The mathematics and science performance of students at the end of secondary schooling (12th grade in the U.S.) was also assessed at the same time, but the results were not available in time for presentation in this edition of the Digest.

A different perspective is provided by data on foreign students enrolled in U.S. institutions of higher education. These data from the Institute of International Education provide information on the number of foreign students and their countries of origin.

Further information on survey methodologies is in the "Guide to Sources" in the appendix and in the publications cited in the source notes.

Population

The percent of young people in a population can influence the proportion of national income spent per student. Countries with a greater proportion of young people must set aside larger proportions of domestic product for their education. Among the OECD countries, Turkey had the largest percentage of young people ages 5 to 13 at 19.7 percent in 1995. The closest followers were Ireland at 15.2 percent, and Korea at 14.5 percent. Countries with relatively small numbers of persons in this age group included Italy at 9.1 percent, and Denmark at 9.7 percent. The proportion of 5- to 13-year-olds in the U.S was 13.0 percent, which was higher than most other OECD countries (table 386).

Enrollments

In 1994, over 1 billion students were enrolled in schools around the world. Of these students, 639 million were in elementary-level programs, 351 million were in secondary programs, and 77 million were in higher education programs (table 388).

Between 1980 and 1994, enrollment changes varied from region to region. Elementary enrollment changes ranged from increases of 44 percent in Africa and 23 percent in Central and South America to a 2 percent decrease in Europe. Enrollment increases at the secondary level generally outpaced increases at the primary (elementary) level, especially in Africa (105 percent), Central and South America (46 percent), and Asia (42 percent). Secondary-level enrollment decreased in Europe by 1 percent, and in Northern America (U.S., Canada, and Greenland) by 3 percent (table 391).

Pupil/teacher ratios in elementary and secondary schools vary from country to country. Developed countries with relatively low pupil/teacher ratios at the elementary level in 1994 were Italy (10.2) and Denmark (11.0). Countries with relatively high ratios included Turkey (27.4) and Ireland (24.3) (table 393).

509

At the postsecondary level, developing areas of the world had substantial increases in enrollment between 1980 and 1994. Postsecondary enrollment rose by 135 percent in Africa and by 105 percent in Asia. Postsecondary enrollment in Oceania and Central and South America increased by 85 percent and 60 percent, respectively, followed by Europe at 23 percent and Northern America at 22 percent. These increases are due to growth in the postsecondary attendance rates and increased population (table 391).

Postsecondary enrollment varied among countries partially due to differing definitions of postsecondary education and at what age it begins. In 1994, among the OECD countries, Canada reported the largest proportion of 18- to 21-year-olds enrolled in post-secondary education at 40 percent, followed by the United States (35 percent), France (33 percent), New Zealand (31 percent), and Ireland (31 percent). In 1994, for the 22 to 25 age group, Finland's enrollment rate was highest at 27 percent, with Norway following at 24 percent, Canada at 23 percent, Denmark at 22, and the U.S. at 21 (table 387).

In 1995–96, there were 454,000 foreign students studying at U.S. colleges and universities. This was about the same as the year before. Approximately 57 percent of the students were from South and East Asian countries (table 408).

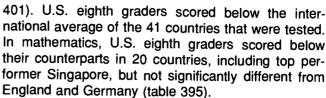

Achievement

TIMSS is the largest, most comprehensive comparative study of education that has ever been undertaken, testing a half million students. The study was designed to focus on students at different stages in school: midway through elementary school, midway through lower secondary school, and at the end of upper secondary school. Results from the fourth and eighth grade levels were released in late 1996 and 1997, respectively. Findings for twelfth grade are scheduled for release in early 1998.

The results of the 1994–95 TIMSS show U.S. fourth graders performing above the international average in both mathematics and science, and showing a stronger standing than eighth graders in both subjects. In addition, U.S. students perform better in science overall than in mathematics compared to their international counterparts at both grade levels.

Mathematics

In the 1994–95 TIMSS assessment in mathematics, U.S. fourth graders scored above the international average of 26 countries that participated. U.S. fourth graders performed below students in 7 countries, not significantly different from students in 6 countries, and above students in 12 countries. U.S. fourth graders scored below Japan, not significantly different from Canada, and above England (table

U.S. fourth graders' scores were above the international average in five out of six mathematics content areas tested: whole numbers; fractions and proportionality, data representation, analysis and probability; geometry; and patterns, relations and functions. The only area in which U.S. fourth graders did less well compared to other nations was measurement, estimation, and number sense. U.S. eighth graders' performance fell at about the international average in three areas (algebra; data representation, analysis, and probability; and fractions and number) out of the 6 content areas assessed. U.S. eighth grade students performed less well compared to other nations in the other three areas: geometry; measurement; and proportionality.

Science

U.S. fourth graders performed above the international average of the 26 countries testing fourth grade students in science. Only Korea scored above the U.S., with U.S. fourth graders outperforming 19 other countries, including England and Canada. The remaining countries' scores, including Japan's, were not significantly different from those of U.S. fourth grade students (table 402). U.S. eighth graders compared more favorably with other countries in science than mathematics, scoring above the international average of 41 countries. U.S. eighth students scored below their peers in nine countries, not significantly different from 16 countries, including Canada, England, and Germany, and outperformed students in 15 nations (table 397).

U.S. fourth grade students were above the international average in all four science content areas studied by TIMSS. Among the five science content areas studied at the 8th grade level in TIMSS, U.S. students performed above the international average in earth science, life science, and environmental issues, and no different from the international average in chemistry and physics.

Degrees

Ratios of bachelor's degrees conferred per hundred 22- or 23-year-olds in 1994 ranged from 1 in Italy and 2 in Portugal to 32 in the United States and Australia. In 1994, women had higher bachelor's degree ratios than men in 13 out of 16 countries reporting data (table 405).

Countries pay careful attention to the percent of graduates in the math and science fields. For undergraduate degrees awarded in science fields (includ-

ing natural sciences, mathematics, and computer science, and engineering), OECD countries reported rates from 18 to 41 percent for 1994. Germany, Finland, Belgium, Switzerland, Japan, and Austria were over 30 percent, while the United States, Canada, and New Zealand were under 20 percent (table 406). The proportion of graduate degrees awarded in science fields also ranged widely across countries. Among the countries with the highest proportions were Japan (54 percent), Sweden (44 percent), and Austria (37 percent). Among the countries with the lowest proportions were the United States (14 percent), Australia (14 percent), and New Zealand (19 percent) (table 407).

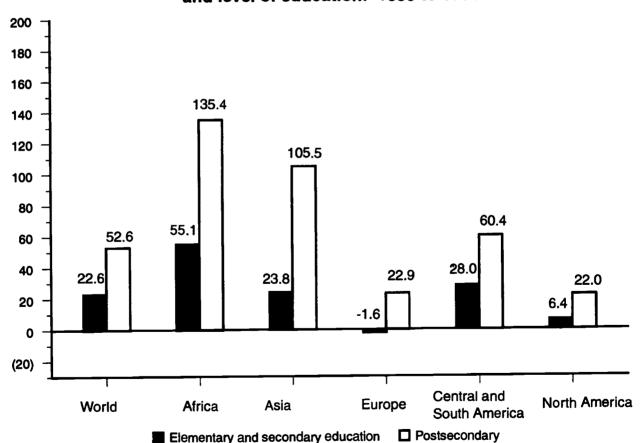

Finances

In general, higher income countries spend more per student than lower income countries. At the pri-

mary level of education, Sweden, the United States, and Switzerland ranked at the upper end of per pupil expenditures in 1993. For primary education per student, Sweden spent about \$4,900 per student, the U.S. spent \$5,500, and Switzerland spent about \$5,800. At the secondary level, Switzerland, Austria, United States, Germany and Denmark had expenditures over \$6,000 per student. Switzerland, the U.S., and Sweden spent relatively large amounts per student in higher education, with each having expenditures per student over \$12,000 (table 408).

A comparison of public expenditures on education as a percent of gross domestic product (GDP) in OECD countries shows that national investment in education in 1993 ranged from 3.3 percent of GDP in Turkey to 7.6 percent in Norway (table 409).

¹ Enrollment and teacher data exclude the Democratic People's Republic of Korea. Expenditure data exclude Albania, Cambodia, Democratic People's Republic of Korea, Lao People's Democratic Republic, Lebanon, Mongolia, Mozambique, South Africa, and Viet

BEST COPY AVAILABLE

² Excludes Rodrigues and other small islands.
³ Excludes the former U.S.S.R., the Democratic People's Republic of Korea, and Arab states, but includes both the Asian and the European portions of Turkey.

Includes the former U.S.S.R.
 Northem America includes Bermuda, Canada, Greenland, St. Pierre, Miquelon and the United States of America. Hawaii is included in Northern America rather than Oce-

ania. Central and South America includes the rest of America.

^a Includes American Samoa, Australia, Guam and New Zealand.

⁷ Estimate of midyear population.

⁸ Excludes special and adult education provided outside regular schools. Data prior to 1992 exclude preprimary.

⁹ Includes general, teacher training and vocational education.

¹⁰ Includes universities and other institutions of higher education.

¹¹ This figure is for Europe, not including the former U.S.S.R.

¹ Selection based on total population for midyear 1993.

ient totals and ratios exclude Democratic People's Republic of Korea. Data do adult education or special education provided outside regular schools.

BEST COPY AVAILABLE

² First level enrollment generally consists of elementary school, grades 1-6.

³ Second level enrollment includes general education, teacher training (at the second level), and technical and vocational education. This level generally corresponds to secondary education in the United States, grades 7-12.

⁴Third level enrollment includes college and university enrollment, and technical and vocational education beyond the high school level. There is considerable variation in reporting from country to country.

⁵ In many countries, a child may be exempt from school attendance if there is no suitable school within a reasonable distance of his/her home.

⁶ Data are the total enrollment of all ages in the school level divided by the population of the specific age groups which correspond to the school level. The year shown in this column is the one in which the school or academic year starts. Adjustments have been made for the varying lengths of first and second level programs. Because some counmany students from outside the normal age range, ratios may exceed 100.

⁸ Classification of first and/or second levels have been revised. Data by level may not be comparable over time.

⁹ Data for 1993-94.

¹⁰ Data exclude Ecole Nationale d'Administration et de Magistrature (ENAM).

¹¹ Eastern Cameroon.

¹² Data for 1986-87.

¹³ Data for 1988-89.

¹⁴ The educational system allows for other alternatives.

¹⁵ Data do not include Al Azhar.

¹⁶ Excludes all private institutions. 17 Data for 1992.

¹⁸ Data for 1985-86.

¹⁹ Data refer to public education only.

²⁰ Data for 1989-90. ²¹ Data for 1979.

²² Data for 1984.

²³ Data for 1981.

²⁴ Data refer to government maintained and aided schools only.

²⁵ Data refer to Tanzania mainland only.

⁴¹ Population data are from the U.S. Bureau of the Census, *Current Population Reports*, "Population Estimates." Enrollment totals and ratios are based on data compiled by the National Center for Education Statistics and the U.S. Bureau of the Census. First level includes grades 1 through 6 (ages 5–10), second level includes grades 7 through 12 (ages 11–16), and third level includes ages 20–24.

42 Revised data series corresponding to grades 7–12.

NOTE.—Some data have been revised from previously published figures.

SOURCE: United Nations Educational, Scientific, and Cultural Organization (UNESCO), Paris, Statistical Yearbook, various years; U.S. Department of Commerce, Bureau of the Census, Current Population Reports, Series P-20; and U.S. Department of Education, National Center for Education Statistics, Common Core of Data and "Fall Enrollment in Institutions of Higher Education" surveys, and Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment" survey. (This table was prepared May 1997.)

²⁶ Data for 1991-92.

²⁷ Includes full time students only.

²⁶ Data for 1987-88.

²⁹ Data do not include Air & Correspondence courses.

³⁰ Data for Former Democratic Yemen do not include schools for nomads.

³¹ Former Yemen Arab Republic only.

³² Grade levels changed for compatibility with ISCED.

³³ Data are a combination of data for the Czech Republic and Slovakia.

³⁴ Data include both former East and West Germany.

³⁵ Excludes technical education, consisting of both on the job training and school education.

³⁶ Data do not include apprenticeships and health care training.

Enrollment data refer to grades 1-4 only since 1992-93.
 Excludes students enrolled in third level programs in secondary specialized schools

³⁸ Excludes students enrolled in third level programs in securiously special as preprimary edul 39 Includes infant classes in primary schools, previously considered as preprimary edul 6

⁴⁰ Excludes trade and vocational programs.

⁴³Data for 1995.

⁴⁴ Data refer to grades 1 to 9 (basic education).

45 Data refer to grades 10 and 11.

46 Includes Norfolk Island.

[—]Data not available.

All 24 geographic items.

²Teachers include principals, deputy principals and senior teachers mainly involved in administrative tasks.

³ Full-time and part-time teachers are estimates. Distribution by school level (primary and lower secondary levels) is also an estimate. Kindergartens are classified as public

⁴The number of full-time equivalent teachers does not take into account the additional hours given by teachers. In public secondary education institutions, an increase of 6.6 per cent of total full-time equivalents would be observed if the additional hours were taken into account. The number of teachers in independent private secondary education institutions are entirely estimates. About 18 per cent of all the pedagogical and support staff, and about 7 per cent of all the staff employed in education have been estimated.

⁵ Data for 1985 are for the former West Germany.

⁸ Most components are estimates.

⁷ Principals and vice-principals are included in "Teachers" while other staff is included in "Support staff." Full-time equivalents of part-time teachers are not calculated, since there are no valid and reliable data available on the basis of which such calculations can be made.

⁸ Teaching staff do not include direction staff.

⁹ Figures on teachers at lower secondary education are included in upper secondary education.

⁻Data not available

²Eight items testing ability to use maps, charts, and globes.

³Nine items testing knowledge of location of physical features and concepts of climate.

⁴Seven items testing knowledge of cultural entities and interactions between people and their environment.

⁵ Eight provinces.

⁸ Schools in 14 republics where instruction is in Russian.

⁷ Schools where instruction is in Spanish, in all regions except Cataluna.

NOTE.—Standard errors appear in parentheses.

¹ Fourth grade students or equivalent in most countries.

2 Average hours based on: No time = 0; Less than 1 hour = .5; 1-2 hours = 1.5; 3-4 hours = 3.5; More than 4

³ Did not satisfy one or more guidelines for sample participation rates, age/grade specifications, or classroom sam-Met guidelines for sample participation only after replacement schools were included for question about mathematics content areas.

⁵ National defined population covers less than 90 percent of international desired population.

6 Indicates a 70 to 84 percent student response rate on question about time spent studying mathematics. 7 National defined population does not cover all of international desired population.
—Data not available or not applicable.

NOTE. -- Standard errors appear in parentheses.

 ¹ s.e.=standard error.
 2 Narrative prose is continuous text in which the writer's aim is to tell a story.
 3 Expository prose is continuous text designed to describe factual information to the

reader.

4 Documents are structured information presented in the form of charts, tables, maps, graphs, lists, or sets of instructions.

 ⁵ Iceland tested all students, therefore standard errors are not applicable.
 ⁶ Only French-speaking students were tested.
 ⁷ British Columbia only.

 ¹ s.e.=standard error.
 2 Narrative prose is continuous text in which the writer's aim is to tell a story.

³ Expository prose is continuous text designed to describe factual information to the

reader.

4 Documents are structured information presented in the form of charts, tables, maps, graphs, lists, or sets of instructions.

5 Iceland tested all students, therefore standard errors are not applicable.

6 British Columbia only.

⁷Only French-speaking students were tested.

⁸ Insufficient data to calculate the standard error.

⁹ Sampling response rate of schools was below 80 percent. -Data not available.

CHAPTER 7

Learning Resources and Technology

This chapter contains statistics on libraries and on the use of information technologies. These data show the extent of America's access to information technologies outside of formal classroom activities. The data also provide a capsule description of the magnitude and availability of library resources. Access to information has been widely cited as the key to success in a growing number of endeavors. Thus, how information is made available and to whom become matters of concern.

The first section of the chapter deals with public libraries, public and private school libraries, school Internet access, and college and university libraries. It contains data on collections, population served, staff, and expenditures. Two tables provide institutional-level information for the largest public libraries and the largest college libraries in the country.

The second half of the chapter provides information on the availability and use of technology. For example, the proportion of children using computers at school compared over time. Also included are data on the use of home computers by adults and school children, with comparisons among various demographic groups.

Related data may be found in various sections of this report. For example, statistics on the number of degrees conferred in computer and information sciences and library sciences are in chapter 3. Further information on survey methodologies are in the "Guide to Sources" and in the publications cited in the source notes.

Resources

In 1993–94, there were 83 school library visits each week per 100 public school students. Elementary school students were more likely to visit their school libraries (89 visits per 100 students each week) than secondary school students (69 per 100). Private school students were slightly less likely to visit their libraries (77 per 100). The average number of library staff per school was 1.8 at public schools, and 1.2 at private schools. Public school libraries generally had smaller numbers of books on a per student basis than private school libraries. In 1994–94, public school libraries held an average of 2,585 books per 100 students compared to an average of 3,716 per 100 students at private schools. Although

public elementary school libraries had slightly smaller holdings than public secondary schools on a per student basis, the elementary school students checked out twice as many books on a per student basis (1.5 per week compared to .7 per week) (table 411).

In 1994, there were 8,921 public libraries in the United States with 672 million books and serial volumes. The annual attendance per capita was 4.1 and the reference transactions per capita was 1.1 (table 419).

The increase in college library resources maintained pace with increases in enrollment between 1984–85 and 1994–95. The library staff to student ratio decreased slightly from 153 students per staff member to 150 students per staff member. The college library operating expenditure per student average rose 9 percent in constant dollars to \$417 in 1994–95. However, other college expenditures rose faster than library expenditures and the proportion of college education budgets spent on libraries fell from 3.4 percent in 1984–85 to 2.9 percent in 1994–95 (table 416).

Technology

There has been widespread introduction of computers into the schools in recent years. In 1995, the average public school contained 72 computers. One important technological advance that has come to schools following the introduction of computers has been connections to the Internet. The number of schools with Internet access has increased rapidly from 35 percent in 1994, to 50 percent in 1995, to 65 percent in 1996. Although some access is now widespread, most schools are not extensively connected. Only about 14 percent of instructional rooms had access to the Internet in 1996. Of the schools which had Internet access in 1995, more than one-third had access at 2 to 5 computers (table 415).

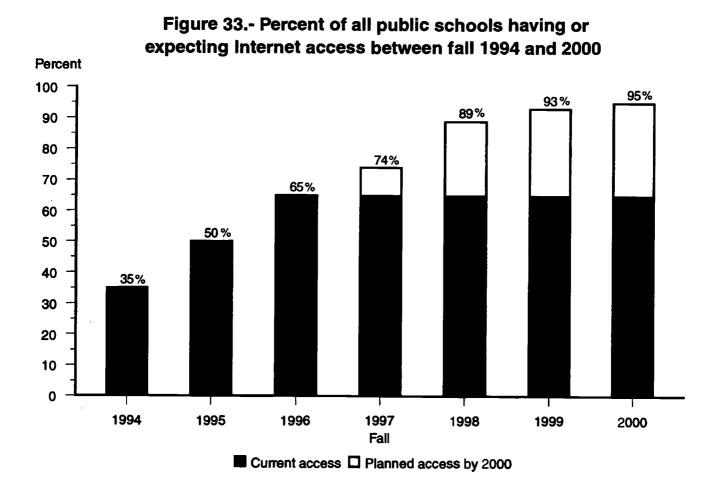

The total computer usage rate of students at school increased from 27 percent in 1984, to 43 percent in 1989, to 59 percent in October 1993. The rate for grades 1 to 8 increased from 52 percent in 1989 to 69 percent in 1993. The computer usage rate in 1993 was 58 percent for students in high school and 55 percent for students in college. Sizable percentages of students used computers at

home, though fewer actually used them for school-work. About 25 percent of elementary school children used computers at home and about 11 percent used them for schoolwork. Students at the high school and undergraduate level were about twice as likely as the elementary school children to use home computers for schoolwork. In general, students in higher income families were more likely to use computers at home and use them for schoolwork than students from lower income families. About 13 percent of the high school students in the \$25,000 to \$29,999 household income group used computers at home for school work compared to 45 percent in the \$75,000 and over income group (table 422).

The use of computers has become widespread in the workplace. In October 1993, 46 percent of all workers used computers on the job. More frequent use of computers was associated with higher levels

of education and higher incomes. Only 34 percent of the high school graduates and 10 percent of the high school dropouts used computers compared to 71 percent of those with master's degrees. Among those who did use computers, the master's degree recipients were more likely to use the computers for a wider variety of applications than high school graduates. The most common uses of computers on the job were: bookkeeping/invoicing (45 percent), word processing (44 percent), communications (39 percent), analysis/spreadsheets (36 percent), and data bases (35 percent). Workers in the 25- to 49-year-old age range were more likely to use computers than younger or older workers. Elementary and secondary teachers were less likely to use computers than persons employed in other managerial or professional fields (table 420).

¹ During the most recent full week of school.

NOTE.—Percentages are based on schools that have library/media centers. In school year 1990–91, 96 percent of public and 87 percent of private schools had library/media centers. Standard errors appear in parantheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey, 1993–94, unpublished data. (This table was prepared August 1997.)

² Data less than 0.5 are rounded to 0.

³ Locally budgeted expenditures exclude federal gifts and grants.

⁻Data not available.

⁻Data not available.

SOURCE: U.S. Department of Commerce, Bureau of the Census, Current Population Survey, October 1984, 1989, and 1993, unpublished data. (This table was prepared April "Data are based on a sample survey of households and are subject to sam-1994.)

Guide to Tabular Presentation

This section is intended to assist the reader in following the basic structure of the *Digest* tables and to provide a legend for some of the common symbols and indexes used throughout the book. Unless otherwise noted, all data are for the 50 states and the District of Columbia.

Table Components

Title Describes the table content concisely.

Unit Indicator Informs the reader of the measurement united in the table—"In thousands," "In millions of dollars," etc. Noted below the title unless several units are used, in which case the unit indicators are generally given in the spanner or individual column heads.

Spanner Describes a group of two or more columns.

Column head Describes specific column.

Stub Describes a row or a group of rows. Each stub is followed by a number of dots (leaders) or by a semicolon if no data appears in the data fields.

Field The area of the table which contains the data elements.

Rules in the field

Single horizontal rules indicate

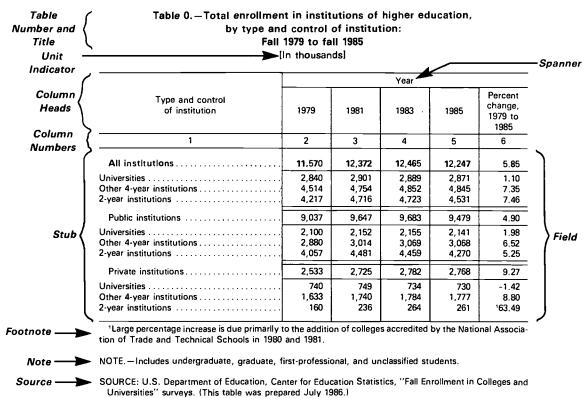

- that the data below the line add to the figure immediately above the line, or
- in the case of derived figures (e.g., percents, medians) that the datum above the line represents a cumulative figure.

Double horizontal rules demarcate groups of related rows.

Single vertical rules delineate columns.

Double vertical rules divide the table into sections with unique stubs.

Example of Table Structure

Footnote Describes a unique circumstance relating to a specific item within the table. Usually listed below the bottom rule of the table.

Note Furnishes general information that relates to the entire table.

Source The document or reference from which the data are drawn. This note may also include the organizational unit responsible for preparing the data.

Descriptive Terms

Average A number that is used to represent the "typical value" of a group of numbers. It is regarded as a measure of "location" or "central tendency" of a group of numbers.

Arithmetic mean is the most commonly used average. It is derived by summing the individual item values of a particular group and dividing that sum by the number of items. This value is often referred to simply as the "mean" or "average."

Median is the measure of central tendency that occupies the middle position in a rank order of values. It generally has the same number of items above it as below it. If there is an even number of items in the group, the median is the average of the middle two items.

Per capita, or per person, figure represents an average computed for every person in a specified group, or population. It is derived by dividing the total for an item (such as income or expenditures) by the number of persons in the specified population.

Index number A value that provides a means of measuring, summarizing, and communicating the nature of changes that occur from time to time or from place to place. An index is used to express changes in prices over periods of time but may also be used to express differences between related subjects at a single point in time.

The *Digest* most often uses the Consumer Price Index to compare purchasing power over time.

To compute a price index, a base year or period is selected. The base year price is then designated as the base or reference price to which the prices for other years or periods are related.

A method of expressing the price relationship is:

Index number =

Price of a set of one or more items for related year

x 100

Price of the same set of items for base year

When 100 is subtracted from the index number, the result equals the percent change in price from the base year.

Current and constant dollars are used in a number of tables to express finance data. Unless otherwise noted, all figures are in current dollars, not adjusted for inflation. Constant dollars provide a measure of the impact of inflation on the current dollars.

Current dollar figures reflect actual prices or costs prevailing during the specified year(s).

Constant dollar figures attempt to remove the effects of price changes (inflation) from statistical series reported in dollar terms.

The constant dollar value for an item is derived by dividing the base year price index (for example, the Consumer Price Index for 1986) by the price index for the year of data to be adjusted and multiplying by the item to be adjusted. The result is an adjusted dollar value as it would presumably exist if prices were the same as the base year—in other words, as if the dollar had constant purchasing power. Any changes in the constant dollar amounts would reflect only changes in the real values.

NOTE: Tables may not include data for all years implied in table titles.

Guide to Sources Sources and Comparability of Data

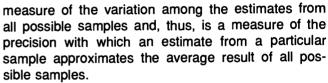

The information presented in this report was obtained from many sources, including federal and state agencies, private research organizations, and professional associations. The data were collected using many research methods, including surveys of a universe (such as all colleges) or of a sample, compilations of administrative records, and statistical projections. Digest users should take particular care when comparing data from different sources. Differences in procedures, timing, phrasing of questions, interviewer training, and so forth mean that the results from the different sources may not be strictly comparable. Following the general discussion of data accuracy below, descriptions of the information sources and data collection methods are presented, grouped by sponsoring organization. More extensive documentation of a particular survey's procedures does not imply more problems with the data, only that more information is available.

Accuracy of Data

The accuracy of any statistic is determined by the joint effects of "sampling" and "nonsampling" errors. Estimates based on a sample will differ somewhat from the figures that would have been obtained if a complete census had been taken using the same survey instruments, instructions, and procedures. In addition to such sampling errors, all surveys, both universe and sample, are subject to design, reporting, and processing errors and errors due to To the extent possible, nonresponse. nonsampling errors are kept to a minimum by methods built into the survey procedures. In general, however, the effects of nonsampling errors are more difficult to gauge than those produced by sampling variability.

Sampling Errors

The samples used in surveys are selected from a large number of possible samples of the same size that could have been selected using the same sample design. Estimates derived from the different samples would differ from each other. The difference between a sample estimate and the average of all possible samples is called the sampling deviation. The standard or sampling error of a survey estimate is a

The sample estimate and an estimate of its standard error permit us to construct interval estimates with prescribed confidence that the interval includes the average result of all possible samples. If all possible samples were selected under essentially the same conditions and an estimate and its estimated standard error were calculated from each sample. then: (1) approximately 2/3 of the intervals from one standard error below the estimate to one standard error above the estimate would include the average value of all possible samples; and (2) approximately 19/20 of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average value of all possible samples. We call an interval from two standard errors below the estimate to two standard errors above the estimate a 95 percent confidence interval.

To illustrate this concept, consider the table of standard errors and 95 percent confidence intervals for estimates from the 1989-90 Beginning Postsecondary Students Survey (table A1). For the estimate that 28.1 percent of all female students in a vocational certificate program completed the program in 9 months or less, the table shows that the standard error is 3 percent. Therefore, we can create a 95 percent confidence interval which is approximately 22.1 to 34.1 (28.1 percent \pm 2 times 3 percent).

Analysis of standard errors can help assess how valid a comparison between two estimates might be. The standard error of a difference between two independent sample estimates is equal to the square root of the sum of the squared standard errors of the estimates. The standard error (se) of the difference between independent sample estimates "a" and "b" is:

$$Se_{a,b} = (Se_a^2 + Se_b^2)^{1/2}$$

It should be noted that most of the standard error estimates presented in subsequent sections and in the original documents are approximations. That is,

471

to derive estimates of standard errors that would be applicable to a wide variety of items and could be prepared at a moderate cost, a number of approximations were required. As a result, the standard error estimates provide a general order of magnitude rather than the exact standard error for any specific item. The preceding discussion on sampling variability was directed toward a situation concerning one or two estimates. Determining the accuracy of statistical projections is more difficult. In general, the further away the projection date is from the date of the actual data being used for the projection, the greater the probable error in the projections. If, for instance, annual data from 1970 to 1995 are being used to project enrollment in institutions of higher education. the further beyond 1995 one projects, the more variability in the projection. One will be less sure of the 2005 enrollment projection than of the 2000 projection. A detailed discussion of the projections methodology is contained in Projections of Education Statistics to 2007 (National Center for Education Statistics, 1997).

Nonsampling Errors

Universe and sample surveys are subject to nonsampling errors. Nonsampling errors may arise when respondents or interviewers interpret questions differently, when respondents must estimate values, or when coders, keyers, and other processors handle answers differently, when persons who should be included in the universe are not, or when persons fail to respond (completely or partially). Nonsampling errors usually, but not always, result in an understatement of total survey error and thus an overstatement of the precision of survey estimates. Since estimating the magnitude of nonsampling errors often would require special experiments or access to independent data, these nonsampling errors are seldom available.

To compensate for nonresponse, adjustments of the sample estimates are often made. An adjustment made for either type of nonresponse, total or partial, is often referred to as an imputation, which is often a substitution of the "average" questionnaire response for the nonresponse. Imputations are usually made separately within various groups of sample members which have similar survey characteristics. Imputation for item nonresponse is usually made by substituting for a missing item the response to that item of a respondent having characteristics that are similar to those of the nonrespondent.

Although the magnitude of nonsampling error in the data compiled in this *Digest* is frequently unknown, idiosyncrasies that have been identified are noted on the appropriate tables.

Department of Education

National Center for Education Statistics (NCES)

Beginning Postsecondary Student Longitudinal Study

The Beginning Postsecondary Student Longitudinal Study (BPS) provides information concerning persistence, progress, and attainment from initial time of entry into postsecondary education through leaving and entering the workforce. BPS includes traditional and nontraditional (e.g., older) students and is representative of all beginning students in postsecondary education. BPS follows first-time, beginning students for at least 6 years at 2-year intervals, collecting student data, postsecondary transcripts, and financial aid reports. By starting with a cohort that has already entered postsecondary education, and following it for 6 years, BPS will be able to determine to what extent, if any, students who start postsecondary education later differ in their progress, persistence, and attainment.

Further information on the Beginning Postsecondary Student Longitudinal Survey may be obtained from:

Common Core of Data

NCES uses the Common Core of Data (CCD) survey to acquire and maintain statistical data from each of the 50 states, the District of Columbia, and the outlying areas. Information about staff and students is collected annually at the school, LEA (local education agency or school district), and state levels. Information about revenues and expenditures is also collected at the state level.

Data are collected for a particular school year (July 1 through June 30) via survey instruments sent to the state education agencies during the subsequent school year. States have one year in which to modify the data originally submitted.

Since the CCD is a universe survey, the CCD information presented in this edition of the *Digest* is not subject to sampling errors. However, nonsampling errors could come from two sources—nonreturn and inaccurate reporting. Almost all of the states submit the six CCD survey instruments each year, but submissions are sometimes incomplete or too late for publication.

Understandably, when 57 education agencies compile and submit data for approximately 85,000 public schools and 15,000 local school districts, misreporting can occur. Typically, this results from varying interpretation of NCES definitions and differing recordkeeping systems. NCES attempts to minimize these errors by working closely with the Council of Chief State School Officers (CCSSO) and its Committee on Evaluation and Information Systems (CEIS).

The state education agencies report data to NCES from data collected and edited in their regular reporting cycles. NCES encourages the agencies to incorporate into their own survey systems the NCES items they do not already collect so that those items will also be available for the subsequent CCD survey. Over time, this has meant fewer missing data cells in each state's response, reducing the need to impute data.

NCES subjects data from the education agencies to a comprehensive edit. Where data are determined to be inconsistent, missing, or out of range, NCES contacts the education agencies for verification. NCES-prepared state summary forms are returned to the state education agencies for verification. States are also given an opportunity to revise their state-level aggregates from the previous survey cycle.

Federal Support for Education

NCES prepares an annual compilation of federal funds for education. Data for U.S. Department of Education programs come from the *Budget of the U.S. Government*. Budget offices of other federal agencies provide information for all other federal program support except for research funds, which are obligations reported by the National Science Foundation in *Federal Funds for Research and Development*. Some data are estimated, based on reports from the federal agencies contacted and the *Budget of the U.S. Government*.

Except for money spent on research, outlays were used to report program funds to the extent possible. Some tables are obligations as noted in the title of the table. Some federal program funds not commonly recognized as education assistance are also included in the totals reported. For example, portions of federal funds paid to some states and counties as shared revenues resulting from the sale of timber

and minerals from public lands have been estimated as funds used for education purposes. Parts of the funds received by states (in 1980) and localities (throughout the period) under the General Revenue Sharing Program are also included, as are portions of federal funds received by the District of Columbia. The share of these funds allocated to education was assumed equal to the share of general funds expended for elementary and secondary education by states and localities in the same year as reported by the U.S. Bureau of the Census in its annual publication, Governmental Finances.

All state intergovernmental expenditures for education were assumed earmarked for elementary/secondary education. Contributions of parent governments of dependent school systems to their public schools amounted to approximately 9 percent of local government revenues and local government revenue sharing in each year. Therefore, 9 percent of local government revenue-sharing funds were assumed allocated each fiscal year to elementary and secondary education. Parent government contributions to public school systems were obtained from the U.S. Bureau of the Census, Finances of Public School Systems. The amount of state revenue-sharing funds allocated for postsecondary education in 1980 was assumed to be 13 percent, the proportion of direct state expenditures for institutions of higher education reported in Governmental Finances for that year.

The share of federal funds for the District of Columbia assigned to education was assumed equal to the share of the city's general fund expenditures for each level of education.

For the job training programs conducted by the Department of Labor, only estimated sums spent on classroom training have been reported as educational program support.

During the 1970s, the Office of Management and Budget (OMB) prepared annual reports on federal education program support. These were published in Budget of the United States Government [Special Analyses]. The information presented in this report is not, however, a continuation of the OMB series. A number of differences in the two series should be noted. OMB required all federal agencies to report outlays for education-related programs using a standardized form, thereby assuring agency compliance in reporting. The scope of education programs reported here differs from OMB. Off-budget items such as the annual volume of guaranteed student loans were not included in OMB's reports. Finally, while some mention is made of an annual estimate of federal tax expenditures, OMB did not include them in its annual analysis of federal education support. Estimated federal tax expenditures for education are the difference between current federal tax receipts and what these

receipts would be without existing education deductions to income allowed by federal tax provisions.

Recipients' data are estimated based on *Estimating Federal Funds for Education: A New Approach Applied to Fiscal Year 1980*, U.S. Department of Education, "Federal Support for Education, Fiscal Years 1980 to 1984," and *Catalog of Federal Domestic Assistance*. The recipients' data are estimated and tend to undercount institutions of higher education (IHEs), students, and local education agencies (LEAs). This is because some of the federal programs have more than one recipient receiving funds. In these cases, the recipients were put into a "mixed recipients" category, because there was no way to disaggregate the amount each recipient received.

High School and Beyond

High School and Beyond (HS&B) is a national longitudinal survey of 1980 high school sophomores and seniors. The base-year survey was a probability sample of 1,015 high schools with a target number of 36 sophomores and 36 seniors in each of the schools. A total of 58,270 students participated in the base-year survey. Substitutions were made for noncooperating schools—but not for students—in those strata where it was possible. Overall, 1,122 schools were selected in the original sample and 811 of these schools participated in the survey. An additional 204 schools were drawn in a replacement sample. Student refusals and absences resulted in an 82 percent completion rate for the survey.

Several small groups in the population were oversampled to allow for special study of certain types of schools and students. Students completed questionnaires and took a battery of cognitive tests. In addition, a sample of parents of sophomores and seniors (about 3,600 for each cohort) was surveyed.

HS&B first follow-up activities took place in the spring of 1982. The sample design of the first follow-up survey called for the selection of approximately 30,000 persons who were sophomores in 1980. The completion rate for sophomores eligible for on-campus survey administration was about 96 percent. About 89 percent of the students who left school between the base year and first follow-up surveys (dropouts, transfer students, and early graduates) completed the first follow-up sophomore questionnaire.

As part of the first follow-up survey of HS&B, transcripts were requested in fall 1982 for an 18,152

member subsample of the sophomore cohort. Of the 15.941 transcripts actually obtained, 1,969 were excluded because the students had dropped out of school before graduation, 799 were excluded because they were incomplete, and 1,057 were excluded because the student graduated before 1982 or the transcript indicated neither a dropout status nor graduation. Thus, 12,116 transcripts were utilized for the overall curriculum analysis presented in this publication. All courses in each transcript were assigned a six-digit code based on A Classification of Secondary School Courses (developed by Evaluation Technologies, Inc. under contract with NCES). Credits earned in each course were expressed in Carnegie units. (The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. To receive credit for a course, the student must have received a passing grade-"pass," "D," or higher.) Students who transferred from public to private schools or from private to public schools between their sophomore and senior years were eliminated from public/private analyses.

In designing the senior cohort first follow-up survey, one of the goals was to reduce the size of the retained sample, while still keeping sufficient numbers of minorities to allow important policy analyses. A total of 11,227 (94 percent) of the 11,995 persons subsampled completed the questionnaire. Information was obtained about the respondents' school and employment experiences, family status, and attitudes and plans.

The sample for the second follow-up, which took place in spring 1984, consisted of about 12,000 members of the senior cohort and about 15,000 members of the sophomore cohort. The completion rate for the senior cohort was 91 percent, and the completion rate for the sophomore cohort was 92 percent.

HS&B third follow-up data collection activities were performed in spring of 1986. Both the sophomore and senior cohort samples for this round of data collection were the same as those used for the second follow-up survey. The completion rates for the sophomore and senior cohort samples were 91 percent and 88 percent, respectively.

Table A2 contains the maximum number of cases that are available for the tabulations of the specific classification variables used throughout this publication.

The standard error (se) of an individual percentage (p) based on HS&B data can be approximated by the formula

 $se_p = DEFT [p(100-p)/n]^{1/2}$

where n is the sample size and DEFT, the square root of the design effect, is a factor used to adjust for the particular sample design used in HS&B. Table A3 provides the DEFT factors for different HS&B samples and subsamples.

In evaluating a difference between two independent percentages, the standard error of the difference may be conservatively approximated by taking the square root of the sum of the squared standard errors of the two percentages. For example, in the 1986 follow-up of 1980 sophomores, 84.0 percent of the men and 77.2 percent of the women felt that being successful in work was "very important," a difference of 6.8 percentage points. Using the formula and the sample sizes from table A2 and the DEFT factors from table A3, the standard errors of the two percentages being compared are calculated to be:

$$1.43[(84.0)(16.0)/(5,391)]^{1/2} = .714$$

 $1.43[(77.2)(22.8)/(5.857)]^{1/2} = .784$

The standard error of the difference is therefore

$$(.714^2 + .784^2)^{1/2} = (.510 + .615)^{1/2} = 1.06$$

The sampling error (95 chances in 100) of the difference is approximately double the standard error, or approximately 2.1 percentage points, and the 95 percent confidence interval for the difference is 6.8 ± 2.1 , or 4.7 to 8.9 percentage points.

The standard error estimation procedure outlined above does not compensate for survey item nonresponse, which is a source of nonsampling error. (Table A2 reflects the maximum number of responses that could be tabulated by demographic characteristics.) For example, of the 10,925 respondents in the 1984 follow-up survey of 1980 high school graduates, 372, or 3.4 percent, did not respond to the particular question on whether they had ever used a pocket calculator. Item nonresponse varied considerably. A very low nonresponse rate of 0.1 percent was obtained for a question asking whether the respondent had attended a postsecondary institution. A much higher item nonresponse rate of 12.2 percent was obtained for a question asking if the respondent had used a micro or minicomputer in high school. Typical item nonresponse rates ranged from 3 to 4 percent.

The Hispanic analyses presented in this report relied on students' self-identification as members of one of four Hispanic subgroups: Mexican, Mexican-American, Chicano; Cuban; Puerto-Rican, Puertorriqueno, or Boricua; or other Latin American, Latino, Hispanic, or Spanish descent.

An NCES series of technical reports and data file users manuals provides additional information on the survey methodology.

1990 High School Transcript Study Tabulations

This study involved analysis of transcripts of 1990 high school graduates from 330 schools. The analyses were based on approximately 21,500 1990 graduates selected for the National Assessment of Educational Progress (NAEP) in 1990. The study collected information such as course lists, graduation requirements, and the definition of units of credit and grades, on a school-level basis.

Similar studies were conducted of course taking patterns of 1987 and 1982 graduates. The 1987 data are based on approximately 22,799 transcripts from 433 schools obtained as part of the 1987 High School Transcript Study. The 1982 data are based on approximately 12,000 transcripts collected by the High School and Beyond Project.

Because the 1982 High School and Beyond study used a different method for identifying handicapped students than did the 1987 and 1990 transcript studies, and in order to make the statistical summaries as comparable as possible, all the counts and percentages in this report are restricted to students whose records indicate that they had not participated in a special education program. This restriction lowers the number of 1990 graduates represented in the tables to 20.866.

Integrated Postsecondary Education Data System

The Integrated Postsecondary Education Data System (IPEDS) surveys approximately 11,000 post-secondary institutions, including universities and colleges, as well as institutions offering technical and vocational education beyond the high school level. This survey, which began in 1986, replaced the Higher Education General Information Survey (HEGIS).

IPEDS consists of eight integrated components that obtain information on who provides postsecondary education (institutions), who participates in it and completes it (students), what programs are offered and what programs are completed, and both the human and financial resources involved in the provision of institutionally based postsecondary education. Specifically, these components include: Institutional Characteristics, including instructional activity; Fall Enrollment, including age and residence; Enrollment in Occupationally Specific Programs; Completions; Finance; Staff; Salaries of Full-Time Instructional Faculty; and Academic Libraries.

The higher education portion of this survey is a census of accredited 2- and 4-year colleges. Prior to 1993, data from the technical and vocational institutions were collected through a sample survey. Beginning in 1993, all data are gathered in a census of all postsecondary institutions. The tabulations on "Institutional Characteristics" developed for this edition of the *Digest* are based on lists of all institutions and are not subject to sampling errors.

Prior to the establishment of IPEDS in 1986, HEGIS acquired and maintained statistical data on the characteristics and operations of institutions of higher education. Implemented in 1966, HEGIS was an annual universe survey of institutions accredited at the college level by an agency recognized by the Secretary of the U.S. Department of Education. These institutions were listed in NCES's Education Directory, Colleges and Universities.

The trend tables presented in this report draw on HEGIS surveys which solicited information concerning institutional characteristics, faculty salaries, finances, enrollment, and degrees. Since these surveys were distributed to all higher education institutions, the data presented are not subject to sampling error. However, they are subject to nonsampling error, the sources of which varied with the survey instrument. Information concerning the nonsampling error of the enrollment and degrees surveys draws extensively on the "HEGIS Post-Survey Validation Study" conducted in 1979.

Further information on IPEDS may be obtained from:

Roslyn A. Korb Surveys and Cooperative Systems Group National Center for Education Statistics 555 New Jersey Avenue NW Washington, DC 20208–5652 Roslyn__Korb@ed.gov

Institutional Characteristics

This survey provides the basis for the universe of institutions presented in the *Directory of Postsecond-* ary *Institutions*. The universe comprises institutions

that met certain accreditation criteria and offered at least a 1-year program of college-level studies leading toward a degree. All of these institutions were certified as eligible by the U.S. Department of Education's Division of Eligibility and Agency Evaluation. The survey collects basic information necessary to classify the institutions including control, level, and kinds of programs; information on tuition, fees, and room and board charges; and unduplicated full-year enrollment counts and instructional activity.

Fall Enrollment

This survey has been part of the HEGIS and IPEDS series since 1966. The enrollment survey response rate is relatively high; the 1995 response rate was 97 percent for higher education institutions, or 89 percent overall. Major sources of nonsampling error for this survey as identified in the 1979 report, were classification problems, the unavailability of needed data, interpretation of definitions, the survey due date, and operational errors. Of these, the classification of students appears to have been the main source of error. Institutions had problems in correctly classifying first-time freshmen and other first-time students for both full-time and part-time categories. These problems occurred most often at 2-year institutions (private and public) and private 4-year institutions. In the 1977-78 HEGIS validation studies, the classification problem led to an estimated overcount of 11,000 full-time students and an undercount of 19,000 part-time students. Although the ratio of error to the grand total was quite small (less than 1 percent), the percentage of errors was as high as 5 percent for detailed student levels and even higher at certain aggregation levels.

Beginning with fall 1986, the survey system was redesigned with the introduction of the Integrated Postsecondary Education Data System (IPEDS) (see above). The IPEDS system comprises all post-secondary institutions, but also maintains comparability with earlier surveys by allowing HEGIS institutions to be tabulated separately. The survey allows (in alternating years) for the collection of age and residence data.

Salaries, Tenure, and Fringe Benefits of Full-Time Instructional Faculty

This institutional survey has been conducted for most years from 1966–67 to 1987–88, and annually since 1989–90. Although the survey form changed a number of times during those years, only comparable data are presented in this report.

Between 1966-67 and 1985-86 this survey differed from other HEGIS surveys in that imputations were not made for nonrespondents. Thus, there is some possibility that the salary averages presented in this report may differ from the results of a com-

plete enumeration of all colleges and universities. Beginning with the surveys for 1987–88, the IPEDS data tabulation procedures included imputations for survey nonrespondents. The response rate for the 1995–96 survey was 95 percent for higher education institutions, or 83 percent overall. Because of the higher response rate for public colleges, it is probable that the public colleges' salary data are more accurate than the data for private colleges. Although data from these surveys are not subject to sampling error, sources of nonsampling error may include computational errors and misclassification in reporting and processing. NCES reviews individual colleges' data for internal and longitudinal consistency and contacts the colleges to check inconsistent data.

Completions

This survey was part of the HEGIS series throughout its existence. However, the degree classification taxonomy was revised in 1970–71, 1982–83, and 1991–92. Collection of degree data has been maintained through the IPEDS system.

Though information from survey years 1970-71 through 1981-82 is directly comparable, care must be taken if information before or after that period is included in any comparison. Degrees-conferred trend tables arranged by the 1991-92 classification are included in the Digest to provide consistent data from 1970-71 to 1994-95. Data in this edition on associate and other formal awards below the baccalaureate, by field of study, cannot be made comparable with figures prior to 1982-83. nonresponse rate did not appear to be a significant source of nonsampling error for this survey. The return rate over the years has been high, with the higher education response rate for the 1994-95 survey at 97 percent. The overall response rate including the noncollegiate institutions is 88 percent. Because of the high return rate for the institutions of higher education, nonsampling error caused by imputation is also minimal.

The major sources of nonsampling error for this survey were differences between the NCES program taxonomy and taxonomies used by the colleges, classification of double majors, operational problems, and survey timing. In the 1979 HEGIS validation study, these sources of nonsampling contributed to an error rate of 0.3 percent overreporting of bachelor's degrees and 1.3 percent overreporting of master's degrees. The differences, however, varied greatly among fields. Over 50 percent of the fields selected for the validation study had no errors identified. Categories of fields that had large differences were business and management, education, engineering, letters, and psychology. It was also shown that differences in proportion to the published figures were less than 1 percent for most of the selected

fields that had some errors. Exceptions to these were: master's and Ph.D. programs in labor and industrial relations (20 percent and 8 percent); bachelor's and master's programs in art education (3 percent and 4 percent); bachelor's and Ph.D. programs in business and commerce, and in distributive education (5 percent and 9 percent); master's programs in philosophy (8 percent); and Ph.D. programs in psychology (11 percent).

Financial Statistics

This survey was part of the HEGIS series and has been continued under the IPEDS system. Changes were made in the financial survey instruments in fiscal years (FY) 1976, 1982, and 1987. The FY 76 survev instrument contained numerous revisions to earlier survey forms and made direct comparisons of line items very difficult. Beginning in FY 82, Pell Grant data were collected in the categories of federal restricted grants and contracts revenues and restricted scholarships and fellowships expenditures. The introduction of IPEDS in the FY 87 survey included several important changes to the survey instrument and data processing procedures. While these changes were significant, considerable effort has been made to present only comparable information on trends in this report and to note inconsistencies. Finance tables for this publication have been adjusted by subtracting the largely duplicative Pell Grant amounts from the later data to maintain comparability with pre-FY 82 data.

Possible sources of nonsampling error in the financial statistics include nonresponse, imputation, and misclassification. The response rate has been about 85 to 90 percent for most of the years reported. The response rate for the FY 1995 survey was 94 percent for higher education institutions, or 83 percent overall.

Two general methods of imputation were used in HEGIS. If the prior year's data were available for a nonresponding institution, these data were inflated using the Higher Education Price Index and adjusted according to changes in enrollments. If no previous year's data were available, current data were used from peer institutions selected for location (state or region), control, level, and enrollment size of institution. In most cases estimates for nonreporting institutions in IPEDS were made using data from peer institutions.

Beginning with FY 87, the IPEDS survey system included all postsecondary institutions, but maintained comparability with earlier surveys by allowing 2- and 4-year HEGIS institutions to be tabulated separately. The finance data tabulated for this publication reflect totals for the HEGIS or higher education institutions only. For FY 87 through FY 91, in order to maintain comparability with the historical time se-

ries of HEGIS institutions, data were combined from two of the three different survey forms that make up the IPEDS survey system. The vast majority of the data were tabulated from Form 1, which was used to collect information from public and private nonprofit 2- and 4-year colleges. Form 2, a condensed form, was used to gather data for the 2-year proprietary institutions. Because of the differences in the data requested on the two forms, several assumptions were made about the Form 2 reports so that their figures could be included in the institutions of higher education totals.

In IPEDS, the Form 2 institutions were not asked to separate appropriations from grants and contracts, nor state from local sources of funding. For the Form 2 institutions, all the federal revenues were assumed to be federal grants and contracts and all of the state and local revenues were assumed to be restricted state grants and contracts. All other Form 2 sources of revenue, except for tuition and fees and sales and services of educational activities, were included under "other." Similar adjustments were made to the expenditure accounts. The Form 2 institutions reported instruction and scholarship and fellowship expenditures only. All other educational and general expenditures were allocated to academic support.

To reduce reporting error, NCES uses national standards for reporting finance statistics. These standards are contained in College and University Business Administration: Administrative Services (1974 Edition), and the Financial Accounting and Reporting Manual for Higher Education (1990 Education), published by the National Association of College and University Business Officers; Audits of Colleges and Universities (as amended August 31, 1974), by the American Institute of Certified Public Accountants; and HEGIS Financial Reporting Guide (1980), by NCES. Wherever possible, definitions and formats in the survey form are consistent with those in these four accounting texts.

Staff

The fall staff data presented in this publication were collected by NCES, through the IPEDS system, which collected data from postsecondary institutions, including all 2- and 4-year higher education institutions. The NCES collects staff data biennially in odd numbered years in institutions of postsecondary education.

The "Fall Staff" questionnaires were mailed out by NCES between October and November 1993; the respondents reported the employment statistics in their institution that cover the payroll period closest to October 1 of the survey year.

The "Fall Staff" survey had an overall response rate of 87 percent. The response rate for higher education institutions was 92 percent.

The Third International Mathematics and Science Study

The Third International Mathematics and Science Study (TIMSS) is the largest, most comprehensive, and most rigorous international comparison of education ever undertaken. During the 1995 school year, the study tested the mathematics and science knowledge of half a million students from 41 nations at five different grade levels. At the same time, the students, their teachers, and the principals of their schools were asked to respond to questionnaires about their backgrounds and their attitudes, experiences, and practices in the teaching and learning of mathematics and science.

TIMSS is a collaborative research project sponsored by the International Association for the Evaluation of Educational Achievement (IEA). The TIMSS International Study Center is housed in the Center for the Study of Testing, Evaluation, and Educational Policy (CSTEEP) at Boston College. The TIMSS International Study Director, Albert E. Beaton, directs the international activities of the study, together with his staff at the International Study Center. To contact the TIMSS International Study Center:

National Adult Literacy Survey

The National Adult Literacy Survey was created as a new measure of literacy and funded by the Department of Education and by 12 states. It is the third and largest assessment of adult literacy funded by the federal government. The aim of the survey is to profile the English literacy of adults in the United States based on their performance across a wide array of tasks that reflect the types of materials and demands they encounter in their daily lives.

To gather the information on adults' literacy skills, trained staff interviewed nearly 13,600 individuals aged 16 and older during the first eight months of 1992. These participants had been randomly selected to represent the adult population in the country as a whole. Black and Hispanic households were oversampled to ensure reliable estimates of literacy proficiencies and to permit analyses of the performance of these subpopulations. In addition, some 1,100 inmates from 80 federal and state prisons were interviewed to gather information on the proficiencies of the prison population. In total, over 26,000 adults were surveyed.

Each survey participant was asked to spend approximately an hour responding to a series of diverse literacy tasks as well as questions about his or her

demographic characteristics, educational background, reading practices, and other areas related to literacy. Based on their responses to the survey tasks, adults received proficiency scores along three scales which reflect varying degrees of skill in prose, document and quantitative literacy. The results of the survey were published in a report, *Adult Literacy in America* in September 1993.

Washington, DC 20208–5653
Andrew_ Kolstad@ed.gov

National Assessment of Educational Progress

The National Assessment of Educational Progress (NAEP) is a series of cross-sectional studies designed and initially implemented in 1969. NAEP has gathered information about selected levels of educational achievement across the country. NAEP has surveyed the educational attainments by age and grade (9-, 13-, and 17-year-olds, and 4th-, 8th-, and 12th-graders), and young adults (ages 25–35) in 10 learning areas. Long-term trends are assessed by age and measure changes in educational achievement, while specific subject areas are assessed periodically by grade level. Different learning areas have been assessed periodically, and all areas have been reassessed in order to measure possible changes in educational achievement.

The assessment data presented in this publication were derived from tests designed and conducted by the Education Commission of the States (1969-1983) and by the Educational Testing Service (1983) to present). Three-stage probability samples have been used. The primary sampling units have been stratified by region and, within region, by state, size of community, and, for the two smaller sizes of community strata, by socioeconomic level. The first stage of sampling entails defining and selecting primary sampling units (PSUs). For each age/grade level (4, 8, and 12) the second stage entails enumerating. stratifying, and randomly selecting schools, both public and private, within each PSU selected at the first stage. The third stage involves randomly selecting students within a school for participation in NAEP. Assessment exercises have been administered either to individuals or to small groups of students by specially trained personnel.

Sample sizes for the reading proficiency portion of the 1995–96 NAEP long-term trends study were 5,019 for the 9-year-olds, 5,493 for the 13-year-olds, and 4,669 for the 17-year-olds. Response rates were 96 percent, 92 percent, and 84 percent, respectively. Response rates for earlier years (1970–71, 1974–75, 1979–80) were generally lower. For example, the lowest response rate for the 9-year-olds was 88 percent in 1974–75, and the lowest response rate overall was 70 percent for the 17-year-olds in 1974–75.

Sample sizes in math and science portions of the long-term trends were: 5,414 9-year-olds, 5,658 13-year-olds, and 3,539 17-year-olds. Response rates were 95, 93, and 84 percent, respectively.

Assessments focusing on particular subject areas are conducted separately from long-term assessments. The 1993–94 U.S. history data in this report are based on a nationally representative sample of 5,499 4th-graders, 8,767 8th-graders, and 7,818 12th-graders. The response rates were: 90 percent for 4th-graders, 90 percent for 8th-graders, and 89 percent for 12th-graders.

The 1991–92 writing assessment was administered to 7,166 4th-graders, 11,112 8th-graders, and 11,532 12th-graders. Student response rates for the 1992–93 writing assessment were 93 percent for the 4th-graders, 89 percent for the 8th-graders, and 81 percent for the 12th-graders. Sample sizes varied depending on the test items and the scoring method used.

In 1995–96, a science assessment was administered to 7,305 4th-graders, 7,774 8th-graders, and 7,537 12th-graders. The response rates were 94 percent for the 4th-graders, 94 percent for the 8th-graders, and 93 percent for the 12th-graders.

The 1993–94 geography assessment was administered to 5,507 4th-graders, 6,878 8th-graders, and 6,234 12th-graders. The response rates for the assessment were 93 percent for the 4th-graders, 93 percent for the 8th-graders, and 90 percent for the 12th-graders.

In 1990, representative state-level data were produced for mathematics at the 8th-grade level. This was the first time NAEP had produced data on a state-by-state level. In 1996, state-level assessments were conducted in 4th- and 8th-grade mathematics and 8th-grade science.

Information from NAEP is subject to both nonsampling and sampling error. Two possible sources of nonsampling error are nonparticipation and instrumentation. Certain populations have been oversampled to assure samples of sufficient size for analysis. Instrumentation nonsampling error could result from failure of the test instruments to measure what is being taught and, in turn, what is being learned by the students.

National Education Longitudinal Study of 1988

The National Education Longitudinal Study of 1988 (NELS:88) is the third major longitudinal study sponsored by the National Center for Education Statistics. The two studies that preceded NELS:88, the National Longitudinal Study of the High School Class of 1972 (NLS-72) and High School and Beyond (HS&B) in 1980, surveyed high school seniors (and sophomores in HS&B) through high school, postsecondary education, and work and family formation experiences. Unlike its predecessors, NELS:88 begins with a cohort of 8th-grade students. In 1988, some 25,000 eighth graders, their parents, their teachers, and their school principals were surveyed. Follow-ups were conducted in 1990, 1992, and 1994, when a majority of these students were in 10th and 12th grades, and then 2 years after their scheduled high school graduation. A similar follow-up will be conducted in 2000.

NELS:88 is designed to provide trend data about critical transitions experienced by young people as they develop, attend school, and embark on their careers. It will complement and strengthen state and local efforts by furnishing new information on how school policies, teacher practices, and family involvement affect student educational outcomes (i.e., academic achievement, persistence in school, and participation in postsecondary education). For the base year, NELS:88 includes a multifaceted student questionnaire, four cognitive tests, a parent questionnaire, a teacher questionnaire, and a school questionnaire.

In 1990, when the students were in 10th grade, the students, school dropouts, their teachers, and their school principals were surveyed. The 1988 survey of parents was not a part of the 1990 follow-up. In 1992, when the students were in 12th grade, the second follow-up conducted surveys of students, dropouts, parents, teachers, and school principals. Also, information on the students' transcripts, the schools' course offerings, and enrollments were collected, and there was a school effects survey. Tables A4 and A5 present the respondent counts and design effects of NELS:88 and the 1990 and 1992 follow-ups.

Further information about the NELS:88 survey can be obtained from:

Washington, DC 20208–5651
Jeffrey Owings@ed.gov

National Household Education Survey

The National Household Education Survey (NHES) is a data collection system that is designed to address a wide range of education-related issues. Surveys were conducted in 1991, 1993, 1995, and 1996.

The NHES targets specific populations for detailed data collection. It is intended to provide more detailed data on the topics and populations of interest than are collected through supplements to other household surveys.

The topics addressed by the NHES:91 were early childhood education and adult education. About 60,000 households were screened for the NHES:91. In the Early Childhood Education component, about 14,000 parents/guardians of 3- to 8-year olds completed interviews about their children's early educational experiences. Included in this component were participation in nonparental care/education. care/education arrangements and school, and family, household, and child characteristics. In the NHES:91 Adult Education component, about 9,800 persons 16 vears of age and older, identified as having participated in an adult education activity in the previous 12 months, were questioned about their activities. Data were collected on programs and up to four courses, including the subject matter duration, sponsorship, purpose, and cost. Information on the household and the adult's background and current employment also was collected. In the NHES:95 survey, of the 23,969 adults sampled for the adult education component, 80 percent (19,722) completed the interview.

In the NHES:93, nearly 64,000 households were screened. Approximately 11,000 parents of 3- to 7-year olds completed interviews for the School Readiness component. Topics included were the developmental characteristics of preschoolers, school adjustment and teacher feedback to parents for kindergartners and primary students, center-based program participation, early school experiences, home activities with family members, and health status. In the School Safety and Discipline component, about 12,700 parents of children in grades 3 through 12, and about 6,500 youth in grades 6 through 12, were interviewed about their school experiences. Topics included the school learning environment, discipline

policy, safety at school, victimization, the availability and use of alcohol/drugs, and alcohol/drug education. Peer norms for behavior in school and substance use were also included in this topical component. Extensive family and household background information was collected, as well as characteristics of the school attended by the child.

In the NHES:95 survey, the Early Childhood Program participation component and the Adult Education component were similar to those in 1991. In the Early Childhood component, about 14,000 parents of children from birth to third grade were interviewed. For the Adult Education component, about 19,500 civilian adults were interviewed.

In the spring of 1996, Parent and Family Involvement in Education and Civic Involvement were covered. For the Parent and Family Involvement component, nearly 21,000 parents of children grades 3 to 12 were interviewed. For the Civic Involvement component, about 8,000 youth grades 6 to 12, about 9,000 parents, and about 2,000 adults were interviewed. The 1996 survey also addressed public library use. Adults in almost 55,000 households were interviewed to support state-level estimates of household public library use.

National Longitudinal Study

The National Longitudinal Study (NLS) of the high school class of 1972 began with the collection of base-year survey data from a sample of about 19,000 high school seniors in spring of 1972. Five more follow-up surveys of these students were conducted in 1973, 1974, 1976, 1979, and 1986. The NLS was designed to provide the education community with information on the transitions of young adults from high school through postsecondary education and the workplace.

The sample design for the NLS is a stratified, two-stage probability sample of students from all schools, public and private, in the 50 states and the District of Columbia with a 12th-grade enrollment during the 1971–72 school year. During the first stage of sampling, about 1,070 schools were selected for participation in the base-year survey. As many as 18 students were selected at random from each of the sample schools. Both the size of the school and student samples were increased during the first follow-up survey. Beginning with the first follow-up and con-

tinuing through the fourth follow-up, about 1,300 schools participated in the survey and slightly under 23,500 students were sampled. The response rates for each of the different rounds of data collection have been 80 percent or higher.

Sample retention rates across the survey years have been quite high. For example, of the individuals responding to the base-year questionnaire, the percentages who responded to the first, second, third, and fourth follow-up questionnaires were about 94, 93, 89, and 83 percent, respectively.

National Postsecondary Student Aid Study

The National Postsecondary Student Aid Study (NPSAS) is a comprehensive nationwide study of how students and their families pay for postsecondary education. It covers national representative samples of undergraduates, graduates, and first-professional students; students attending less than 2-year institutions, 2- to 3-year schools, 4-year colleges, and major universities. Participants include students who do not receive aid and their parents as well as students who do receive financial aid and their parents. Study results are used to help determine future federal policy regarding student financial aid. The study is conducted every three years.

The first NPSAS was conducted during the 1986–87 school year. Data were gathered from about 1,074 colleges, universities, and other postsecondary institutions; 60,000 students; and 14,000 parents. These data provided information on the cost of post-secondary education, the distribution of financial aid, and the characteristics of both aided and nonaided students and their families.

As a part of the 1992–93 NPSAS, information on 77,000 undergraduates and graduate students enrolled during the school year was collected at 1,000 postsecondary institutions. The sample included students enrolled at any time between July 1, 1992 and June 30, 1993. About 66,000 students and a subsample of their parents were interviewed by telephone.

The 1996 NPSAS contains information on more than 48,000 undergraduate and graduate students from 973 postsecondary institutions. Students were enrolled at any time during the 1995–96 school year.

National Study of Postsecondary Faculty

This study is in response to a continuing need for data on faculty and instructors—persons who directly affect the quality of education in postsecondary institutions. Faculty are the pivotal resource around which the process and outcomes of postsecondary education revolve. They often determine curriculum content, student performance standards, and the quality of students' preparation for careers. Faculty members perform research and development work upon which this nation's technological and economic advancement depend. Through their public service activities, they make valuable contributions to society. For these reasons, it is essential to understand who they are; what they do; and whether, how, and why they are changing. The National Study of Postsecondary Faculty (NSOPF) was designed to provide data about faculty to postsecondary researchers, planners, and policymakers. NSOPF is the most comprehensive study of faculty in postsecondary educational institutions ever undertaken.

The first cycle of NSOPF was conducted by the National Center for Education Statistics (NCES) with support from the National Endowment for the Humanities (NEH) in 1987–88 (NSOPF:88) with a sample of 480 colleges and universities, over 3,000 department chairpersons, and over 11,000 instructional faculty. The second cycle of NSOPF was conducted by NCES with support from NEH and the National Science Foundation (NSF) in 1992–93 (NSOPF:93). NSOPF:93 was limited to surveys of institutions and faculty, but with a substantially expanded sample of 974 colleges and universities, and 31,354 faculty and instructional staff.

Projections of Education Statistics

Since 1964, NCES has published projections of key statistics for elementary and secondary schools and institutions of higher education. These projections include statistics such as enrollments, instructional staff, graduates, earned degrees, and expenditures. The *Projections* reports include several alter-

native projection series and a methodology section describing the techniques and assumptions used to prepare them. Data in this edition of the *Digest* reflect the middle alternative projection series.

Differences between the reported and projected values are, of course, almost inevitable. An evaluation of past projections revealed that, at the elementary and secondary level, projections of enrollments have been quite accurate: mean absolute percentage differences for enrollment were less than 1 percent for projections from 1 to 5 years in the future, while those for teachers were less than 4 percent. At the higher education level, projections of enrollment have been fairly accurate: mean absolute percentage differences were 5 percent or less for projections from 1 to 5 years into the future.

For further information about projection methodology and accuracy, contact:

Library Statistics Program

Nationwide, public library statistics are collected using the Public Libraries Survey and disseminated annually through the Federal-State Cooperative System for public library data (FSCS). Descriptive statistics are produced for nearly 9,000 public libraries. The Public Libraries Survey includes information about staffing; operating income and expenditures; type of governance; type of administrative structure; size of collection; and service measures such as reference transactions, public service hours, interlibrary loans, circulation, and library visits. In FSCS, respondents supply the information electronically, and data are edited and tabulated in machine-readable form.

The respondents are 8,921 public libraries identified in the 50 states and the District of Columbia by state library agencies. At the state level, FSCS is administered by State Data Coordinators, appointed by the Chief Officer of each State Library Agency. The State Data Coordinator collects the requested data from local public libraries and submits these data to NCES. An annual training conference sponsored by NCES is provided for the State Data Coordinators. A steering committee representing State Data Coordinators and other public library constituents is active in the development of FSCS data elements and software. Technical assistance to states is provided by phone and in person by the FSCS steering committee and by NCES staff and contractors. All 50 states and the District of Columbia have submitted data which are available for individual public libraries and are also aggregated to state and national levels.

Since 1990, data collections have been collected electronically. The most recent software is called DECPLUS. It includes identifying information on all known public libraries and their outlets, some state libraries, and some library systems and cooperatives. Beginning in 1994, this resource was available for drawing samples for special surveys on such topics as literacy, access for the disabled, and library construction.

Under the Academic Libraries Survey (ALS), NCES surveyed academic libraries on a 3-year cycle between 1966 and 1988. Since 1988, ALS has been a component of the Integrated Postsecondary Education Data System and is on a 2-year cycle. ALS provides data on about 3,500 academic libraries. In aggregate, these data provide an overview of the status of academic libraries nationally and statewide. The survey collects data on the libraries in the entire universe of accredited higher education institutions and on the libraries in nonaccredited institutions with a program of 4 years or more. ALS produces descriptive statistics on academic libraries in post-secondary institutions in the 50 states, the District of Columbia and the outlying areas.

The School Library Statistics Survey collected data on school libraries/media centers in 1990-91. This survey asked questions on libraries in public and private schools as part of the Schools and Staffing Survey (SASS). These questionnaires were revised and a sample survey of about 7,600 schools was conducted during school year 1993-94. The library components of the 1990-91 SASS include: number of students served and number of professional staff and aides; at the district level, number of full-time equivalent librarians/media specialists, vacant positions, positions abolished, and approved positions; and amount of librarian input in establishing curriculum. The 1993-94 survey was much more extensive and added questions concerning media centers and collections of libraries.

Additional information on these academic and school library studies is available from:

Survey of Recent College Graduates

Since 1976, NCES has conducted six surveys of baccalaureate and master's degree recipients 1 year after graduation. The Recent College Graduates surveys have concentrated on those graduates entering the teaching profession. The surveys link major field of study with outcomes such as whether the respondent entered the labor force or was seeking additional education. Data on labor force includes employment status (unemployed, part-time or full-time employed), occupation, salary, career potential, relation to major field of study, and need for a college degree. To obtain accurate results on teachers, graduates with a major in education are oversampled. The latest 2 surveys continued to oversample education majors, but increased the sampling of graduates with majors in other fields.

The survey involves a two-stage sampling procedure. First, the universe of institutions awarding bachelor's and master's degrees is stratified by number or percentage of degrees awarded to education graduates and by control of institution (public or private). A sample of institutions within each strata is then selected. Second, for each of the selected institutions, a list of their graduates by major field of study is obtained and a sample of graduates is drawn by major field of study. Graduates in certain major fields of study (e.g., education, mathematics, physical sciences) are sampled at higher rates than graduates in other fields. Roughly one year after graduation the sample of graduates is located, contacted by mail or telephone, and asked to respond to the questionnaire.

The locating process is more detailed than in most surveys. Nonresponse rates are directly related to the time, effort, and resources used in locating graduates rather than to graduates' refusals to participate. Despite the difficulties in locating graduates, response rates for recent studies are comparable to studies without locating problems. The data presented in this report provide valuable information not available elsewhere about college outcomes.

The 1976 survey of 1974–75 college graduates was the first and smallest of the series. The sample consisted of 211 schools, of which 200 (96 percent) responded. Of the 5,854 graduates in the sample, 4,350 responded, for a response rate of 79 percent.

The 1981 survey was somewhat larger, with a coverage of 297 institutions and 15,852 graduates. Responses were obtained from 283 institutions, for an institutional response rate of 95 percent, and from 9,312 graduates (716 others were determined to be out of scope), for a response rate of 74 percent.

The 1985 survey sampled 404 colleges and 18,738 graduates of whom 17,853 were found to be in scope. Responses were obtained from 13,200 students, for a response rate of 78 percent. The response rate for the colleges was 98 percent. The 1987 survey form was sent to 21,957 graduates. Responses were received from 16,878, for a response rate of 79.7 percent.

The 1991 RCG study involved a sample of 18,135 graduates of 400 bachelor's and master's degree-granting institutions. The 18,135 graduates consisted of 16,172 bachelor's degrees recipients and 1,963 master's degree recipients between July 1, 1989 and June 30, 1990. Random samples of graduates were selected from lists stratified by field of study. Graduates in education, mathematics, and the physical sciences were sampled at a higher rate, as were minority graduates to provide a sufficient number of these graduates for analysis purposes. The graduates included in the sample were selected in proportion to the institution's number of graduates. The institutional response rate was 95 percent and the graduate response rate was 83 percent.

Table A10 contains sample sizes for number of graduates, by field, for the 1976, 1981, 1985, 1987, and 1991 surveys.

Further information on this survey may be obtained from:

Baccalaureate and Beyond Longitudinal Study

The Baccalaureate and Beyond Longitudinal Study (B&B) is based on the National Postsecondary Student Aid Study (NPSAS) and provides information concerning education and work experience after completing the bachelor's degree. B&B provides cross-sectional information 1 year after bachelor's degree completion (comparable to the Recent College Graduate Study), while at the same time providing longitudinal data concerning entry into and progress through graduate level education and the work force. It also provides information on entry into, persistence and progress through, and completion of graduate level education-information not available through follow-ups involving high school cohorts or even college entry cohorts, both of which are restricted in the number who actually complete a bachelor's degree and continue their education.

B&B will follow NPSAS baccalaureate degree completers for a 12-year period after completion, beginning with NPSAS:93. About 11,000 students who completed their degrees in the 1992–93 academic year were included in the first B&B (B&B:93/94). In addition to the student data, B&B collected post-secondary transcripts covering the undergraduate period, providing complete information on progress and persistence at both the undergraduate and graduate

levels. New B&B cohorts will alternate with BPS in using NPSAS as their base.

Public School Principal Survey on Safe, Disciplined, and Drug-Free Schools

This sample survey used the NCES Fast Response Survey System (FRSS), which is designed to gather timely information for policy makers. The survey was conducted in 1991 by Westat, Inc. A national sample of 830 public school principals, represented by a response rate of 94 percent, answered questions regarding the extent of discipline problems within their schools. They were also questioned about the nature and effectiveness of their schools' current policies and drug education programs.

This survey categorized principals by instructional level (elementary, secondary), type of school location (city, urban fringe, town, rural), enrollment size (less than 300, 300 to 999, 1,000 or more), region (Northeast, Central, Southeast, and West), and percentage of students receiving free or reduced-price lunches (10 percent or less, 11 to 40 percent, 41 percent or more).

Data Development and Longitudinal Studies Group National Center for Education Statistics 555 New Jersey Avenue NW Washington, DC 20208–5651 Bernard__Greene@ed.gov

Public School Kindergarten Teachers' Views on Children's Readiness for School

This sample survey of 1,448 public school kindergarten teachers was conducted as part of a national early childhood assessment system for National Education Goal One: "By the year 2000, all American children will start school ready to learn." The survey obtained data on kindergarten teachers' views of children's readiness and on the teacher's classroom practices.

Data Development and Longitudinal Studies Group National Center for Education Statistics 555 New Jersey Avenue NW Washington, DC 20208–5651 Bernard_Greene@ed.gov

Advanced Telecommunications in U.S. Public Elementary and Secondary Schools, 1996

Current information regarding the availability and use of telecommunications, and in particular, access to the Internet, was requested by this sample survey. The data were gathered from a nationally representative sample of public elementary and secondary schools in fall 1996. The survey was commissioned in response to the National Information Infrastructure (NII) set forth by the President to encourage an acceleration of the goal to connect all of the nation's school classrooms, as well as libraries, hospitals, and law enforcement agencies, to the "Information Superhighway."

Data Development and Longitudinal Studies Group National Center for Education Statistics 555 New Jersey Avenue NW Washington, DC 20208–5651 Bernard__Greene@ed.gov

Schools and Staffing Survey

The Schools and Staffing Survey (SASS) is a set of linked questionnaires that covers public school districts, public and private schools, principals, and teachers, as its core components. SASS was first conducted for the National Center for Education Statistics by the Bureau of the Census during the 1987-88 school year. SASS subsequently was conducted in 1990-91 and in 1993-94. The next SASS is scheduled for school year 1999-2000. SASS is a mailed questionnaire with telephone follow-up that collects data on the nation's public and private elementary and secondary teaching force, characteristics of schools and school principals, demand for teachers, and school/school district policies. The 1990-91 and 1993-94 SASS also collected data on Bureau of Indian Affairs (BIA) schools. The SASS data are collected through a sample survey of schools, the school districts associated with sampled schools, school principals, and teachers. The 1993-94 SASS expanded as well to cover school libraries and librarians, and field tested an administrative student records questionnaire.

The 1993–94 SASS estimates are based upon a sample consisting of approximately 9,900 public schools, 3,300 private schools, and 5,500 public school districts associated with the public schools in the sample. From these schools, about 57,000 public school teachers and 11,500 private school teachers were selected for the 1993–94 SASS teacher survey.

The public school sample for the 1993–94 SASS was based upon the 1991–92 school year Common Core of Data (CCD), the compilation of all the nation's public school districts and public schools. CCD

is collected annually from state education agencies. The frame includes regular public schools, Department of Defense-operated military base schools in the United States, and nonregular schools such as special education, vocational, and alternative schools. SASS is designed to provide national estimates for public and private school characteristics and state estimates for school districts, public schools, principals, and teachers. The teacher survey is designed as well to allow comparisons between new and experienced teachers, and between bilingual/ESL teachers and other teachers.

The private school sample for the 1993–94 SASS was selected from the 1991–92 Private School Universe Survey (PSS), supplemented with list updates from states and some associations available in time for sample selection. PSS collects basic data on all of the nation's private schools from two sources: the list frame and the area search frame. The list frame was compiled from a set of private school associations that provide NCES with their membership lists and states that gather lists of private schools. The area search frame consisted of schools not included on the list frame that were compiled from local sources in a sample of counties around the United States. Private school estimates are available at the national level and by type of private school.

The Teacher Demand and Shortage (school district) and School Principal Questionnaires were mailed out first in October 1993, along with School Library/Media Center and Library Media Specialist/Librarian Questionnaires. The weighted response rate for the Teacher Demand and Shortage Questionnaire was 93.9 percent. Weighted response rates for the Public School Principal Questionnaire and the Private School Questionnaire were 96.6 percent and 87.6 percent, respectively.

In December 1993, public, private, and BIA school questionnaires were mailed out. The public, private, and BIA teacher questionnaires were sent out in several batches, between mid-December 1993 and early February 1994. Weighted response rates for the Public School Questionnaire and the Private School Questionnaire were 92.3 percent and 83.2 percent, respectively. Five percent of public schools and 9 percent of private schools did not provide a list of teachers in their schools and were thus ineligible for sampling. Weighted response rates were 88.2 percent for public school teachers and 80.2 percent for private school teachers.

Item response rates were varied, but generally high, ranging from 67 to 100 percent for the TDS, 65 to 100 percent for public school principal questions, 55 to 100 percent for private school principal items, 83 to 100 percent for public school items, 61 to 100 percent for private school survey items, 71 to 100

percent for public school teacher items, and 69 to 100 percent for private school teacher items.

Public-use and restricted-use microdata files are available on CD-ROM or 9-track tape. Summary data from the 1993-94 SASS can be found in Schools and Staffing in the United States: Selected Data for Public and Private Schools, 1993-94 (NCES 95-191). More detailed results from the 1993-94 SASS are published in Schools and Staffing in the United States: A Statistical Profile, 1993-94 (NCES 96-124). Data by state are available in SASS by State-1993-94 Schools and Staffing Survey Selected State Results (NCES 96-312). Further information about the sample may be obtained from 1993-94 Schools and Staffing Survey: Sample Design and Estimation (NCES 96-086). Data from previous SASS collections are published in the 1987-88 and 1990-91 Profile (NCES 92-127 and 93-146, respectively), as well as the 1987-88 and 1990-91 versions of the sample design report (NCES 91-127 and 93-449, respectively).

Office for Civil Rights

Civil Rights Survey of Elementary and Secondary Schools

The Office for Civil Rights (OCR), U.S. Department of Education, conducts biennial surveys of public school districts and of schools within those districts. Data are obtained on the characteristics of pupils enrolled in public schools throughout the Nation. Such information is required under Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and Section 504 of the Rehabilitation Act of 1973 to enable OCR to carry out its compliance responsibilities. The 1990 survey included the 100 largest public school districts, those of special interest (i.e., court order, compliance review), and a stratified random sample of approximately 3,500 districts representing approximately 40,000 schools. School, district, and national data are currently available.

Further information is available from:

Peter McCabe
Office for Civil Rights
U.S. Department of Education
330 C Street SW
Washington, DC 20202

Office of Special Education and Rehabilitative Services

Annual Report to Congress on the Implementation of the Education of the Handicapped Act

The Individuals with Disabilities Education Act (IDEA), formerly the Education of the Handicapped Act (EHA), requires the Secretary of Education to transmit to Congress annually a report describing the progress in serving the nation's handicapped children. The annual report contains information on children served by the public schools under the provisions of Part B of the IDEA and for children served in state-operated programs (SOP) for the handicapped under Chapter I of the Elementary and Secondary Education Act (ESEA). Statistics on children receiving special education and related services in various settings and school personnel providing such services are reported in an annual submission of data to the Office of Special Education and Rehabilitative Services (OSERS), by the 50 states, the District of Columbia, and the outlying areas. The child count information is based on the number of handicapped children receiving special education and related services on December 1st of each year.

Since each participant in programs for the handicapped is reported to OSERS, the data are not subject to sampling error. However, nonsampling error can occur from a variety of sources. Some states follow a noncategorical approach to the delivery of special education services, but produce counts by handicapping condition because EHA—B requires it. In those states that do categorize their handicapped students, definitions and labeling practices vary.

Further information on the Annual Report to Congress may be obtained from:

Office of Special Education Programs
Office of Special Education and Rehabilitative
Services
330 C Street SW
Washington, DC 20202

National Longitudinal Transition Study of Special Education Students

As part of the 1983 amendments to the Education of the Handicapped Act (EHA), Congress requested that the U.S. Department of Education conduct a national longitudinal study of the transition of secondary special education students to determine how they fare in terms of education, employment, and independent living. A 5-year study was mandated, which was to include youth from ages 13 to 21 who were in special education at the time they were selected and who represented all 11 federal disability categories. Data were drawn from extensive telephone

interviews with parents, from school records, and from a survey of educators in secondary schools attended by youth in the study.

The study was conducted by SRI International and began in April, 1987. The National Transition Study involves a nationally representative sample of more than 8,000 secondary-age youth with disabilities. A sample of 450 school districts was randomly selected from the universe of approximately 14,000 school districts serving secondary special education students. An additional replacement sample of 176 additional districts was selected due to a low rate of agreement to participate from the initial group of districts. Participation in the study was invited from the approximately 80 special schools serving secondaryage deaf, blind, and deaf-blind schools. A total of approximately 300 school districts and 25 special schools agreed to have youth selected for the study.

For further information about this study, contact:

Office of Special Education and Rehabilitative Services Office of Special Education Programs 330 C Street SW Washington, DC 20202

Other Governmental Agencies

Bureau of the Census

Current Population Survey

Current estimates of school enrollment, as well as social and economic characteristics of students, are based on data collected in the Census Bureau's monthly household survey of about 60,000 households. The monthly Current Population Survey (CPS) sample consists of 729 areas comprising 1,973 counties, independent cities, and minor civil divisions throughout the 50 states and the District of Columbia. The sample was initially selected from the 1980 census files and is periodically updated to reflect new housing construction.

The monthly CPS deals primarily with labor force data for the civilian noninstitutional population (i.e., excluding military personnel and their families living on post and inmates of institutions). In addition, in October of each year, supplemental questions are asked about highest grade completed, level and grade of current enrollment, attendance status, number and type of courses, degree or certificate objective, and type of organization offering instruction for each member of the household. In March of each year, supplemental questions on income are asked. The responses to these questions are combined with answers to two questions on educational attainment: highest grade of school ever attended, and whether that grade was completed.

The estimation procedure employed for the monthly CPS data involves inflating weighted sample results to independent estimates of characteristics of the civilian noninstitutional population in the United States by age, sex, and race. These independent estimates are based on statistics from decennial censuses; statistics on births, deaths, immigration, and emigration; and statistics on the population in the armed services. Generalized standard error tables are provided in the *Current Population Reports*. The data are subject to both nonsampling and sampling errors.

Further information is available in the *Current Population Reports*, Series P–20, or by contacting:

Education Branch
Population Division
Bureau of the Census
U.S. Department of Commerce
Washington, DC 20233

School Enrollment

Each October, the Current Population Survey (CPS) includes supplemental questions on the enrollment status of the population 3 years old and over. The main sources of nonsampling variability in the responses to the supplement are those inherent in the survey instrument. The question of current enrollment may not be answered accurately for various reasons. Some respondents may not know current grade information for every student in the household, a problem especially prevalent for households with members in college or in nursery school. Confusion over college credits or hours taken by a student may make it difficult to determine the year in which the student is enrolled. Problems may occur with the definition of nursery school (a group or class organized to provide educational experiences for children), where respondents' interpretations of "educational experiences" vary.

Examples of sampling variability in the estimates of school enrollment rates are given in Table A7. Questions concerning the CPS "School Enrollment" survey may be directed to:

Education Branch
Bureau of the Census
U.S. Department of Commerce
Washington, DC 20233

Educational Attainment

Data on years of school completed are derived from questions on the Current Population Survey (CPS) instrument. Formal reports documenting educational attainment are produced by the Bureau of the Census using March CPS results. The latest report is Educational Attainment in the United States.

March 1994 and 1993, Series P-20, No. 476, which is available from the Government Printing Office.

In addition to the general constraints of the CPS, some data indicate that the respondents have a tendency to overestimate the educational level of members of their household. Some inaccuracy is due to a lack of the respondent's knowledge of the exact educational attainment of each household member and the hesitancy to acknowledge anything less than high school education. Another cause of nonsampling variability is the change in the numbers in the armed services over the years. In 1970, 25 percent of all males 20 and 21 years old were in the armed services. By 1974, this had decreased to less than 10 percent. The exclusion of members of the armed services appears to increase the proportion of the CPS population with some college and decrease the proportion of those who finished high school but went no further. After 1974, there was more stability in the proportion of young men in the military.

Beginning with the data for March 1980, tabulations have been controlled to the 1980 census. Examples of the sampling variability in the estimates of educational attainment are given in Table A8. The figures shown in the table hold for total or white population estimates only. The variability in estimates for subgroups (region, household relationships, etc.) can be estimated using the tables presented in *Current Population Reports*.

Questions concerning "Educational Attainment in the United States" may be directed to:

Education Branch
Population Division
Bureau of the Census
U.S. Department of Commerce
Washington, DC 20233

Government Finances

The Census Bureau conducts an annual survey of Government Finances as authorized by law under Title 13, United States Code, Section 182. This survey covers the entire range of government finance activities: revenue, expenditure, debt, and assets. Revenues and expenditures comprise actual receipts and payments of a government and its agencies, including government-operated enterprises, utilities, and public trust funds. The expenditure reporting categories comprise all amounts of money paid out by a government and its agencies with the exception of amounts for debt retirement and for loan, investment, agency, and private trust transactions.

Most of the federal government statistics for 1994 are based on figures that appear in *The Budget* of the United States Government for the Fiscal Year 1995. Since the classification used by the Census Bureau for reporting state and local government fi-

nance statistics differs in a number of important respects from the classification used in the United States Budget, it was necessary to adjust the federal data. For this report, federal budget expenditures include interest accrued, but not paid, during the fiscal year; Census data on interest are on a disbursement basis.

The state government finances for 1994 are based primarily on the annual Census Bureau survey of state finances for fiscal year 1994. Census staff compiled figures from official records and reports of the various states for most of the state financial data.

The sample of local governments is drawn from the 1987 Census of Governments and consists of certain local governments taken with certainty plus a sample below the certainty level.

The statistics in this Census report, Governmental Finances, that are based wholly or partly on data from the sample are subject to sampling error. State government finance data are not subject to sampling error. Estimates of major United States totals for local governments are subject to a computed sampling variability of less than one-half of I percent. The estimates are also subject to the inaccuracies in classification, response, and processing which would occur if a complete census had been conducted under the same conditions as the sample.

Further information can be obtained from:

Governments Division Bureau of the Census U.S. Department of Commerce Washington, DC 20233

1990 Census of Population—Education in the United States

This report is based on a part of the decennial census which consists of questions asked of a 1-in-6 sample of persons and housing units in the United States. This sample was asked more detailed questions about income, occupation and housing costs in addition to general demographic information.

School Enrollment

Persons classified as enrolled in school reported attending a "regular" public or private school or college at any time between February 1, 1990 and the time listed. Questions asked were whether the institution attended was public or private, and level of school in which the student was enrolled.

Educational Attainment

Data for educational attainment were tabulated for persons 15 years and over, and classified according to the highest grade completed or the highest degree received. Instructions were also given to include the level of the previous grade attended or the highest

degree received for persons currently enrolled in school.

Poverty status

To determine poverty status, answers to income questions were used and compared to the appropriate poverty threshold. All persons except institutionalized persons, persons in military group quarters and in college dormitories, and unrelated persons under 15 years old were considered. If total income of each family or unrelated individual in the sample was less than the corresponding cutoff, that family or individual was classified as "below the poverty level."

Population Division
Bureau of the Census
U.S. Department of Commerce
Washington, DC 20233

National Institute on Drug Abuse

The National Institute on Drug Abuse of the U.S. Department of Health and Human Services is the primary supporter of the long-term study entitled "Monitoring the Future: A Continuing Study of the Lifestyles and Values of Youth," conducted at the University of Michigan, Institute for Social Research. One component of the study deals with student drug abuse. Results of a national sample survey have been published annually since 1975. Approximately 125 to 135 schools have participated each year. With the exception of 1975 when about 9,400 students participated in the survey, the annual senior samples are comprised of roughly 17,000 students. They complete self-administered questionnaires given to them in their classrooms by University of Michigan personnel. Beginning in 1991, similar surveys of nationally representative samples of 8th and 10th grade samples have been conducted annually. The 10th grade samples involve about 15,000 students in 125 schools each year, while the 8th grade samples have approximately 18,000 students in 160 schools. Over the years, the response rate has varied from 77 to 84 percent. Table A9 provides examples of the survey's sampling error.

Understandably, there will be some reluctance to admit illegal activities. Also, students who were out of survey school on the day of the nonrespondents. The survey did not include high school dropouts. The inclusion of these two groups would tend to increase the proportion of individuals who had used drugs. A 1983 study found that the inclusion of the absentees could increase some of the drug usage estimates by as much as 2.7 percent. (Details on that study and its methodology were published in Drug Use Among American High School Students, College Students, and Other Young Adults,

by Lloyd D. Johnston, Patrick M. O'Malley, and Jerald G. Bachman, available from the National Clearinghouse on Drug Abuse Information, 5600 Fishers Lane. Rockville, MD 20857.)

Further information on this survey may be obtained from:

National Institute of Drug Abuse Division of Epidemiology and Statistical Analysis 5600 Fishers Lane Rockville, MD 20857

National Science Foundation

Survey of Earned Doctorates Awarded in the United States

The Survey of Earned Doctorates Awarded in the United States has collected basic statistics from the universe of doctoral recipients in the United States each year since 1958. It has been supported by five federal agencies: the National Science Foundation, in conjunction with the U.S. Department of Education; the National Endowment for the Humanities; the U.S. Department of Agriculture; and the National Institute of Health.

A survey form is distributed, with the assistance of graduate deans, to each person completing the requirements for a doctorate. Of the approximately 40,000 persons eligible for the survey, approximately 95 percent respond. The questionnaire obtains information on sex, race/ethnicity, marital status, citizenship, handicaps, dependents, specialty field of doctorate, educational institutions attended, time spent in completion of doctorate, financial support, educational debt, postgraduation plans, and educational attainment of parents. The data were collected, edited, and published by the National Academy of Sciences.

For further information contact:

Science and Engineering Education and Human Resources Program Division of Science Resources Studies National Science Foundation 4201 Wilson Boulevard Arlington, Virginia 22230

Federal Obligations to Universities, Colleges and Nonprofit Institutions

Each year, the National Science Foundation collects data on obligations to colleges and universities from federal agencies. Obligations differ from expenditures in that funds obligated during one fiscal year may be spent by the recipient in later years. Obligation amounts include direct federal support, so that amounts subcontracted to other institutions are included. Those funds received through subcontracts from prime contractors are excluded. Also excluded

573

from the data are certain types of financial assistance, such as the Department of Education's Guaranteed Student Loan Program and obligations to the U.S. service academies. For purposes of tabulations in this publication, university-administered federally funded research and development centers (FFRDCs) have been included in appropriate state totals.

The universe of academic institutions for this survey is based on the Integrated Postsecondary Education Data Survey conducted by the National Center for Education Statistics (see above). Institutions without federal support were excluded and some systems were combined into single reporting units.

Further information on this survey may be obtained from Federal Support to Universities, Colleges, and Nonprofit Institutions, published by the National Science Foundation, or by contacting:

Science and Engineering Activities Program Division of Science Resources Studies National Science Foundation 4201 Wilson Boulevard Arlington, Virginia 22230

Survey of Scientific and Engineering Expenditures at Universities and Colleges

The National Science Foundation's annual academic survey collects data on research and development expenditures in the sciences and engineering from a sample of 459 institutions in the United States and outlying areas. Those institutions were selected from the universe of 595 schools that grant a graduate science or engineering degree and/or perform activities for which at least \$50,000 has been funded from separately budgeted R&D expenditures. In addition, the survey includes 19 university-affiliated, federally funded research and development centers (FFRDCs).

The 459 institutions sampled for FY 1991 include all doctorate-granting institutions, all historically black colleges and universities with any R&D expenditures, and a random sample of all other institutions. The response rate was 97 percent. Data presented are assembled from the most recently completed survey.

Further information on this survey may be obtained from *Academic Science/Engineering, R&D Funds,* published by the National Science Foundation, or by contacting:

Science and Engineering Activities Program Division of Science Resources Studies National Science Foundation 4201 Wilson Boulevard Arlington, Virginia 22230

American College Testing Program

The American College Testing (ACT) Assessment is designed to measure educational development in the areas of English, mathematics, social studies, and natural sciences. The ACT Assessment is taken by college-bound high school students and the test results are used to predict how well students might perform in college.

Prior to the 1984–85 school year, national norms were based on a 10 percent sample of the students taking the test. Since then, national norms are based on the test scores of all students taking the test. Moreover, beginning with 1984–85, these norms have been based on the most recent ACT scores available from students scheduled to graduate in the spring of the year. Duplicate test records are no longer used to produce national figures.

Separate ACT standard scores are computed for English, mathematics, social studies, science reasoning, and, as of October 1989, reading. ACT standard scores are reported for each subject area on a scale from 1 to 36. The four ACT standard scores have a mean (average) of about 19 and a standard deviation of about 6 for college-bound students nationally. A composite score is obtained by taking the simple average of the four standard scores and is an indication of student's overall academic development across these subject areas. Beginning with the October 1989 test date, a new version of the ACT was introduced.

It should be noted that college-bound students who take the ACT Assessment are not representative of college-bound students nationally. First, students who live in the Midwest, Rocky Mountains and Plains, and the South are overrepresented among ACT-tested students as compared with college-bound students nationally. Second, ACT-tested students tend to enroll in public colleges and universities more frequently than do college-bound students nationally.

For further information, contact:

The American College Testing Program 2201 North Dodge Street P.0. Box 168 lowa City; IA 52243

American Federation of Teachers

The American Federation of Teachers (AFT) has reported national and state average salaries and earnings for teachers, other school employees, government workers, and professional employees over the past 25 years. The AFT's survey of state depart-

ments of education obtains information on minimum salaries, experienced teachers reentering the class-room, and teacher age and experience. Most data from the survey are reported as received, although some data are confirmed by telephone. These data are available in the AFT's annual report *Survey and Analysis of Salary Trends*. While this serves as the primary vehicle for reporting the results of the AFT's annual survey of state departments of education, several other data sources are also used in the report.

Further information on this survey can be obtained from:

American Federation of Teachers 555 New Jersey Avenue NW Washington, DC 20001

College Entrance Examination Board

The Admissions Testing Program of the College Board comprises a number of college admissions tests, including the Preliminary Scholastic Assessment Test (PSAT) and the Scholastic Assessment Test (SAT). High school students participate in the testing program as sophomores, juniors, or seniors—some more than once during these 3 years. If they have taken the tests more than once, only the most recent scores are tabulated. The PSAT and SAT report subscores in the areas of mathematics and verbal ability.

The SAT results are not representative of high school students or college-bound students nationally since the sample is self-selected. Generally, tests are taken by students who need the results to attend a particular college or university. The state totals are greatly affected by the requirements of its state colleges. Public colleges in a number of states require ACT scores rather than SAT scores. Thus, the proportion of students taking the SAT in these states is very low and is inappropriate for any comparison. In recent years, more than 1 million high school students have taken the examination annually.

Further information on the SAT can be obtained from:

College Entrance Examination Board Educational Testing Service Princeton, NJ 08541

Council for Aid to Education

The Council for Aid to Education, Inc., (CFAE) is a not-for-profit corporation funded by contributions from business. CFAE largely provides consulting and research services on voluntary support to corporations and information services to education institutions. Each year CFAE conducts a survey of colleges and universities and private elementary and secondary schools to obtain information on the amounts, sources, and purposes of private gifts, grants, and bequests received during the academic year.

In the 1991–92 study, survey forms were sent to approximately 2,900 colleges and universities and 1,280 responded. The response rates were much higher for the 4-year colleges than for the 2-year colleges. For example, 89 percent of the doctoral-level institutions and 55 percent of the comprehensive and general baccalaureate colleges participated in the survey, but only 12 percent of the 2-year colleges responded. CFAE estimates that about 84 percent of all voluntary support is reported in the survey because of the high participation of institutions receiving large amounts of funding.

Survey forms are reviewed by CFAE for internal consistency before preparing a computerized database. Institutional reports of voluntary support data from the CFAE "Survey of Voluntary Support of Education" are more comprehensive and detailed than the related data in the "Financial Statistics of Institutions of Higher Education" survey conducted by NCES. The results from the "Survey of Voluntary Support of Education" are published in the annual Voluntary Support of Education, which may be purchased from CFAE.

Further information is available from:

Director of Research Council for Aid to Education, Inc. 51 Madison Avenue Suite 2200 New York, NY 10010

Council of Chief State School Officers

The Council of Chief State School Officers (CCSSO) is a nonprofit organization of the 57 public officials who head departments of public education in every state, the outlying areas, the District of Columbia, and the Department of Defense Dependents Schools. In 1985, the CCSSO founded the State Education Assessment Center to provide a locus of leadership by the states to improve the monitoring and assessment of education. State Education Indicators, 1993 is the principal report of the Assessment Center's program of indicators on education. Most of the data are obtained from a member questionnaire; the remainder of the data are obtained from federal government agencies. Information on mathematics education was taken from CCSSO, State Policies on Science and Mathematics Evaluation, 1992.

For additional information, contact:

Edward Roeber State Education Assessment Center Council of Chief State School Officers One Massachusetts Avenue NW 7th Floor Washington, DC 20001

Council of State Directors of Programs for the Gifted

The Council of State Directors of Programs for the Gifted is composed of the director or individual in the leadership position for gifted education in each of the 50 states, the District of Columbia, and the outlying areas. The Council has conducted many surveys in the past and most recently conducted two comprehensive state surveys in order to produce a profile of gifted education throughout the Nation. These data are reported in the 1985, 1987, 1990 and 1994 "State of the States Gifted and Talented Education" reports. This edition of the *Digest* uses data from the 1995–96 school year.

Further information is available from:

Michael Hall, Executive Director Council of State Directors of Programs for the Gifted c/o Office of Public Instruction P.O Box 202501 Helena, MT 59620–2501

Education Commission of the States

The Education Commission of the States (ECS) Clearinghouse collects information on laws and standards in the field of education and reports them periodically in "Clearinghouse Notes." The Commission collects information about administrators, principals, and teachers. It also examines policy areas, such as assessment and testing, collective bargaining, early childhood issues, quality education, and school schedules. The information is collected by reading state newsletters, tracking state legislation, and surveying state education agencies. Data are verified by the individual states when necessary. Even though ECS monitors state activity on a continuous basis, it updates the reports only when there is significant change in state activity.

Further information is available from:

Shawni Arora Education Commission of the States 707 17th Street, Suite 2700 Denver, CO 80202–3427

Gallup Poll

Each year the Gallup Poll conducts the "Public Attitudes Toward the Public Schools" survey, funded by Phi Delta Kappa. The survey includes interviews

with adults representing the civilian noninstitutional population 18 years old and over.

The sample used in the 27th annual survey was made up of a total of 1,311 respondents and is described as a modified probability sample of the nation. Personal, in-home interviewing was conducted in representative communities.

The survey is a sample survey and is subject to sampling error. The size of error depends largely on the number of respondents providing data. Table A10 shows the approximate sampling errors associated with different percentages and sample sizes for the survey. Table A11 provides approximate sampling errors for comparisons of two sample percentages.

For example, an estimated percentage of about 10 percent based on the responses of 1,000 sample members has an approximate sampling error of 2 percent at the 95 percent confidence level. The sampling error for the difference in two percentages (50 percent versus 41 percent) based on two samples of 750 members and 400 members, respectively, is about 8 percent at the 95 percent confidence level.

Further information on this survey can be obtained from:

Neville Robertson Phi Delta Kappa P.O. Box 789 Bloomington, IN 47402–0789

Independent Sector

In 1992, Independent Sector commissioned the Gallup Poll to conduct a national survey on the giving and volunteering behavior of Americans. This survey is part of a series of surveys that will be conducted every 2 years. The information was obtained from inhome personal interviews conducted from April 3 to May 17, 1992, with a representative national sample of 2,671 adult Americans 18 or more years old. The sampling procedure did not include those with incomes above \$200,000 because they constitute such a small percentage of the population.

The results from this survey are published in Giving and Volunteering in the United States and may be purchased from:

Independent Sector 1828 L Street NW Washington, DC 20036

International Association for the Evaluation of Educational Achievement (IEA)

The International Association for the Evaluation of Educational Achievement, known as the IEA, is comprised of research centers and scholars from around the world whose aim is to investigate education problems common among countries. In 1988, the IEA General Assembly, composed of the research institutes participating in IEA projects, decided to undertake a study of reading literacy. The study held its first National Research Coordinator (NRC) meeting in November 1988. The construction and pilot testing of instruments was conducted in the period from November 1988 to July 1990. The main testing took place in the period October 1990 to April 1991 depending on the school year in each country. Thirtytwo school systems were involved in the IEA Reading Literacy Study. Data were collected from 210,059 students, 10,518 teachers, and 9,073 schools. All students took reading tests for two sessions totaling 75 minutes at the 9-year-old level and two sessions totaling 85 minutes at the 14-year-old population. All students responded to a background questionnaire about their reading at home and at school. Teachers and school principals responded to questionnaires about themselves, their teaching and the school organization. Each national center (NCES was the center for the United States) completed a National Case Study Questionnaire.

For more information, contact:

Marilyn Binkley, NRC USA National Center for Education Statistics 555 New Jersey Avenue NW Washington, DC 20208–5650

Institute of International Education

Each year the Institute of International Education (IIE) conducts a survey of the number of foreign students studying in American colleges and universities and reports these data in *Open Doors*, an annual publication. All of the regionally accredited institutions in the *Education Directory*, *Colleges and Universities* published by NCES are surveyed by IIE. The data presented in the *Digest* are drawn from the IIE survey which requests the total enrollment of foreign students in an institution and information on student characteristics, such as country of origin. For the 1994–95 survey, 2,684 out of 2,758 (97.3 percent) institutions reported data for the survey.

Additional information can be obtained from the publication *Open Doors* or by contacting:

Todd M. Davis Institute of International Education 809 United Nations Plaza New York, NY 10017–3580

Metropolitan Life Insurance Company

The Metropolitan Life Survey of the American Teacher for the Metropolitan Life Insurance Company was conducted by Louis Harris and Associates. This survey was designed to measure the experiences of

new public school teachers who began their first year of teaching in the 1990-91 school year. It includes questions on their experiences with students, administrators, other teachers, and parents. There were three surveys of this cohort of new teachers. The first survey was conducted during the summer of 1990 to measure the expectations of new graduates from teaching schools immediately prior to their first year of teaching in public schools. The second survey compared how these new teachers' experiences in their first year of teaching affected their attitudes, and how the actual experience of teaching compared with their prior expectations. The current survey focuses on these teachers' experience two years into their teaching career. It includes questions which allow comparisons on their attitudes toward teaching now versus one and two years ago.

A total of 1,000 teachers who began their first year of teaching in the public schools in the 1990–91 school year were surveyed. The sample was designed to be representative of all new teachers in the public schools who graduated from teaching colleges in 1990 and taught for the first time in a public school in the 1990–91 school year.

The sample was drawn from lists of 1990 graduates from a probability sample of colleges listed by the *American Association* of *Colleges* for *Teacher Education*. Graduates who did not teach full-time in public schools in 1990–91 were excluded from the sample.

The priority for fielding the sample was as follows: first, any respondents from the second phase of the study (after the first year of teaching); second, any respondents from the first phase (before teaching) who were not also included in the second phase; finally, any remaining teachers from the original sample group who were not used in the first phase.

All interviews were conducted by telephone in May and June 1992.

Metropolitan Life Survey of the American Teacher Louis Harris and Associates 111 Fifth Avenue New York, NY 10003

National Association of State Scholarship and Grant Programs

The National Association of State Scholarship and Grant Programs (NASSGP) is an association of states with general programs of scholarship or grant assistance for undergraduate study. Executive officers responsible for grant program administration represent each state in the Association. The 26th Annual Survey Report: 1994–95 Academic Year is produced the by the New York State Higher Education

Services Corporation, and data are reported for all 50 states, the District of Columbia, and Puerto Rico. For more information on this survey, contact:

Charles Treadwell
New York State Higher Education Services
Corporation
99 Washington Avenue, Room 1438
Albany, NY 12255
Attention: NASSGAP

National Education Association

The National Education Association (NEA) reports enrollment, expenditure, revenue, graduate, teacher, and instructional staff salary data in its annual publication, *Estimates of School Statistics*. Each year NEA prepares regression-based estimates of financial and other education statistics and submits them to the states for verification. Generally about 30 states adjust these estimates based on their own data. These preliminary data are published by NEA along with revised data from previous years. States are asked to revise previously submitted data as final figures become available. The most recent publication contains all changes reported to the NEA.

Status of the American Public School Teacher

The "Status of the American Public School Teacher" survey is conducted every 5 years by the National Education Association (NEA). The survey was designed by the NEA Research Division and initially administered in 1956. The intent of the survey is to solicit information covering various aspects of public school teachers' professional, family, and civic lives.

Participants for the survey are selected using a two-stage sample design, with the first-stage stratum determined by the number of students enrolled in the districts. Selection probabilities are determined so that the resulting sample is self-weighting. In 1990–91, questionnaires were sent to a sample of 1,981 of the nation's approximately 2,400,000 public school teachers. With an initial and four follow-up mailings, 1,499 questionnaires were returned, of which 145 were not usable. The sample was adjusted to 1,836 to reflect the 145 unusable responses. The response rate was 73.7 percent.

Possible sources of nonsampling errors are nonresponses, misinterpretation, and—when comparing data over years—changes in the sampling method and instrument. Misinterpretation of the survey items should be minimal, as the sample responding is not from the general population but one knowledgeable about the area of concern. Also, the sampling procedure changed after 1956 and some word-

ing of items has changed over the different administrations.

Since sampling is used, sampling variability is inherent in the data. An approximation to the maximum standard error for estimating the population percentages is 1.4 percent (Table A12). To estimate the 90 percent confidence interval for population percentages, the maximum standard error of 1.4 percent is multiplied by 1.65 (1.4 x 1.65). The resulting percentage (2.3) is added and subtracted from the population estimate to establish upper and lower bounds for the confidence interval. For example, if a sample percentage is 60 percent, there is a 90 percent chance that the population percentage lies between 57.7 percent and 62.3 percent (60 percent \pm 2.3 percent).

Questions concerning the "Status of the American Public School Teacher" survey may be directed to:

Brooke E. Whiting National Education Association–Research 1201 16th Street NW Washington, DC 20036

Organization for Economic Cooperation and Development

The Organization for Economic Cooperation and Development (OECD) publishes analyses of national policies in education, training, and economics in more than 20 countries. The countries surveyed are: Australia, Austria, Belgium, Canada, Czech and Slovak Federal Republics, Denmark, Finland, France, Germany, Hungary, Ireland, Italy, Japan, Luxembourg, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, United States, and the former Yugoslavia.

Since only developed nations, mostly European, are included in these studies, the range of analysis is limited. However, OECD data allow for some detailed international comparison of financial resources or other education variables to be made for this selected group of countries.

In the past several years, OECD has revised its data collection procedures to highlight current education issues. The Centre for Educational Research and Innovation (CERI) has developed an Indicators of Education Systems (INES) project involving representatives of the OECD countries and the OECD Secretariat to improve international education statistics. Large improvements in data quality and comparability among OECD countries have resulted from the country to country interaction sponsored through the INES project. The most recent publication in this series is *Education at a Glance* (1996).

More complete information on INES may be obtained from:

Andreas Schleicher INES/OECD 2, rue Andre-Pascal 75775 Paris CEDEX 16 France

Research Associates of Washington

Research Associates annually compiles the Higher Education Price Index (HEPI) which measures average changes in prices of goods and services purchased by colleges and universities through current-fund educational and general expenditures. Sponsored research and auxiliary enterprises are not priced by the HEPI.

The HEPI is based on the prices (or salaries) of faculty and of administrators and other professional service personnel; clerical, technical, service, and other nonprofessional personnel; and contracted services, such as data processing, communication, transportation, supplies and materials, equipment, books and periodicals, and utilities. These represent the items purchased for current operations by colleges and universities. Prices for these items are obtained from salary surveys conducted by various national higher education associations, the American Association of University Professors, the Bureau of Labor Statistics, and the National Center for Education Statistics; and from components of the Consumer Price Index (CPI) and the Producer Price Index (PPI) published by the U.S. Department of Labor, Bureau of Labor Statistics.

The quantities of these goods and services have been kept constant based on the 1971-72 buying pattern of colleges and universities. The weights assigned the various items priced, which represent their relative importance in the current-fund educational and general budget, are estimated national averages. Variance in spending patterns of individual institutions from these national averages reduces only slightly the applicability of the HEPI to any given institutional situation. Modest differences in the weights attached to expenditure categories have little effect on overall index values. This is because the HEPI is dominated by the trend in faculty salaries and similar salary trends for other personnel hired by institutions, which absorbs or diminishes the effects of price changes in other items purchased in small quantities. For more information, contact:

Kent Halstead Research Associates of Washington 1200 North Nash St. #225 Arlington, VA 22209

United Nations Educational, Scientific, and Cultural Organization

The United Nations Educational, Scientific, and Cultural Organization (UNESCO) conducts annual surveys of education statistics of its member countries. Besides official surveys, data are supplemented by information obtained by UNESCO through other publications and sources. Each year more than 200 countries reply to the UNESCO surveys. In some cases, estimates are made by UNESCO for particular items such as world and continent totals. While great efforts are made to make them as comparable as possible, the data still reflect the vast differences among the countries of the world in the structure of education. While there is some agreement about the reporting of first- and second-level data, the third level (postsecondary education) presents numerous substantial problems. Some countries report only university enrollment while other countries report all postsecondary, including vocational and technical schools and correspondence programs. A very high proportion of some countries' third-level students attend institutions in other countries. While definition problems are many in this sort of study, other survey problems should not be overlooked. The member countries that provide data to UNESCO are responsible for their validity. Thus, data for particular countries are subject to nonsampling error and perhaps sampling error as well. Some countries may furnish only rough estimates, while data from other countries may be very accurate. Other difficulties are caused by the varying periodicity of data collection among the countries of the world. In spite of such problems. many researchers use UNESCO data because they are the best available for such a large group of countries. Users should examine footnotes carefully to recognize some of the data limitations.

More complete information may be obtained from the Statistical Yearbook published by UNESCO or from:

Office of Statistics UNESCO 7, Place de Fontenoy 75700 Paris France

¹ Highest degree attained at any institution. Students who have attained may also be enrolled.

² Status as of 1994. Includes those students who are no longer working towards a

bachelor's degree, but who had completed another type of degree or award.

³ Status as of 1994. Includes students who had completed another type of degree or award (associate degree: 11.8 percent, certificate: 2.7 percent) but are still working toward a bachelor's degree.

⁴Status as of 1994. Enrollment can be full-time or part-time. Includes students who are still enrolled, but are no longer working toward a bachelor's degree.

⁵ Students were considered to have a diploma only if they had a regular high school diploma. Students with a GED or other high school credentials were considered to have

⁻Data not available or not applicable.

NOTE.—Data reflect completion and enrollment status by spring 1994 of first-time postsecondary students starting in academic year 1989-90.

¹ The SES index is a composite of five equally weighted measures: father's education, mother's education, family income, father's occupation, and presence of certain items in the respondent's household.

2 Includes attendance at a vocational, trade, or business school, or 2-year college; or

dents who had enrolled on neither a full-time nor part-time basis in each of the four semesters were classified as never enrolled.

NOTE.-Data from students who dropped out of school between the 10th and 12th grades were not used in analyses of sophomore samples.

attendance at a 4-year college resulting in less than a bachelor's degree.

3 Includes those with a bachelor's or higher level degree.

4 Postsecondary education status was determined by students' enrollment in academic

or vocational study during the four semesters-fall 1982, spring 1983, fall 1983, and spring 1984—following their scheduled high school graduation. Students who enrolled in full-time study in each of the four semesters were classified as full time. Students who were enrolled in part-time study in any of the four semesters and those who were enrolled in full-time study in fewer than four semesters were classified as part time. Stu-

⁵ Responses to questions concerning participation in each of 15 different extracurricular activity areas (i.e., varsity sports, debate, band, subject-matter clubs, etc.) were used to classify students' overall level of participation in extracurricular activities. The difference between the sum of the three category respondent counts and the total sample size is due to missing data.

Definitions

Academic support This category of college expenditures includes expenditures for support services that are an integral part of the institution's primary missions of instruction, research, or public service. Includes expenditures for libraries, galleries, audio/visual services, academic computing support, ancillary support, academic administration, personnel development, and course and curriculum development.

Achievement test An examination that measures the extent to which a person has acquired certain information or mastered certain skills, usually as a result of specific instruction.

Administrative support staff Includes personnel dealing with salary, benefits, supplies, and contractual fees for the office of the principal, full-time department chairpersons, and graduation expenses.

Agriculture Courses designed to improve competencies in agricultural occupations. Included is the study of agricultural production, supplies, mechanization and products, agricultural science, forestry, and related services.

American College Testing Program (ACT) The ACT assessment program measures educational development and readiness to pursue college-level coursework in English, mathematics, natural science, and social studies. Student performance on the tests does not reflect innate ability and is influenced by a student's educational preparedness.

Appropriation (federal funds) Budget authority provided through the congressional appropriation process that permits federal agencies to incur obligations and to make payments.

Appropriation (institutional revenues) An amount (other than a grant or contract) received from or made available to an institution through an act of a legislative body.

Associate degree A degree granted for the successful completion of a sub-baccalaureate program of studies, usually requiring at least 2 years (or equivalent) of full-time college-level study. This includes degrees granted in a cooperative or workstudy program.

Auxiliary enterprises This category includes those essentially self-supporting operations which exist to

furnish a service to students, faculty, or staff, and which charge a fee that is directly related to, although not necessarily equal to, the cost of the service. Examples are residence halls, food services, college stores, and intercollegiate athletics.

Average daily attendance (ADA) The aggregate attendance of a school during a reporting period (normally a school year) divided by the number of days school is in session during this period. Only days on which the pupils are under the guidance and direction of teachers should be considered days in session.

Average daily membership (ADM) The aggregate membership of a school during a reporting period (normally a school year) divided by the number of days school is in session during this period. Only days on which the pupils are under the guidance and direction of teachers should be considered as days in session. The average daily membership for groups of schools having varying lengths of terms is the average of the average daily memberships obtained for the individual schools.

Bachelor's degree A degree granted for the successful completion of a baccalaureate program of studies, usually requiring at least 4 years (or equivalent) of full-time college-level study. This includes degrees granted in a cooperative or work-study program.

Books Non-periodical printed publications bound in hard or soft covers, or in loose-leaf format, of at least 49 pages, exclusive of the cover pages; juvenile nonperiodical publications of any length found in hard or soft covers.

Budget authority (BA) Authority provided by law to enter into obligations that will result in immediate or future outlays. It may be classified by the period of availability (1-year, multiple-year, no-year), by the timing of congressional action (current or permanent), or by the manner of determining the amount available (definite or indefinite).

Business Program of instruction that prepares individuals for a variety of activities in planning, organizing, directing, and controlling business office systems and procedures.

503

Carnegie unit A standard of measurement that represents one credit for the completion of a 1-year course.

Catholic school A private school over which a Roman Catholic church group exercises some control or provides some form of subsidy. Catholic schools for the most part include those operated or supported by: a parish, a group of parishes, a diocese, or a Catholic religious order.

Central cities The largest cities, with 50,000 or more inhabitants, in a Metropolitan Statistical Area (MSA). A smaller city within a MSA may also qualify if it has at least 25,000 inhabitants or has a population of one-third or more of that of the largest city and a minimum population of 25,000. An exception occurs where two cities have contiguous boundaries and constitute, for economic and social purposes, a single community of at least 50,000, the smaller of which must have a population of at least 15,000.

Class size The membership of a class at a given date.

Classroom teacher A staff member assigned the professional activities of instructing pupils in self-contained classes or courses, or in classroom situations. Usually expressed in full-time equivalents.

Cohort A group of individuals that have a statistical factor in common, for example, year of birth.

College A postsecondary school which offers general or liberal arts education, usually leading to an associate, bachelor's, master's, doctor's, or first-professional degree. Junior colleges and community colleges are included under this terminology.

Combined elementary and secondary school A school which encompasses instruction at both the elementary and the secondary levels. Includes schools starting with grade 6 or below and ending with grade 9 or above.

Computer science A group of instructional programs that describes computer and information sciences, including computer programming, data processing, and information systems.

Constant dollars Dollar amounts that have been adjusted by means of price and cost indexes to eliminate inflationary factors and allow direct comparison across years.

Consumer, personal, and miscellaneous services A group of instructional programs that describes the fundamental skills a person is normally thought to need in order to function productively in society. Some examples are child development, consumer education, and family relations.

Consumer Price Index (CPI) This price index measures the average change in the cost of a fixed market basket of goods and services purchased by consumers.

Consumption That portion of income which is spent on the purchase of goods and services rather than being saved.

Control of institutions A classification of institutions of elementary/secondary or higher education by whether the institution is operated by publicly elected or appointed officials (public control) or by privately elected or appointed officials and derives its major source of funds from private sources (private control).

Credit The unit of value, awarded for the successful completion of certain courses, intended to indicate the quantity of course instruction in relation to the total requirements for a diploma, certificate, or degree. Credits are frequently expressed in terms such as "Carnegie units," "semester credit hours," and "quarter credit hours."

Current dollars Dollar amounts that have not been adjusted to compensate for inflation.

Current expenditures (elementary/secondary)
The expenditures for operating local public schools, excluding capital outlay and interest on school debt. These expenditures include such items as salaries for school personnel, fixed charges, student transportation, school books and materials, and energy costs. Beginning in 1980–81, expenditures for State administration are excluded.

Current expenditures per pupil in average daily attendance Current expenditures for the regular school term divided by the average daily attendance of full-time pupils (or full-time equivalency of pupils) during the term. See also Current expenditures and Average daily attendance.

Current-fund expenditures (higher education)
Money spent to meet current operating costs, including salaries, wages, utilities, student services, public services, research libraries, scholarships and fellowships, auxiliary enterprises, hospitals, and independent operations. Excludes loans, capital expenditures, and investments.

Current-fund revenues (higher education) Money received during the current fiscal year from revenue which can be used to pay obligations currently due, and surpluses reappropriated for the current fiscal year.

Current Population Survey See Guide to Sources.

Disposable personal income Current income received by persons less their contributions for social insurance, personal tax, and nontax payments. It is the income available to persons for spending and saving. Nontax payments include passport fees, fines and penalties, donations, and tuitions and fees paid to schools and hospitals operated mainly by the government. See also Personal income.

Doctor's degree An earned degree carrying the title of Doctor. The Doctor of Philosophy degree (Ph.D.) is the highest academic degree and requires mastery within a field of knowledge and demonstrated ability to perform scholarly research. Other doctorates are awarded for fulfilling specialized requirements in professional fields, such as education (Ed.D.), musical arts (D.M.A.), business administration (D.B.A.), and engineering (D.Eng. or D.E.S.). Many doctor's degrees in academic and professional fields require an earned master's degree as a prerequisite. First-professional degrees, such as M.D. and D.D.S., are not included under this heading.

Educational and general expenditures The sum of current funds expenditures on instruction, research, public service, academic support, student services, institutional support, operation and maintenance of plant, and awards from restricted and unrestricted funds.

Educational attainment The highest grade of regular school attended and completed.

Elementary education/programs Learning experiences concerned with the knowledge, skills, appreciations, attitudes, and behavioral characteristics which are considered to be needed by all pupils in terms of their awareness of life within our culture and the world of work, and which normally may be achieved during the elementary school years (usually kindergarten through grade 8 or kindergarten through grade 6), as defined by applicable state laws and regulations.

Elementary school A school classified as elementary by state and local practice and composed of any span of grades not above grade 8. A preschool or kindergarten school is included under this heading only if it is an integral part of an elementary school or a regularly established school system.

Elementary/secondary school As reported in this publication, includes only regular schools (i.e., schools that are part of State and local school systems, and also most not-for-profit private elementary/ secondary schools, both religiously affiliated and

nonsectarian). Schools not reported include subcollegiate departments of institutions of higher education, residential schools for exceptional children, Federal schools for American Indians, and Federal schools on military posts and other Federal installations.

Employment Includes civilian, noninstitutional persons who: 1) worked during any part of the survey week as paid employees; worked in their own business, profession, or farm; or worked 15 hours or more as unpaid workers in a family-owned enterprise; or 2) were not working but had jobs or businesses from which they were temporarily absent due to illness, bad weather, vacation, labor-management dispute, or personal reasons whether or not they were seeking another job.

Endowment A trust fund set aside to provide a perpetual source of revenue from the proceeds of the endowment investments. Endowment funds are often created by donations from benefactors of an institution, who may designate the use of the endowment revenue. Normally, institutions or their representatives manage the investments, but they are not permitted to spend the endowment fund itself, only the proceeds from the investments. Typical uses of endowments would be an endowed chair for a particular department or for a scholarship fund. Endowment totals tabulated in this book also include funds functioning as endowments, such as funds left over from the previous year and placed with the endowment investments by the institution. These funds may be withdrawn by the institution and spent as current funds at any time. Endowments are evaluated by two different measures, book value and market value. Book value is the purchase price of the endowment investment. Market value is the current worth of the endowment investment. Thus, the book value of a stock held in an endowment fund would be the purchase price of the stock. The market value of the stock would be its selling price as of a given day.

Engineering Instructional programs that describe the mathematical and natural science knowledge gained by study, experience, and practice and applied with judgment to develop ways to utilize the materials and forces of nature economically for the benefit of mankind. Include programs that prepare individuals to support and assist engineers and similar professionals.

English A group of instructional programs that describes the English language arts, including composition, creative writing, and the study of literature.

Enrollment The total number of students registered in a given school unit at a given time, generally in the fall of a year.

Expenditures Charges incurred, whether paid or unpaid, which are presumed to benefit the current fiscal year. For elementary/secondary schools, these include all charges for current outlays plus capital outlays and interest on school debt. For institutions of higher education, these include current outlays plus capital outlays. For government, these include charges net of recoveries and other correcting transactions other than for retirement of debt, investment in securities, extension of credit, or as agency transaction. Government expenditures include only external transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments.

Expenditures per pupil Charges incurred for a particular period of time divided by a student unit of measure, such as average daily attendance or average daily membership.

Extracurricular activities Activities that are not part of the required curriculum and that take place outside of the regular course of study. As used here, they include both school-sponsored (e.g., varsity athletics, drama and debate clubs) and community-sponsored (e.g., hobby clubs and youth organizations like the Junior Chamber of Commerce or Boy Scouts) activities.

Family A group of two persons or more (one of whom is the householder) related by birth, marriage, or adoption and residing together. All such persons (including related subfamily members) are considered as members of one family.

Federal funds Amounts collected and used by the federal government for the general purposes of the government. There are four types of federal fund accounts: the general fund, special funds, public enterprise funds, and intragovernmental funds. The major federal fund is the general fund, which is derived from general taxes and borrowing. Federal funds also include certain earmarked collections, such as those generated by and used to finance a continuing cycle of business-type operations.

Federal sources Includes federal appropriations, grants, and contracts, and federally-funded research and development centers (FFRDCs). Federally subsidized student loans and Pell Grants are not included.

First-professional degree A degree that signifies both completion of the academic requirements for beginning practice in a given profession and a level of professional skill beyond that normally required for a bachelor's degree. This degree usually is based on

a program requiring at least 2 academic years of work prior to entrance and a total of at least 6 academic years of work to complete the degree program, including both prior-required college work and the professional program itself. By NCES definition, first-professional degrees are awarded in the fields of dentistry (D.D.S. or D.M.D.), medicine (M.D.), optometry (O.D.), osteopathic medicine (D.O.), pharmacy (D.Phar.), podiatric medicine (D.P.M.), veterinary medicine (D.V.M.), chiropractic (D.C. or D.C.M.), law (J.D.), and theological professions (M.Div. or M.H.L.).

First-professional enrollment The number of students enrolled in a professional school or program which requires at least 2 years of academic college work for entrance and a total of at least 6 years for a degree. By NCES definition, first-professional enrollment includes only students in certain programs. (See First-professional degree for a list of programs.)

Fiscal year The yearly accounting period for the Federal Government, which begins on October 1 and ends on the following September 30. The fiscal year is designated by the calendar year in which it ends; e.g., fiscal year 1988 begins on October 1, 1987, and ends on September 30, 1988. (From fiscal year 1844 to fiscal year 1976, the fiscal year began on July 1 and ended on the following June 30.)

Foreign languages A group of instructional programs that describes the structure and use of language that is common or indigenous to people of the same community or nation, the same geographical area, or the same cultural traditions. Programs cover such features as sound, literature, syntax, phonology, semantics, sentences, prose, and verse, as well as the development of skills and attitudes used in communicating and evaluating thoughts and feelings through oral and written language.

Full-time enrollment The number of students enrolled in higher education courses with total credit load equal to at least 75 percent of the normal full-time course load.

Full-time-equivalent (FTE) enrollment For institutions of higher education, enrollment of full-time students, plus the full-time equivalent of part-time students. The full-time equivalent of the part-time students is estimated using different factors depending on the type and control of institution and level of student.

Full-time instructional faculty Those members of the instruction/research staff who are employed full time as defined by the institution, including faculty with released time for research and faculty on sabbatical leave. Full-time counts exclude faculty who

North Carolina

are employed to teach less than two semesters, three quarters, two trimesters, or two 4-month sessions; replacements for faculty on sabbatical leave or those on leave without pay; faculty for preclinical and clinical medicine; faculty who are donating their services; faculty who are members of military organizations and paid on a different pay scale from civilian employees; academic officers, whose primary duties are administrative; and graduate students who assist in the instruction of courses.

Full-time worker In educational institutions, an employee whose position requires being on the job on school days throughout the school year at least the number of hours the schools are in session. For higher education, a member of an educational institution's staff who is employed full time.

General administration support services Includes salary, benefits, supplies, and contractual fees for boards of education staff and executive administration. Excludes state administration.

General Educational Development (GED) program Academic instruction to prepare persons to take the high school equivalency examination. See GED recipient.

GED recipient A person who has obtained certification of high school equivalency by meeting State requirements and passing an approved exam, which is intended to provide an appraisal of the person's achievement or performance in the broad subject matter areas usually required for high school graduation.

General program A program of studies designed to prepare students for the common activities of a citizen, family member, and worker. A general program of studies may include instruction in both academic and vocational areas.

Geographic region 1) One of four regions used by the Bureau of Economic Analysis of the U.S. Department of Commerce, the National Assessment of Educational Progress, and the National Education Association, as follows: (The National Education Association designated the Central region as Middle region in its classification.)

Northeast	Southeast
Connecticut	Alabama
Delaware	Arkansas
District of Columbia	Florida
Maine	Georgia
Maryland	Kentucky
Massachusetts	Louisiana
New Hampshire	Mississippi

New York Pennsylvania Rhode Island Vermont	South Carolina Tennessee Virginia West Virginia
Central (Middle)	West
Illinois	Alaska
Indiana	Arizona
lowa	California
Kansas	Colorado
Michigan	Hawaii
Minnesota	ldaho
Missouri	Montana
Nebraska	Nevada
North Dakota	New Mexico
Ohio	Oklahoma
South Dakota	Oregon
Wisconsin	Texas
	Utah

New Jersey

2) One of the regions or divisions used by the U.S. Bureau of the Census in Current Population Survey tabulations, as follows:

Washington

Wyoming

tabulations, as follows:	·
Northeast	Midwest
(New England) Maine New Hampshire Vermont Massachusetts Rhode Island Connecticut	(East North Central) Ohio Indiana Illinois Michigan Wisconsin
(Middle Atlantic) New York New Jersey Pennsylvania	(West North Central) Minnesota Iowa Missouri North Dakota South Dakota Nebraska Kansas
South	West
(South Atlantic) Delaware Maryland District of Columbia Virginia West Virginia North Carolina South Carolina Georgia Florida	(Mountain) Montana Idaho Wyoming Colorado New Mexico Arizona Utah Nevada
(East South Central) Kentucky	(Pacific) Washington

Tennessee Oregon California Alabama Alaska Mississippi

Hawaii

(West South Central) Arkansas Louisiana Oklahoma Texas

Government appropriation An amount (other than a grant or contract) received from or made available to an institution through an act of a legislative body.

Government grant or contract Revenues from a government agency for a specific research project or other program.

Graduate An individual who has received formal recognition for the successful completion of a prescribed program of studies.

Graduate enrollment The number of students who hold the bachelor's or first-professional degree, or the equivalent, and who are working towards a master's or doctor's degree. First-professional students are counted separately. These enrollment data measure those students who are registered at a particular time during the fall. At some institutions, graduate enrollment also includes students who are in postbaccalaureate classes but not in degree programs. In specified tables, graduate enrollment includes all students in regular graduate programs and all students in postbaccalaureate classes but not in degree programs (unclassified postbaccalaureate students).

Graduate Record Examination (GRE) Multiplechoice examinations administered by the Educational Testing Service and taken by college students who are intending to attend certain graduate schools. The tests are offered in a variety of subject areas. Ordinarily, a student will take only the exam that applies to the intended field of study.

Graduation Formal recognition given an individual for the successful completion of a prescribed program of studies.

Gross domestic product (GDP) The total national output of goods and services valued at market prices. GDP can be viewed in terms of expenditure categories which include purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. A number of inclusions, however, represent imputed values, the most important of which is rental value of owner-occupied housing. GDP, in this broad context, measures the output attributable to the factors of production—labor and property—supplied by U.S. residents.

Handicapped Those children evaluated as having any of the following impairments, who because of these impairments need special education and related services. (These definitions apply specifically to data from the U.S. Office of Special Education and Rehabilitative Services presented in this publication.)

Deaf Having a hearing impairment which is so severe that the student is impaired in processing linguistic information through hearing (with or without amplification) and which adversely affects educational performance.

Deaf-blind Having concomitant hearing and visual impairments which cause such severe communication and other developmental and educational problems that the student cannot be accommodated in special education programs solely for deaf or blind students.

Hard of hearing Having a hearing impairment, whether permanent or fluctuating, which adversely affects the student's educational performance, but which is not included under the definition of "deaf" in this section.

Mentally retarded Having significantly subaverage general intellectual functioning, existing concurrently with defects in adaptive behavior and manifested during the developmental period, which adversely affects the child's educational performance.

Multihandicapped Having concomitant impairments (such as mentally retarded-blind, mentally retarded-orthopedically impaired, etc.), the combination of which causes such severe educational problems that the student cannot be accommodated in special education programs solely for one of the impairments. Term does not include deafblind students but does include those students who are severely or profoundly mentally retarded.

Orthopedically impaired Having a severe orthopedic impairment which adversely affects a student's educational performance. The term includes impairment resulting from congenital anomaly, disease, or other causes.

Other health impaired Having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leuke-

mia, or diabetes which adversely affects the student's educational performance.

Seriously emotionally disturbed Exhibiting one or more of the following characteristics over a long period of time, to a marked degree, and adversely affecting educational performance: an inability to learn which cannot be explained by intellectual, sensory, or health factors; an inability to build or maintain satisfactory interpersonal relationships with peers and teachers; inappropriate types of behavior or feelings under normal circumstances; a general pervasive mood of unhappiness or depression; or a tendency to develop physical symptoms or fears associated with personal or school problems. This term does not include children who are socially maladjusted, unless they also display one or more of the listed characteristics.

Specific learning disabled Having a disorder in one or more of the basic psychological processes involved in understanding or in using spoken or written language, which may manifest itself in an imperfect ability to listen, think, speak, read, write, spell, or do mathematical calculations. The term includes such conditions as perceptual handicaps, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia. The term does not include children who have learning problems which are primarily the result of visual, hearing, or environmental, cultural, or economic disadvantage.

Speech impaired Having a communication disorder, such as stuttering, impaired articulation, language impairment, or voice impairment, which adversely affects the student's educational performance.

Visually handicapped Having a visual impairment which, even with correction, adversely affects the student's educational performance. The term includes partially seeing and blind children.

Higher education Study beyond secondary school at an institution that offers programs terminating in an associate, baccalaureate, or higher degree.

Higher education institutions (alternative classification)

Doctoral-granting Characterized by a significant level and breadth of activity in commitment to doctoral-level education as measured by the number of doctorate recipients and the diversity in doctoral-level program offerings.

Comprehensive Characterized by diverse postbaccalaureate programs (including first-professional) but not engaged in significant doctoral-level education.

General baccalaureate Characterized by primary emphasis on general undergraduate, baccalaureate-level education. Not significantly engaged in postbaccalaureate education.

Specialized Baccalaureate or postbaccalaureate institution emphasizing one area (plus closely related specialties), such as business or engineering. The programmatic emphasis is measured by the percentage of degrees granted in the program area.

2-year Conferring at least 75 percent of its degrees and awards for work below the bachelor's level.

New These institutions, though not necessarily newly organized, are new additions to the Higher Education General Information Survey universe. When degree and award data become available, they will be reclassified.

Non-degree-granting Offering undergraduate or graduate study but not conferring degrees or awards. In this volume, these institutions are included under Specialized.

Higher education institutions (traditional classification)

4-year institution An institution legally authorized to offer and offering at least a 4-year program of college-level studies wholly or principally creditable toward a baccalaureate degree. In some tables, a further division between universities and other 4-year institutions is made. A "university" is a postsecondary institution which typically comprises one or more graduate professional schools (also see University). For purposes of trend comparisons in this volume, the selection of universities has been held constant for all tabulations after 1982. "Other 4-year institutions" would include the rest of the nonuniversity 4-year institutions.

2-year institution An institution legally authorized to offer and offering at least a 2-year program of college-level studies which terminates in an associate degree or is principally creditable toward a baccalaureate degree. Also includes some institutions that have a less than 2-year program, but were designated as institutions of higher education in the Higher Education General Information Survey.

Higher Education Price Index A price index which measures average changes in the prices of goods and services purchased by colleges and universities through current-fund education and general expenditures (excluding expenditures for sponsored research and auxiliary enterprises).

High school A secondary school offering the final years of high school work necessary for graduation, usually including grades 10, 11, 12 (in a 6–3–3 plan) or grades 9, 10, 11, and 12 (in a 6–2–4 plan).

High school program A program of studies designed to prepare students for their postsecondary education and occupation. Three types of programs are usually distinguished—academic, vocational, and general. An academic program is designed to prepare students for continued study at a college or university. A vocational program is designed to prepare students for employment in one or more semiskilled, skilled, or technical occupations. A general program is designed to provide students with the understanding and competence to function effectively in a free society and usually represents a mixture of academic and vocational components.

Historically black colleges and universities Accredited institutions of higher education established prior to 1964 with the principal mission of educating black Americans. Federal regulations (20 USC 1061 (2)) allow for certain exceptions of the founding date.

Household All the persons who occupy a housing unit. A house, apartment, or other group of rooms, or a single room, is regarded as a housing unit when it is occupied or intended for occupancy as separate living quarters, that is, when the occupants do not live and eat with any other persons in the structure, and there is direct access from the outside or through a common hall.

Housing unit A house, an apartment, a mobile home, a group of rooms, or a single room that is occupied as separate living quarters.

Imaginative writing This type of writing can take a variety of forms, such as stories, poems, plays, or lyrics. It represents a special approach to sharing experiences and understanding the world and ourselves. In this form of writing, special attention is given to rhythm and tone; the use of anecdote; the presence of metaphor and simile; shifts in plots; and the unexpected use of words, phrases, or punctuation.

Income tax Taxes levied on net income, that is, on gross income less certain deductions permitted by law. These taxes can be levied on individuals or on corporations or unincorporated businesses where the income is taxed distinctly from individual income.

Independent operations A group of self-supporting activities under control of a college or university. For purposes of financial surveys conducted by the National Center for Education Statistics, this category is

composed principally of Federally Funded Research and Development Centers (FFRDC).

Informative writing This type of writing is used to share information and to convey messages, directions, and ideas. It often involves reporting or retelling events or experiences that have already occurred.

Institutional support The category of higher education expenditures that includes day-to-day operational support for colleges, excluding expenditures for physical plant operations. Examples of institutional support include general administrative services, executive direction and planning, legal and fiscal operations, and community relations.

Instruction That category including expenditures of the colleges, schools, departments, and other instructional divisions of higher education institutions and expenditures for departmental research and public service which are not separately budgeted. Includes expenditures for both credit and noncredit activities. Excludes expenditures for academic administration where the primary function is administration (e.g., academic deans).

Instruction (elementary and secondary) Instruction encompasses all activities dealing directly with the interaction between teachers and students. Teaching may be provided for students in a school classroom, in another location such as a home or hospital, and in other learning situations such as those involving co-curricular activities. Instruction may be provided through some other approved medium such as television, radio, telephone, and correspondence. Instruction expenditures include: salaries, employee benefits, purchased services, supplies, and tuition to private schools.

Instructional staff Full-time-equivalent number of positions, not the number of different individuals occupying the positions during the school year. In local schools, includes all public elementary and secondary (junior and senior high) day-school positions that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes administrative staff, attendance personnel, clerical personnel, and junior college staff.

Instructional support services Includes salary, benefits, supplies, and contractual fees for staff providing instructional improvement, educational media (library and audiovisual), and other instructional support services.

Junior high school A separately organized and administered secondary school intermediate between the elementary and senior high schools, usually including grades 7, 8, and 9 (in a 6–3–3 plan) or grades 7 and 8 (in a 6–2–4 plan).

Labor force Persons employed as civilians, unemployed (but looking for work), or in the armed services during the survey week. The "civilian labor force" comprises all civilians classified as employed or unemployed.

Land-grant colleges The First Morrill Act of 1862 facilitated the establishment of colleges through grants of land or funds in lieu of land. The Second Morrill Act in 1890 provided for money grants and for the establishment of black land-grant colleges and universities in those states with dual systems of higher education.

Local education agency See School district.

Mandatory transfer A transfer of current funds that must be made in order to fulfill a binding legal obligation of the institution. Included under mandatory transfers are debt service provisions relating to academic and administrative buildings, including (1) amounts set aside for debt retirement and interest and (2) required provisions for renewal and replacement of buildings to the extent these are not financed from other funds.

Master's degree A degree awarded for successful completion of a program generally requiring 1 or 2 years of full-time college-level study beyond the bachelor's degree. One type of master's degree, including the Master of Arts degree, or M.A., and the Master of Science degree, or M.S., is awarded in the liberal arts and sciences for advanced scholarship in a subject field or discipline and demonstrated ability to perform scholarly research. A second type of master's degree is awarded for the completion of a professionally oriented program, for example, an M.Ed. in education, an M.B.A. in business administration, an M.F.A. in fine arts, an M.M. in music, an M.S.W. in social work, and an M.P.A. in public administration. A third type of master's degree is awarded in professional fields for study beyond the first-professional degree, for example, the Master of Laws (L.L.M.) and Master of Science in various medical specializations.

Mathematics A group of instructional programs that describes the science of numbers and their operations, interrelations, combinations, generalizations, and abstractions and of space configurations and their structure, measurement, transformations, and generalizations.

Mean test score The score obtained by dividing the sum of the scores of all individuals in a group by the number of individuals in that group.

Metropolitan population The population residing in Metropolitan Statistical Areas (MSAs). See Metropolitan Statistical Area.

Metropolitan Statistical Area (MSA) A large population nucleus and the nearby communities which have a high degree of economic and social integration with that nucleus. Each MSA consists of one or more entire counties (or county equivalents) that meet specified standards pertaining to population, commuting ties, and metropolitan character. In New England, towns and cities, rather than counties, are the basic units. MSAs are designated by the Office of Management and Budget. An MSA includes a city and, generally, its entire urban area and the remainder of the county or counties in which the urban area is located. An MSA also includes such additional outlying counties which meet specified criteria relating to metropolitan character and level of commuting of workers into the central city or counties. Specified criteria governing the definition of MSAs recognized before 1980 are published in Standard Metropolitan Statistical Areas: 1975, issued by the Office of Management and Budget. New MSAs were designated when 1980 counts showed that they met one or both of the following criteria:

- 1. Included a city with a population of at least 50,000 within their corporate limits, or
- Included a Census Bureau-defined urbanized area (which must have a population of at least 50,000) and a total MSA population of at least 100,000 (or, in New England, 75,000).

Migration Geographic mobility involving a change of usual residence between clearly defined geographic units, that is, between counties, States, or regions.

Minimum-competency testing Measuring the acquisition of competence or skills to or beyond a certain specified standard.

National Assessment of Educational Progress (NAEP) See Guide to Sources.

Newly qualified teacher Persons who: 1) first became eligible for a teaching license during the period of the study referenced or who were teaching at the time of survey but were not certified or eligible for a teaching license; and 2) had never held full-time, regular teaching positions (as opposed to substitute) prior to completing the requirements for the degree which brought them into the survey.

594

Nonmetropolitan residence group The population residing outside Metropolitan Statistical Areas. See Metropolitan Statistical Area.

Nonresident alien A person who is not a citizen of the United States and who is in this country on a temporary basis and does not have the right to remain indefinitely.

Nonsupervisory instructional staff Persons such as curriculum specialists, counselors, librarians, remedial specialists, and others possessing education certification but not responsible for day-to-day teaching of the same group of pupils.

Normal school A normal school was an institution which was engaged primarily in the preparation of teachers for positions in elementary and secondary schools. Prior to 1900, normal schools were often secondary schools with teacher training programs. During the early 20th century, normal schools gradually developed into higher education institutions.

Obligations Amounts of orders placed, contracts awarded, services received, or similar legally binding commitments made by Federal agencies during a given period that will require outlays during the same or some future period.

Occupational home economics Courses of instruction emphasizing the acquisition of competencies needed for getting and holding a job or preparing for advancement in an occupational area using home economics knowledge and skills.

Occupied housing unit Separate living quarters with occupants currently inhabiting the unit.

Off-Budget Federal entities Organizational entities, federally owned in whole or in part, whose transactions belong in the budget under current budget accounting concepts but that have been excluded from the budget totals under provisions of law.

Operation and maintenance services Includes salary, benefits, supplies, and contractual fees for supervision of operations and maintenance, operating buildings (heating, lighting, ventilating, repair, and replacement), care and upkeep of grounds and equipment, vehicle operations and maintenance (other than student transportation), security, and other operations and maintenance services.

Other foreign languages and literatures Any instructional program in foreign languages and literatures not described in tables 239 and 240, including language groups and individual languages such the non-Semitic African languages, Native Amer-

ican languages, the Celtic languages, Pacific language groups, the Ural-Altaic languages, Basque, and others.

Other support services Includes salary, benefits, supplies, and contractual fees for business support services, central support services, other support services not otherwise classified.

Other support services staff All staff not reported in other categories. This group includes media personnel, social workers, bus drivers, security, cafeteria workers, and other staff.

Outlays The value of checks issued, interest accrued on the public debt, or other payments made, net of refunds and reimbursements.

Part-time enrollment The number of students enrolled in higher education courses with a total credit load less than 75 percent of the normal full-time credit load.

Per capita income The mean income computed for every man, woman, and child in a particular group. It is derived by dividing the total income of a particular group by the total population in that group.

Personal income Current income received by persons from all sources minus their personal contributions for social insurance. Classified as "persons" are individuals (including owners of unincorporated firms), nonprofit institutions serving individuals, private trust funds, and private noninsured welfare funds. Personal income includes transfers (payments not resulting from current production) from government and business such as social security benefits and military pensions but excludes transfers among persons.

Persuasive writing This type of writing attempts to bring about some action or change. Its primary purpose is to influence others. It is concerned with the positions, beliefs, and attitudes of the readers.

Physical plant assets Includes the values of land, buildings, and equipment owned, rented, or utilized by colleges. Does not include those plant values which are a part of endowment or other capital fund investments in real estate. Excludes construction in progress.

Postbaccalaureate enrollment The number of graduate and first-professional students working towards advanced degrees and of students enrolled in graduate-level classes but not enrolled in degree programs. See also Graduate enrollment and First-professional enrollment.

Postsecondary education The provision of formal instructional programs with a curriculum designed pri-

marily for students who have completed the requirements for a high school diploma or equivalent. This includes programs of an academic, vocational, and continuing professional education purpose, and excludes avocational and adult basic education programs.

Private school or institution A school or institution which is controlled by an individual or agency other than a State, a subdivision of a State, or the Federal Government, which is usually supported primarily by other than public funds, and the operation of whose program rests with other than publicly elected or appointed officials.

Property tax The sum of money collected from a tax levied against the value of property.

Proprietary institution An educational institution that is under private control but whose profits derive from revenues subject to taxation.

Public school or institution A school or institution controlled and operated by publicly elected or appointed officials and deriving its primary support from public funds.

Pupil-teacher ratio The enrollment of pupils at a given period of time, divided by the full-time-equivalent number of classroom teachers serving these pupils during the same period.

Racial/ethnic group Classification indicating general racial or ethnic heritage based on self-identification, as in data collected by the Bureau of the Census or on observer identification, as in data collected by the Office for Civil Rights. These categories are in accordance with the Office of Management and Budget standard classification scheme presented below:

White A person having origins in any of the original peoples of Europe, North Africa, or the Middle East. Normally excludes persons of Hispanic origin except for tabulations produced by the Bureau of the Census, which are noted accordingly in this volume.

Black A person having origins in any of the black racial groups in Africa. Normally excludes persons of Hispanic origin except for tabulations produced by the Bureau of the Census, which are noted accordingly in this volume.

Hispanic A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

Asian or Pacific Islander A person having origins in any of the original peoples of the Far East,

Southeast Asia, the Indian subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

American Indian or Alaskan Native A person having origins in any of the original peoples of North America and maintaining cultural identification through tribal affiliation or community recognition

Remedial education Instruction for a student lacking those reading, writing, or math skills necessary to perform college-level work at the level required by the attended institution.

Resident population Includes civilian population and armed forces personnel residing within the United States. Excludes armed forces personnel residing overseas.

Revenue All funds received from external sources, net of refunds, and correcting transactions. Noncash transactions such as receipt of services, commodities, or other receipts "in kind" are excluded as are funds received from the issuance of debt, liquidation of investments, and nonroutine sale of property.

Salary The total amount regularly paid or stipulated to be paid to an individual, before deductions, for personal services rendered while on the payroll of a business or organization.

Sales and services Revenues derived from the sales of goods or services that are incidental to the conduct of instruction, research, or public service. Examples include film rentals, scientific and literary publications, testing services, university presses, and dairy products.

Sales tax Tax imposed upon the sale and consumption of goods and services. It can be imposed either as a general tax on the retail price of all goods and services sold or as a tax on the sale of selected goods and services.

Scholarships and fellowships This category of college expenditures applies only to money given in the form of outright grants and trainee stipends to individuals enrolled in formal coursework, either for credit or not. Aid to students in the form of tuition or fee remissions is included. College Work-Study funds are excluded and are reported under the program in which the student is working. In the tabulations in this volume, Pell Grants are not included in this expenditure category.

Scholastic Aptitude Test (SAT) An examination administered by the Educational Testing Service and

used to predict the facility with which an individual will progress in learning college-level academic subjects.

School A division of the school system consisting of students in one or more grades or other identifiable groups and organized to give instruction of a defined type. One school may share a building with another school or one school may be housed in several buildings.

School administration support services Includes salary, benefits, supplies, and contractual fees for the office of the principal, full-time department chairpersons, and graduation expenses.

School climate The social system and culture of the school, including the organizational structure of the school and values and expectations within it.

School district An education agency at the local level that exists primarily to operate public schools or to contract for public school services. Synonyms are "local basic administrative unit" and "local education agency."

Science The body of related courses concerned with knowledge of the physical and biological world and with the processes of discovering and validating this knowledge.

Secondary instructional level The general level of instruction provided for pupils in secondary schools (generally covering grades 7 through 12 or 9 through 12) and any instruction of a comparable nature and difficulty provided for adults and youth beyond the age of compulsory school attendance.

Secondary school A school comprising any span of grades beginning with the next grade following an elementary or middle-school (usually 7, 8, or 9) and ending with or below grade 12. Both junior high schools and senior high schools are included.

Secondary enrollment The total number of students registered in a school beginning with the next grade following an elementary or midde-school (usually 7, 8, or 9) and ending with or below grade 12 at a given time.

Senior high school A secondary school offering the final years of high school work necessary for graduation.

Serial volumes Publications issued in successive parts, usually at regular intervals, and as a rule, intended to be continued indefinitely. Serials include periodicals, newspapers, annuals, memoirs, proceedings, and transactions of societies.

Social studies A group of instructional programs that describes the substantive portions of behavior, past and present activities, interactions, and organizations of people associated together for religious, benevolent, cultural, scientific, political, patriotic, or other purposes.

Socioeconomic status (SES) For the High School and Beyond study and the National Longitudinal Study of the High School Class of 1972, the SES index is a composite of five equally weighted, standardized components: father's education, mother's education, family income, father's occupation, and household items. The terms high, middle, and low SES refer to the upper, middle two, and lower quartiles of the weighted SES composite index distribution.

Special education Direct instructional activities or special learning experiences designed primarily for students identified as having exceptionalities in one or more aspects of the cognitive process or as being underachievers in relation to general level or model of their overall abilities. Such services usually are directed at students with the following conditions: (1) physically handicapped; (2) emotionally handicapped; (3) culturally different, including compensatory education; (4) mentally retarded; and (5) students with learning disabilities. Programs for the mentally gifted and talented are also included in some special education programs. See also Handicapped.

Standardized test A test composed of a systematic sampling of behavior, administered and scored according to specific instructions, capable of being interpreted in terms of adequate norms, and for which there are data on reliability and validity.

Standardized test performance The weighted distributions of composite scores from standardized tests used to group students according to performance.

Standard Metropolitan Statistical Area (SMSA) See Metropolitan Statistical Area (MSA).

Student An individual for whom instruction is provided in an educational program under the jurisdiction of a school, school system, or other education institution. No distinction is made between the terms "student" and "pupil," though "student" may refer to one receiving instruction at any level while "pupil" refers only to one attending school at the elementary or secondary level. A student may receive instruction in a school facility or in another location, such as at home or in a hospital. Instruction may be provided by direct student-teacher interaction or by some other approved medium such as television, radio, telephone, and correspondence.

Student support services Includes salary, benefits, supplies, and contractual fees for staff providing attendance and social work, guidance, health, psychological services, speech pathology, audiology, and other support to students.

Subject-matter club Organizations that are formed around a shared interest in a particular area of study and whose primary activities promote that interest. Examples of such organizations are math, science, business, and history clubs.

Supervisory staff Principals, assistant principals, and supervisors of instruction. Does not include superintendents or assistant superintendents.

Tax base The collective value of objects, assets, and income components against which a tax is levied.

Tax expenditures Losses of tax revenue attributable to provisions of the Federal income tax laws that allow a special exclusion, exemption, or deduction from gross income or provide a special credit, preferential rate of tax, or a deferral of tax liability affecting individual or corporate income tax liabilities.

Technical education A program of vocational instruction that ordinarily includes the study of the sciences and mathematics underlying a technology, as well as the methods, skills, and materials commonly used and the services performed in the technology. Technical education prepares individuals for positions—such as draftsman or lab technician—in the occupational area between the skilled craftsman and the professional person.

Total expenditure per pupil in average daily attendance Includes all expenditures allocable to per pupil costs divided by average daily attendance. These allocable expenditures include current expenditures for regular school programs, interest on school debt, and capital outlay. Beginning in 1980–81, expenditures for State administration are excluded and expenditures for other programs (summer schools, community colleges, and private schools) are included.

Trade and industrial occupations The branch of vocational education which is concerned with preparing persons for initial employment or with updating or retraining workers in a wide range of trade and industrial occupations. Such occupations are skilled or semiskilled and are concerned with layout designing, producing, processing, assembling, testing, maintaining, servicing, or repairing any product or commodity.

Transcript An official list of all courses taken by a student at a school or college showing the final

grade received for each course, with definitions of the various grades given at the institution.

Trust funds Amounts collected and used by the Federal Government for carrying out specific purposes and programs according to terms of a trust agreement or statute, such as the social security and unemployment trust funds. Trust fund receipts that are not anticipated to be used in the immediate future are generally invested in interest-bearing Government securities and earn interest for the trust fund.

Tuition and fees A payment or charge for instruction or compensation for services, privileges, or the use of equipment, books, or other goods.

Unclassified students Students who are not candidates for a degree or other formal award, although they are taking higher education courses for credit in regular classes with other students.

Unadjusted dollars See current dollars.

Undergraduate students Students registered at an institution of higher education who are working in a program leading to a baccalaureate degree or other formal award below the baccalaureate, such as an associate degree.

Unemployed Civilians who had no employment but were available for work and: 1) had engaged in any specific jobseeking activity within the past 4 weeks; 2) were waiting to be called back to a job from which they had been laid off; or 3) were waiting to report to a new wage or salary job within 30 days.

U.S. Service Schools These institutions of higher education are controlled by the U.S. Department of Defense and the U.S. Department of Transportation. The ten institutions counted in the NCES surveys of higher education institutions include: the Air Force Institute of Technology, Community College of the Air Force, Naval Postgraduate School, Uniformed Services University of the Health Sciences, U.S. Air Force Academy, U.S. Army Command And General Staff College, U.S. Coast Guard Academy, U.S. Merchant Marine Academy, U.S. Military Academy, and the U.S. Naval Academy.

University An institution of higher education consisting of a liberal arts college, a diverse graduate program, and usually two or more professional schools or faculties and empowered to confer degrees in various fields of study. For purposes of maintaining trend data in this publication, the selection of university institutions has not been revised since 1982.

Visual and performing arts A group of instructional programs that generally describes the historic

development, aesthetic qualities, and creative processes of the visual and performing arts.

Vocational education Organized educational programs, services, and activities which are directly related to the preparation of individuals for paid or unpaid employment, or for additional preparation for a

career, requiring other than a baccalaureate or advanced degree.

Vocational home economics Vocational courses of instruction emphasizing the acquisition of competencies needed for getting and holding a job or preparing for advancement in an occupational area using home economics knowledge or skills.

Welcome to NCES on the Internet

http://nces.ed.gov

The National Center for Education Statistics (NCES) is the Nation's principal education statistics agency. Our Web site provides access to a wide range of statistical information about education in the United States and other nations.

The NCES Home Page includes:

A Welcome section describing the NCES and its statistical programs.

What's New offers a description of recently released reports, databases and upcoming conferences.

Education at a Glance provides direct links to NCES materials which describe or analyze education topics such as crime in public schools, access, and costs of higher education.

Frequently Asked Questions provides responses to questions about NCES data.

Other Education Sites includes links to other education related sites including federal and state education agencies.

Search provides a link to NCES information via a keyword and concept index.

Publications gives you the capability to find publications by subject or survey. Data products are also listed here by release date.

Data and Surveys provides detailed information on all NCES surveys and provides direct links to publications and data bases that can be freely downloaded.

Projects with Partners provides descriptions and links of NCES collaborative projects with state education agencies, education associations, task forces, and other groups.

Locate Education Expertise provides a search mechanism that allows you to locate NCES and other Department of Education staff by topic, survey, or name.

How to access the NCES Home Page: The home page may be accessed directly at:

http://nces.ed.gov

Addresses for some of our more interesting or popular information include:

http://nces.ed.gov/pubs/ce/ (The Condition of Education)
http://nces.ed.gov/pubs/digest97/ (Digest of Education Statistics 1997)
http://nces.ed.gov/NAEP/ (for information on educational assessment)
http://nces.ed.gov/timss (The Third International Mathematics and Science Study)
http://nces.ed.gov/ipeds (for information on the nation's colleges and universities)
http://nces.ed.gov/ccd (for information on the nation's public elementary and secondary schools and school districts)

NCES publications can be found at:

http://nces.ed.gov/ncespub1.html

Future plans include improving our search capabilities and allowing customers to retrieve portions of our databases by user-defined selection criteria.
